The Immorality Of Limiting Growth:

The Immorality of Limiting Growth Edward Walter, 1981-06-30 The Industrial Age has ended according to no growth futurism because the finitude of the earth has been reached Its proponents maintain that technological innovation cannot save industrial society because of pollution over population and inflation They call for a transformed society in which productivity pollution and population growth are strictly controlled This volume emphatically challenges the no growth viewpoint on both philosophical and empirical grounds In it Edward Walter demonstrates that the interests of those who are socially deprived cannot be fulfilled in a steady state because the privileged classes are able to use their power to prevent redistribution of wealth and to retain their advantages Far from equating technology with pollution and the depletion of natural resources Walter sees it as the means by which resource shortages can be overcome and pollution control can be achieved He describes and recommends an essential liberalism that could provide economic development to all classes in a spirit of international cooperation without necessitating the transformation of human nature and political institutions *Is Limitation of the Family Immoral?* William Charles Windeyer, 1834-1897, 1889 **The Death of Industrial Civilization** Joel Jay Kassiola, 1990-01-01 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one **Anthropology and Contemporary Human Problems** John H. Bodley, 2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses on globalization cultural ecology social class and inequality the environment sustainability and development **Future Survey Annual 1983** Michael Marien, 1984-01-01 Explorations in Environmental Political Theory Joel Jay Kassiola, 2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us

today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster

The Ethics of Nonviolence Robert L. Holmes, 2013-06-20 Robert Holmes is one of the leading proponents of nonviolence in the United States and his influence extends to the rest of the world However he has never presented his views on nonviolence in full length book form The Ethics of Nonviolence brings together his best essays on the topic both classic works and more obscure pieces as well as several important essays that have never been published Holmes started his career by following Dewey and James and then turned toward metaethics The Vietnam War finally led him toward moral problems related to war and violence For the last forty years he has been a great proponent of nonviolence and pacifism in the style of Tolstoy and Gandhi If ethics is meant to be more than a purely academic exercise the theoretical ethics of philosophy must be shown to be relevant to applied morality the ongoing process of making moral judgments must add value to the world we live in For Robert Holmes no aspect of reality is more in need of ethical thinking and reform than the culture of war and violence that cannot be ignored There are morally viable alternatives to this violence Holmes argues and he scrutinizes the sources and implications of such positions Holmes shows that nonviolence and pacifism can lead us toward a more peaceful and humanely dignified world

Ideology, Social Theory, and the Environment William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity

Policymaking Under Adversity Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a

multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's Public Policymaking Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners

International Relations in the Nuclear Age Henry L. Bretton, 1985-11-01 This timely introduction to the study of international relations places special emphasis on the politics of international economics and the nuclear threat Written for beginning students the book combines comprehensive and realistic introductory material basic to the study of international relations with in depth case studies of major issues and problem areas such as management of the world economy and management of world military power East West and North South rich nation vs poor nation conflicts and the struggle for resources and ways and means of preventing World War III Readers untrained in economics will find the subject matter introduced before it is discussed in its applied form Henry L. Bretton has published widely on Western and non Western government politics and international relations He is currently Distinguished Professor of Political Science at the State University of New York College at Brockport

The Rush to Policy Peter William House, Roger Don Shull, Rush to Policy explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W. House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including *The Art of Public Policy Analysis* and with Roger D. Shull *Regulatory Reform Politics and the Environment* and *Regulations and Science Management of Research on Demand* Roger D. Shull is a senior analyst at the Division of Policy

Liberalism Versus Conservatism François B. Gérard, 2000

Everyone eschews labels yet we all seem to possess them in the minds of legions of politicians marketers and even the ever peering government We are being targeted daily by flaming liberals left wing liberals right wing conservatives compassionate conservatives religious conservatives and liberals pinko liberals middle of the road liberals conservatives and liberals pinko liberals middle of the road liberals and conservatives and of course by neoconservatives and neoliberals The search is on for kindred souls the types who will open their wallets to support whatever it is the hucksters are peddling But what to these concepts mean and do their torchbearers grasp the underlying philosophies or do they care This bibliography lists over hundreds of entries under each category which are then indexed by title an author *Abundance of Life* Harry R.

