Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory Female of the Species

M. Kay Martin, Barbara Voorhies, 1975 *Female of the Species* is an attempt to use the approach of traditional anthropology in the examination of the position of women at the species level. While Martin and Voorhies recognize that there are fundamental differences between men and women that stem from basic biological differences, they are committed to the proposition that culture rather than biology plays the more critical role in determining those features of behavior which ultimately dichotomize the sexes. *Female of the Species* takes a step towards quantifying and understanding these cultural differences by looking at the changing roles women have played in society over time.

Hierarchy in the Forest

Christopher BOEHM, Christopher Boehm, 2009-06-30 *Hierarchy in the Forest* addresses this question by examining the evolutionary origins of social and political behavior. Christopher Boehm, an anthropologist whose fieldwork has focused on the political arrangements of human and nonhuman primate groups, postulates that egalitarianism is in effect a hierarchy in which the weak combine forces to dominate the strong. The political flexibility of our species is formidable; we can be quite egalitarian, we can be quite despotic. *Hierarchy in the Forest* traces the roots of these contradictory traits in chimpanzee, bonobo, gorilla, and early human societies. Boehm looks at the loose group structures of hunter-gatherers, then at tribal segmentation, and finally at present-day governments to see how these conflicting tendencies are reflected. *Hierarchy in the Forest* claims new territory for biological anthropology and evolutionary biology by extending the domain of these sciences into a crucial aspect of human political and social behavior. This book will be a key document in the study of the evolutionary basis of genuine altruism.

Reviews of this book

This well-written book, geared toward an audience with background in the behavioral and evolutionary sciences but accessible to a broad readership, raises two general questions: What is an egalitarian society, and how have these societies evolved? Christopher Boehm takes the reader on a journey from the Arctic to the Americas, from Australia to Africa, in search of hunter-gatherer and tribal societies that emanate the egalitarian ethos: one that promotes generosity, altruism, and sharing but forbids upstartism, aggression, and egoism. Throughout this journey, Boehm tantalizes the reader with vivid anthropological accounts of ridicule, criticism, ostracism, and even execution—prevalent tactics used by subordinates in egalitarian societies to level the social playing field. *Hierarchy in the Forest* is an interesting and thought-provoking book that is surely an important contribution to perspectives on human sociality and politics.

Reviews of this book

Combining an exhaustive ethnographic survey of human societies from groups of hunter-gatherers to contemporary residents of the Balkans with a detailed analysis of the behavioral attributes of nonhuman primates (chimpanzees, gorillas, bonobos), Boehm focuses on whether humans are hierarchical or egalitarian by nature. Boehm's hypotheses are invariably intriguing and well-documented. He raises topics of

wide interest and his book should get attention Publishers Weekly Boehm has been the first to look at egalitarianism with a cold unromantic eye He sees it as a victory over hierarchical tendencies which are equally marked in our species I would predict that his insightful examination will reverberate within anthropology and the social sciences as well as among biologists interested in the evolution of social systems Frans de Waal Emory University Hierarchy in the Forest is an original and stimulating contribution to thinking about the origins of egalitarianism I personally find Boehm s ideas convincing but whether one agrees with him or not he has formulated his hypotheses in such a way that this book is likely to set the terms of the discussion for the foreseeable future Barbara Smuts University of Michigan The most unique and interesting feature of this clear well written book is the way Boehm links the study of nonhuman primates particularly chimpanzees to traditional concepts of political anthropology As a political scientist I was intrigued by Boehm s suggestion that democracy both ancient and modern could be understood as the expression of the same natural dispositions that support the egalitarianism of nomadic bands and sedentary tribes I expect that many scholars in biology anthropology and the social sciences would learn from this stimulating book Even those who disagree with Boehm s arguments are likely to be provoked in instructive ways Larry Arnhart Northern Illinois University Chris Boehm boldly and cogently attacks a whole orthodoxy in anthropology which sees hunter gatherer egalitarianism as somehow the basic form of human society No praise can be too high for Boehm s brilliant and courageous book Robin Fox Rutgers University *The Failure of Democratic Nation Building: Ideology Meets Evolution* A. Somit, S. Peterson, 2015-12-29 Throughout history authoritarian governments have outnumbered democratic ones to an overwhelming degree Even today true democracies are an exception In this book Somit and Peterson argue that the main reason for this pattern is that humans are social primates with an innate tendency for hierarchical and authoritarian social and political structures Democracy requires very special enabling conditions before it can be supported by a state conditions that require decades to evolve As a result attempts to export democracy through nation building to states without these enabling conditions are doomed to failure The authors argue that money and energy devoted to nation building around the globe by the U S would be better spent on problems facing the country domestically *People and Their Opinions* Eric B. Shiraev, Richard Sobel, 2015-07-02 Utilizing both a critical thinking approach and a comparative perspective throughout the text Sobel and Shiraev provide comprehensive coverage of public opinion while also teaching students the basic skills necessary for measurement understanding and interpreting Written in an accessible and engaging manner this text provides a unique and practical introduction to the field of public opinion The book begins by schooling the reader in how to think critically and then helps students apply those techniques as they encounter the concepts of public opinion The text also employs a comparative perspective demonstrating the effect and nature of public opinion in other countries while also placing American public opinion in context *Science And The Question Of Human Equality* Margaret S Collins, Irving W Wainer, Theodore A. Bremner, 2019-06-21 This book provides an interdisciplinary look at racism and science investigating the

