The Improbable Triumvirate John F Kennedy Pope John Nikita Khrushchev:

The Improbable Triumvirate Norman Cousins,1984-05-01 Describes how after the Cuban missile crisis President Kennedy Pope John and Khrushchev worked towards world peace in a new spirit of optimism *The Improbable Triumvirate: John F. Kennedy, Pope John, Nikita Khrushchev* Norman Cousins,1972-01-01 **JFK and the Unspeakable** James W. Douglass,2010-10-19 THE ACCLAIMED BOOK NOW IN PAPERBACK with a reading group guide and a new afterword by the author At the height of the Cold War JFK risked committing the greatest crime in human history starting a nuclear war Horrified by the specter of nuclear annihilation Kennedy gradually turned away from his long held Cold Warrior beliefs and toward a policy of lasting peace But to the military and intelligence agencies in the United States who were committed to winning the Cold War at any cost Kennedy s change of heart was a direct threat to their power and influence Once these dark Unspeakable forces recognized that Kennedy s interests were in direct opposition to their own they tagged him as a dangerous traitor plotted his assassination and orchestrated the subsequent cover up Douglass takes readers into the Oval Office during the tense days of the Cuban Missile Crisis along on the strange journey of Lee Harvey Oswald and his shadowy handlers and to the winding road in Dallas where an ambush awaited the President s motorcade As Douglass convincingly documents at every step along the way these forces of the Unspeakable were present moving people like pawns on a chessboard to promote a dangerous and deadly agenda *Nuclear Apartheid* Shane J. Maddock,2010 Nuclear Apartheid The Quest for American Atomic Supremacy from World War II to the Present **God's Diplomats** Victor Gaetan,2023-07-15 Using inside sources and extensive field reporting about the secretive high stakes world of international diplomacy Vatican reporter Victor Gaetan takes readers to the Holy See to explicate Pope Francis s diplomacy show why it works and to offer readers a startling contrast to the dangerous inadequacies of recent U S international decisions *For the Soul of Mankind* Melvyn P. Leffler,2007-09-18 What caused the Cold War in the first place and why did it last as long as it did Melvyn P Leffler homes in on four crucial episodes when American and Soviet leaders considered modulating avoiding or ending hostilities and asks why they failed **Brezhnev and the Decline of the Soviet Union** Thomas Crump,2013-11-07 Leonid Brezhnev was leader of the Soviet Union from 1964 1982 a longer period than any other Soviet leader apart from Stalin During Brezhnev s time Soviet power seemed at its height and increasing Living standards were rising the Soviet Union was a nuclear power and successful in its space missions and the Soviet Union s influence reached into all part of the world Yet as this book which provides a comprehensive overview and reassessment of Brezhnev s life early political career and career as leader shows the seeds of decline were sown in Brezhnev s time There was a huge over commitment of resources to the Soviet industrial military complex and to massively expensive foreign policy overstretch At the same time there was a failure to deliver on citizens rising expectations and an overconfident ignoring of dissidents and their demands The book will be of great interest to Russian specialists and also to scholars of international relations and world history The Russian Quest

for Peace and Democracy Metta Spencer, 2012-07-10 In *The Russian Quest for Peace and Democracy* Metta Spencer recounts the political and military changes that have occurred in Russia up to mid 2010 Using hundreds of interviews she conducted with officials dissidents and liberal intellectuals she describes the various groups forces and individuals that worked to liberalize the totalitarian Soviet Union and its fellow nations behind the Iron Curtain and which ultimately brought about the dissolution of those repressive governments Spencer identifies four political orientations to describe Soviet society Sheep ordinary citizens who accepted the undemocratic regime they lived in without challenging it Dinosaurs hard line Communist officials Termites including Mikhail Gorbachev and his advisers and government and Barking Dogs a few hundred dissidents who made a lot of noise protesting hoping to awaken a grass roots demand for democracy The strange rivalry between the Termites and Barking Dogs would ultimately doom perestroika Spencer's research dispels the widely held perception that US President Ronald Reagan won the Cold War by standing firm until the Soviet Union blinked first There are vitally important lessons to be learned from the Soviet period about how to assist citizens of totalitarian and authoritarian regimes around the world The irony is that transnational civil society organizations major sources of the progress in Soviet Russia are still needed today in authoritarian Russia under Vladimir Putin and Dmitry Medvedev for totalitarianism remains a potential social trap In *The Russian Quest for Peace and Democracy* Metta Spencer suggests new ways of building urgently needed social capital in today's Russia where democracy has yet to flourish