Moody, 1988-07-21 *Abundance of Life* Contested Terrains And Constructed Categories George Clement Bond, 2018-02-19 *Contested Terrains and Constructed Categories* brings together intellectuals from a variety of fields backgrounds generations and continents to deepen and reinvigorate the theoretical and intellectual integrity of African studies Building on recent debate within African studies that has revolved around the role of Africanists in the United States as gatekeepers of knowledge about Africa and Africans this volume of interdisciplinary essays focuses on the contested character of the production of knowledge itself In every chapter case studies and ethnographic materials drawn from such regions as South Africa Mozambique Zimbabwe the Malagasy Republic Angola Ghana and Senegal demonstrate the application of theory to concrete situations **Environmentalism** Donald Gibson, 2002 *Environmentalism Ideology Power* **Social**

Responsibility in Science, Technology, and Medicine Paul T. Durbin, 1992 Not everyone agrees that professionals including academic philosophers need to be actively engaged in this fashion So another theme throughout is an argument against non engaged philosophers non engaged scientists and other non engaged professionals The social problems of a technological society are manifest The book attempts to show in a scholarly way how they might be addressed effectively Jacket **Sustainable Development and the Limitation of Growth** Victor I. Danilov-Danil'yan, K. S. Losev, Igor E.

Reyf, 2009-03-27 2007 marked the 20th anniversary of the G H Brundtland Commission report that broke new ground by addressing the issue of sustainable development as a means of avoiding an ecological catastrophe This led to a multitude of political declarations documents and scientific articles while Agenda 21 adopted in 1992 in Rio de Janeiro has been accepted by the governments of more than 100 countries Sadly however this has not prevented certain recent dangerous trends nor have the wider public journalists business circles or politicians grasped the urgency of the problem It is therefore important to make humanity understand its real place in the natural environment and the gravity of the ecological threat before us The exclusive role of natural ecosystems is a key factor in the maintenance of the biospheric equilibrium The current global crisis is largely caused by their dramatic decline by 43% in the past hundred years Ignoring the immutable laws and limitations which determine the existence of all living things in the biosphere could lead humanity to an ecological catastrophe This book

presents the ecological demographic economic and socio psychological manifestations of the global crisis and outlines the immutable laws and limitations which determine the existence of all living things in the biosphere *The Small Family System, is it Injurious Or Immoral?* Charles Vickery Drysdale,1917 **Marketing and the Quality-of-Life Interface** A. Coskun Samli,1987-06-23 The book is best suited as a resource for students in seminars dealing with marketing s role in society At present it is the only book devoted entirely to the linkage between marketing and the quality of life concept Upper division and graduate collections Choice This interdisciplinary collection of essays focuses on marketing s ability to improve the prevailing quality of life in a society It provides general philosophies for marketing practitioners teachers and researchers to explore and evaluate and offers specific criteria for practicing marketing with positive quality of life consequences **Moral Farming of Immoral Tobacco** Mazen Abboud,2025-09-26 Moral Farming of Immoral Tobacco The Shia Community the Tobacco Market and the Future of Lebanon explores the ethical and operational complexities of managing a controversial industry in a fragile divided state neighboring war torn Syria It argues that in weak states with porous borders and a thriving underground economy state monopolies on harmful products provide a more responsible alternative to unregulated markets The book offers a comprehensive analysis of tobacco s historical cultural and political significance in Lebanon with a focus on its deep rooted ties to the Shia community It explores how tobacco shaped Lebanon s political landscape and in turn how the country s politics influenced the tobacco sector The narrative highlights tobacco s integration into Shia identity and examines the interplay between political Shi ism the state owned tobacco monopoly RLTT and post civil war power sharing arrangements illustrating how tobacco evolved into both a symbol of resistance and a mechanism for societal stabilization The RLTT s strategic responses to regional challenges including the Syrian crisis and a growing black market highlight its role in stabilizing Lebanon s economy amidst state decline By linking ethnography market dynamics and the failures of anti tobacco campaigns the narrative offers a unique lens to understand the complexities of Lebanon s tobacco market within its socio political framework This analysis equips readers with theoretical and institutional tools to critically assess the broader implications for Lebanon s future
