Mrs. L. Burke, 1864 *The Book of Flowers* Alice M. Coats, 1973 The Book of Flowers is one of most lavish and attractive records of flower illustration ever to be produced The illustrations which include 40 magnificent full page color plates are for the most part taken from rare printed books and cover the period 1485 to 1850 after which standards of reproduction began to decline The introduction consists of a short history of illustrated flower books followed by a description of the various types the early herbals of the fifteen and sixteen centuries whose object was chiefly medicinal the illustrated picture books or florilegiums of the seventeenth century whose purpose was to express the sheer beauty of the flowers they portrayed the elaborate botanical books of the eighteenth century the writing of which was give a tremendous impetus by the almost universal acceptance of the Linnaean system of plant classification of 1737 and finally the superb volumes of the early nineteenth century when more illustrated flower books were published than in all the preceding centuries put together This was the time when black and white and color illustrations of flowers reached a standard that has never since been surpassed and when works by those two masters of flower portraiture Redout and Pr vost made their first appearance book jacket The Illustrated Language of Flowers Mrs. L.