Prescription for Survival Bernard Lown, 2008-07-21 How close we came to extinction and it is forgotten now So begins Nobel Prize winner Bernard Lown's story of his fight against the nuclear symptom of what he calls the disease of militarism It is still active and highly contagious as witnessed by events in Iran North Korea Pakistan and all too many other places And it can only be stopped as this extraordinary memoir vividly demonstrates by concerned citizens working together In 1981 brimming with anxiety about the escalating nuclear confrontation with the Russians Lown launched a USA USSR antinuclear movement with Soviet cardiologist Evgeni Chazov The International Physicians for the Prevention of Nuclear War IPPNW Over the next four years Lown and Chazov recruited more than 150 000 doctors worldwide to join their movement held international conferences that included U S and Russian military leaders met with numerous world political leaders and appeared on television programs broadcast throughout the USSR and the U S In 1985 despite active opposition from the U S government and NATO Lown and Chazov accepted the Nobel Peace Prize on behalf of IPPNW This dramatic story is told with a vibrancy of language that

illuminates dramatic scenes such as Lown convincing King Hussein of Jordan to join the anti nuclear struggle during a medical exam the heart attack of a Russian journalist at an IPPNW press conference and Lown s face to face conversations with Gorbachev Although this book is concerned with a potential clash of superpowers Lown writes At the heart of these cascading events is a human narrative Historical amnesia is a prelude for repeated victimization Lown says Prescription for Survival probes the past to help us understand what drove and continues to drive nuclear proliferation and offers a blueprint showing how we can join together across national boundaries to end it

20th century follows the evolutions of all the principal innovations introduced before 1913 as detailed in the first volume as well as the origins and elaborations of all fundamental 20th century advances The history of the 20th century is rooted in amazing technical advances of 1871 1913 but the century differs so remarkably from the preceding 100 years because of several unprecedented combinations The 20th century had followed on the path defined during the half century preceding the beginning of World War I but it has traveled along that path at a very different pace with different ambitions and intents The new century's developments elevated both the magnitudes of output and the spatial distribution of mass industrial production and to new and in many ways virtually incomparable levels Twentieth century science and engineering conquered and perfected a number of fundamental challenges which remained unresolved before 1913 and which to many critics appeared insoluble This book is organized in topical chapters dealing with electricity engines materials and syntheses and information techniques It concludes with an extended examination of contradictory consequences of our admirable technical progress by confronting the accomplishments and perils of systems that brought liberating simplicity as well as overwhelming complexity that created unprecedented affluence and equally unprecedented economic gaps that greatly increased both our security and fears as well as our understanding and ignorance and that provided the means for greater protection of the biosphere while concurrently undermining some of the key biophysical foundations of life on Earth Transforming the Twentieth Century will offer a wide ranging interdisciplinary appreciation of the undeniable technical foundations of the modern world as well as a multitude of welcome and worrisome consequences of these developments It will combine scientific rigor with accessible writing thoroughly illustrated by a large number of appropriate images that will include historical photographs and revealing charts of long term trends *Vatican II and Phenomenology* J.F.

Kobler,2012-12-06 The thesis of this essay may be stated quite briefly Vatican II is a demonstration model of the phenomenological method employed on an international scale It exemplifies the final developmental stage postulated by Husserl of an inter subjective phenomenology which would take its point of departure not from individual subjectivity but from transcendental intersubjectivity Vatican II accordingly offers a unique application of a universal transcendental philosophy in the field of religious reflection for the practical purposes of moral and socio cultural renewal Phenomenology as a distinctively European development is relatively unknown in America at least in its pure form Our contact with this style of intuitive reflection is usually filtered through psychology or sociology However Edmund Husserl The Father of Phenomenology was originally trained in mathematics and he entered the field of philosophy because he recognized that the theoretical foundations of modern science were disintegrating He foresaw that unless this situation were rectified modern men would eventually slip into an attitude of absolute scepticism relativism and pragmatism After the First World War he saw this theoretical problem mirrored more and more in the social turbulence of Europe and his thoughts turned to the need for a renewal at all levels of life In 1937 when Nazism was triumphant in Germany and Europe on the brink of

World War II he wrote his last major work *The 4 Crisis of European Sciences and Transcendental Philosophy* **The Long War** Andrew J.
