*Fallen Eagles: The Italian 10th Army In The Opening Campaign In The Western Desert, June 1940* Major Howard R. Christie, 2015-11-06 The Italian Army developed a sound and unique combined arms doctrine for mechanized warfare in 1938 This new doctrine was called the War of Rapid Decision It involved the use of mechanized warfare in the Italian version of the blitzkrieg This doctrine evolved from the lessons learned in the Italian Ethiopian War of 1935 to 1936 and the Spanish Civil War of 1936 1939 With Italy's entry into World War II military operations ensued along the Libyan Egyptian border between the Italian 10th Army and a much smaller British Western Desert Force The Italian Army in Libya outnumbered the British Army in Egypt by a ratio of four to one The setting seemed to be ideal for the employment of the War of Rapid Decisions Moreover Marshal Rodolfo Graziani who was the commander of the Italian 10th Army in North Africa during its first campaign in the western desert had pioneered this new form of mechanized warfare during the Ethiopian War Surprisingly the Italian forces in Libya did not employ their new doctrine reverting instead to more conventional techniques of mass It was Graziani's failure to utilize the doctrine which he had helped to develop that led to Italy's embarrassing defeat in 1941

Red Army Weapons of the Second World War

Michael Green,2023-10-05 While the Red Army's arsenal at the start of the Second World War included weapons dating back to the Great War or earlier the 1930s modernization program had introduced the automatic Tokarev pistol and self-loading Tokarev rifle. Its small arms were soon replaced by mass-produced submachine guns such as the PPSH 1941 nicknamed the PePeSha. Supplementing the submachine guns the Degtyarev Light Machine Gun DP 27 fitted with a circular pan magazine it received the not unsurprising nickname Record Player. New mortars and towed artillery pieces ranging from 76mm to 203mm entered service in the pre-war years. In addition to a wide range of towed self-propelled and anti-tank guns the Soviets fielded the Katyusha rocket launchers in 1941 nicknamed the Stalin's organ by the Germans. The 1930s saw the introduction of the BT light tank series. The iconic T 34 medium tank series came into service in late 1940 joined by the IS 2 heavy tank from early 1944 the prefix letters IS translates to Joseph Stalin. These formidable AFVs led the Red Army to victory in May 1945 over Nazi Germany. All these weapons and more are covered with numerous images in this authoritative overview of the subject.