biological and social realities of individual and group differences The contributors examine race and racial distinctions environmental versus genetic contributions to IQ and to cognitive skill level the impact of biocultural interactions on behavior and the problems of achieving an objective appraisal of inter and intragroup differences in humans They also consider a possible model for cultural and biological evolution recommending a careful selection of models and methods of approach for sciences concerned with the study of man The book includes recent findings in the area of race and IQ documents instances of racism and classism and analyzes factors underlying these phenomena **Woman the Gatherer** Frances

W. Connell,Raewyn

Connell,2005 This is an exciting new edition of R W Connell s ground breaking text which has become a classic work on the nature and construction of masculine identity Connell argues that there is not one masculinity but many different masculinities each associated with different positions of power In a world gender order that continues to privilege men over women but also raises difficult issues for men and boys his account is more pertinent than ever before In a substantial new introduction and conclusion Connell discusses the development of masculinity studies in the ten years since the book s initial publication He explores global gender relations new theories and practical uses of masculinlity research Looking to the future his new concluding chapter addresses the politics of masculinities and the implications of masculinity research for understanding current world issues Against the backdrop of an increasingly divided world dominated by neo conservative politics Connell s account highlights a series of compelling questions about the future of human society This second edition of

Connell's classic book will be essential reading for students taking courses on masculinities and gender studies and will be of interest to students and scholars across the humanities and social sciences *Primate Visions* Donna J. Haraway, 2013-01-11

Haraway's discussions of how scientists have perceived the sexual nature of female primates opens a new chapter in feminist theory raising unsettling questions about models of the family and of heterosexuality in primate research **What Is Art For?** Ellen Dissanayake, 2015-09-01

Every human society displays some form of behavior that can be called art and in most societies other than our own the arts play an integral part in social life Those who wish to understand art in its broadest sense as a universal human endowment need to go beyond modern Western elitist notions that disregard other cultures and ignore the human species four million year evolutionary history This book offers a new and unprecedentedly comprehensive theory of the evolutionary significance of art Art meaning not only visual art but music poetic language dance and performance is for the first time regarded from a biobehavioral or ethical viewpoint It is shown to be a biological necessity in human existence and fundamental characteristic of the human species In this provocative study Ellen Dissanayake examines art along with play and ritual as human behaviors that make special and proposes that making special is an inherited tendency as intrinsic to the human species as speech and toolmaking She claims that the arts evolved as means of making socially important activities memorable and pleasurable and thus have been essential to human survival Avoiding simplism and reductionism this original synthetic approach permits a fresh look at old questions about the origins nature purpose and value of art It crosses disciplinary boundaries and integrates a number of diverse fields human ethology evolutionary biology the psychology and philosophy of art physical and cultural anthropology primitive and prehistoric art Western cultural history and children's art The final chapter From Tradition to Aestheticism explores some of the ways in which modern Western society has diverged from other societies particularly the type of society in which human beings evolved and considers the effects of the aberrance on our art and our attitudes toward art This book is addressed to readers who have a concerned interest in the arts or in human nature and the state of modern society Contemporary Marriage Kingsley

Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes But the nature of those changes their causes and consequences is very much in need of explication The experts contributing to this volume bring a wide range of perspectives sociological anthropological economic historical psychological and legal to the problem of marriage in modern society Together these essays help illuminate a form of relationship that is both vulnerable and resilient biological and social a reflection of and an influence on other social institutions Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II tracing trends in marriage age cohabitation divorce and fertility The focus here is primarily on the United States and on industrial societies in general Later chapters provide intriguing case studies of particular countries There is a recurrent interest in the impact on marriage of modernization itself but a number of essays

probe influences other than industrial development such as strong cultural and historical patterns or legislation and state control Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society **"Femininity," "masculinity," and "androgyny"** Mary Vetterling-Braggin,1982 To find more information about Rowman and Littlefield titles please visit [www rowmanlittlefield com](http://www.rowmanlittlefield.com) [National Library of Medicine Current Catalog](#)
