Niall McCrae, 2011-10-19 Lunacy the legendary notion of minds unhinged by the moon continues to captivate the popular imagination Although it violates the assumptions of modern science and psychiatry such belief remains common among mental health workers Furthermore several studies have found a small unexplained correlation between behaviour and the lunar cycle The book is divided into two parts It begins with a historical account of the lunacy concept followed by an investigation of hypothetical mechanisms for a lunar effect *The Human Cosmos* Jo Marchant, 2021-09-07 A Best Book of 2020 NPR A Best Book of 2020 The Economist A Top Ten Best Science Book of 2020 Smithsonian A Best Science and Technology Book of 2020 Library Journal A Must Read Book to Escape the Chaos of 2020 Newsweek Starred review Booklist

Starred review Publishers Weekly A historically unprecedented disconnect between humanity and the heavens has opened Jo Marchant's book can begin to heal it For at least 20 000 years we have led not just an earthly existence but a cosmic one Celestial cycles drove every aspect of our daily lives Our innate relationship with the stars shaped who we are our art religious beliefs social status scientific advances and even our biology But over the last few centuries we have separated ourselves from the universe that surrounds us It's a disconnect with a dire cost Our relationship to the stars and planets has moved from one of awe wonder and superstition to one where technology is king the cosmos is now explored through data on our screens not by the naked eye observing the natural world Indeed in most countries modern light pollution obscures much of the night sky from view Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see looking up on a clear dark night That experience and the thoughts it has engendered have radically shaped human civilization across millennia The cosmos is the source of our greatest creativity in art in science in life To show us how Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France and to the summer solstice at a 5 000 year old tomb at Newgrange Ireland We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars We discover how light reveals the chemical composition of the sun and we are with Einstein as he works out that space and time are one and the same A four billion year old meteor inspires a search for extraterrestrial life The cosmically liberating summary revelation is that star gazing made us human

**The Secret Influence of the Moon** Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA's Apollo missions and the findings they concealed Reveals the many holes in the Giant Impact

theory about the Moon's origins and the evidence for a hollow artificial Moon. Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah tarot and other sources. Despite being the most prominent celestial body after the Sun, the Moon has many qualities that science has yet to explain. Lunar rock samples reveal the Moon once had a magnetic field like the Earth, and seismic experiments by NASA suggest the Moon is at least partially hollow. For centuries, people have observed lights, moving clouds, and shadows, and even the disappearance of entire craters via telescope. Apollo astronauts repeatedly felt the presence of a non-human intelligence during their Moon visits, and many indigenous traditions speak of malevolent visitors from the Moon. A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago. Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features: its craters, maria, rilles, tunnels, and domes. He examines several of NASA's Apollo missions, showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there. He explains the many holes in the commonly accepted Giant Impact theory of the Moon's origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth. Examining the deep influence of the Moon on the collective mind of humanity, Proud looks at what the Qabbalah, the tarot, and other occult traditions say about the Moon and interprets G. I. Gurdjieff's teachings that we are food for the Moon. He investigates the Moon as a gateway to another realm, as the Purgatory of Christianity, and as the home of an alien intelligence who controls and exploits humanity. Examining the Moon from both scientific and esoteric perspectives, Proud shows the Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth.

**Earth-Moon Relationships** Cesare Barbieri, Francesca Rampazzi, 2013-06-29 Sediments and sedimentary processes on the Moon and Earth are very different. In the absence of water, an atmosphere, the magnetosphere, and much less oxygen in its rocks, the Moon has neither clay minerals nor carbonates, and no Fe<sup>3</sup>. Mechanical weathering by impacts is the principal process of sediment generation on the Moon; on Earth, chemical weathering predominates. Whereas processes of sediment transport are principally ballistic on the Moon, movement by air, water, and ice prevail on the Earth. The radical differences between Earth and Moon sediments make them useful end members between which all sediments of all terrestrial planetary bodies are expected to lie. The purpose of this paper is 1) to compare and contrast major characteristics of the origin, transportation, deposition, and preservation of sediments, especially dust, in the Earth and the Moon, and 2) to suggest how sediments of other rocky planetary bodies, especially Mars, may fit in between the sediments of the Earth and the Moon.

**Acorns: Windows High-Tide Foghat** Joshua Morris, 2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self. Having chosen to focus upon ego, established securely by the time of Christ, much more beta brain wave development will destroy our species and others, which process has already begun. We create our own realities through beliefs, intents, and desires, and we were in and out of probabilities constantly. Feelings follow beliefs, not the other way around. *The*

**Sorcery** J. Finley Hurley, 1985 *Geschiedenis van hekserij en tovenarij* Pseudoscience and the Paranormal Terence Hines, 2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication

and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims      The Man Who Predicts Earthquakes Cal Orey,2006 Meet Jim Berkland a California geologist whose forecast of the famous October 17 1989 World Series Quake that rumbled through the San Francisco Bay Area was right on the money This is the first book to document a geologist s uncanny ability to foretell earthquakes around the world This facinating read includes stories of earthquake survivors a wealth of details about seismic activity in earthquake prone regions around the world      Consciousness and Evolution James Christodoulides,2012-08-01 Understanding the nature of consciousness is the key to understanding the whole of reality It is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality Beyond the simplistic notion of duality that is so entrenched in Western philosophies there is a deeper and more profound way to comprehend the nature of our existence We are parts within a wider whole We do not exist as separate beings within the Universe we are parts of the Universe itself The theory outlined in Consciousness and Evolution turns orthodox explanations for the evolution of mind upside down It is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves In order to understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself
