From the author of *The Witches*, *The Book of David*, and *The Book of the Dead*, a new history of the occult and the paranormal. In this book, Jenny Uglow explores the lives of five friends who were instrumental in the development of the occult and the paranormal. Their curiosity and passion for the unknown led them to explore the boundaries of the human mind and the mysteries of the universe. Their lives were a testament to the power of the human spirit and the quest for knowledge.

The Pilgrim Art Robert Finlay, 2010-02-17 Illuminating one thousand years of history The Pilgrim Art explores the remarkable cultural influence of Chinese porcelain around the globe Cobalt ore was shipped from Persia to China in the fourteenth century where it was used to decorate porcelain for Muslims in Southeast Asia India Persia and Iraq Spanish galleons delivered porcelain to Peru and Mexico while aristocrats in Europe ordered tableware from Canton The book tells the fascinating story of how porcelain became a vehicle for the transmission and assimilation of artistic symbols themes and designs across vast distances from Japan and Java to Egypt and England It not only illustrates how porcelain influenced local artistic traditions but also shows how it became deeply intertwined with religion economics politics and social identity Bringing together many strands of history in an engaging narrative studded with fascinating vignettes this is a history of cross cultural exchange focused on an exceptional commodity that illuminates the emergence of what is arguably the first genuinely global culture

The Age of Projects Maximilian E. Novak, 2008-08-23 The Projecting Age was a term the English novelist Daniel Defoe used to describe the end of the seventeenth century This term could just as easily be used however to describe the period known as the Long Eighteenth

Century 1660 1789 The Age of Projects uses the notion of a project as a key to understanding the massive social cultural political literary and scientific transitions that occurred in Europe during this time The contributors to this collection examine fraudulent grandiose altruistic and idealistic projects that reveal the period s radical breaks from the past and its preoccupation with the future Examining topics as diverse as Jonathan Swift s satire on the possibility of a computer to Gottfried Leibniz s effort to build one and Edmund Burke s prediction that the project of democratic governance would be taken over by greedy adventurers this volume provides significant insight into the period s ambitions for an improved future A well balanced collection by leading scholars from diverse disciplines The Age of Projects is a significant contribution to intellectual history literary history and the history of science

A Hybrid Imagination Andrew Jamison, Steen Hyldgaard Christensen, Lars Botin, 2022-05-31 This book presents a cultural perspective on scientific and technological development As opposed to the story lines of economic innovation and social construction that tend to dominate both the popular and scholarly literature on science technology and society or STS the authors offer an alternative approach devoting special attention to the role played by social and cultural movements in the making of science and technology They show how social and cultural movements from the Renaissance of the late 15th century to the environmental and global justice movements of our time have provided contexts or sites for mixing scientific knowledge and technical skills from different fields and social domains into new combinations thus fostering what the authors term a hybrid imagination Such a hybrid imagination is especially important today as a way to counter the competitive and commercial hubris that is so much taken for granted in contemporary science and engineering discourses and practices with a sense of cooperation and social responsibility The book portrays the history of science and technology as an underlying tension between hubris literally the ambition to play god on the part of many a scientist and engineer and neglect the consequences and a hybrid imagination connecting scientific facts and technological artifacts with cultural understanding The book concludes with chapters on the recent transformations in the modes of scientific and technological production since the Second World War and the contending approaches to greening science and technology in relation to the global quest for sustainable development The book is based on a series of lectures that were given by Andrew Jamison at the Technical University of Denmark in 2010 and draws on the authors many years of experience in teaching non technical or contextual knowledge to science and engineering students The book has been written as part of the Program of Research on Opportunities and Challenges in Engineering Education in Denmark PROCEED supported by the Danish Strategic Research Council from 2010 to 2013 Table of Contents Introduction Perceptions of Science and Technology Where Did Science and Technology Come From Science Technology and Industrialization Science Technology and Modernization Science Technology and Globalization The Greening of Science and Technology

Dissecting the

Criminal Corpse Elizabeth T. Hurren, 2016-08-17 Those convicted of homicide were hanged on the public gallows before being dissected under the Murder Act in Georgian England Yet from 1752 whether criminals actually died on the hanging tree or in the dissection room remained a medical mystery in early modern society Dissecting the Criminal Corpse takes issue with the historical cliché of corpses dangling from the hangman's rope in crime studies Some convicted murderers did survive execution in early modern England Establishing medical death in the heart lungs brain was a physical enigma Criminals had large bull necks strong willpowers and hearty survival instincts Extreme hypothermia often disguised coma in a prisoner hanged in the winter cold The youngest and fittest were capable of reviving on the dissection table Many died under the lancet Capital legislation disguised a complex medical choreography that surgeons staged They broke the Hippocratic Oath by executing the Dangerous Dead across England from 1752 until 1832 This book is open access under a CC BY license

Hubris and Hybrids Mikael Hård, Andrew Jamison, 2013-09-13 Human societies have not always taken on new technology in appropriate ways Innovations are double edged swords that transform relationships among people as well as between human societies and the natural world Only through successful cultural appropriation can we manage to control the hubris that is fundamental to the innovative enterprising human spirit and only by becoming hybrids combining the human and the technological will we be able to make effective use of our scientific and technological achievements This broad cultural history of technology and science provides a range of stories and reflections about the past discussing areas such as film industrial design and alternative environmental technologies and including not only European and North American but also Asian examples to help resolve the contradictions of contemporary high tech civilization

Globalization and Time Luchien Karsten, 2013-05-07 The process of globalization has brought about countless changes in societies communities regions and economies across the globe It has been analyzed from many perspectives as a result and much has been written to muddy the waters of our understanding of this important concept In going back to the real origins of the global economy this book demonstrates that understanding this phenomenon as a battle against time will bring a new clarity to the subject The process of globalization was accompanied by the mastering of social time thereby producing a progressive increase in the speed of business transactions both in manufacturing and in services The context is the development of international trade in western societies and the creation of business institutions to drive forward growth The account takes a long view beginning with early European exploration in the B C period and ending with the establishment of multinational enterprises in the 20th century Using an impressive range of sources this unique book will be valuable reading for students and academics involved with the study of international business economic history business history and politics among other disciplines

Clay Suzanne Staubach,2013-09-03 More than a third of the houses in the world are made of clay Clay vessels were instrumental in the invention of cooking wine and beer making and international trade Our toilets are made of clay The first spark plugs were thrown on the potter s wheel Clay has played a vital role in the health and beauty fields Indeed this humble material was key to many advances in civilization including the development of agriculture and the invention of baking architecture religion and even the space program In Clay Suzanne Staubach takes a lively look at the startling history of the mud beneath our feet Told with verve and erudition this story will ensure you won t see the world around you in quite the same way after reading the book

The Singularity of Western Innovation Leonard Dudley,2017-08-14 This book highlights the contribution of language standardization to the economic rise of the West between 1600 and 1860 Previous studies have been unable to explain why during this period almost all industrial innovation was confined to small areas around the main cultural centers of three Western states Britain France and the United states This book argues that Western Europe and its offshoots were the only Eurasian societies able to apply typography cheaply to their writing systems The emergence in the West of large networks of people able to communicate in standardized languages made possible the breakthroughs of the Industrial Revolution Military byproducts of three macro innovations the steam engine machine tools and interchangeable parts then constituted the West s toolbox for empire The book will appeal to readers seeking to explain how the West attained its unprecedented advance over Asia in the nineteenth century and why this lead has since proved temporary

Practical Matter Margaret C. Jacob,Larry Stewart,2006-09-01 Margaret Jacob and Larry Stewart examine the profound transformation that began in 1687 From the year when Newton published his Principia to the Crystal Palace Exhibition of 1851 science gradually became central to Western thought and economic development

The book aims at a general audience and examines how despite powerful opposition on the Continent a Newtonian understanding gained acceptance and practical application By the mid eighteenth century the new science had achieved ascendancy and the race was on to apply Newtonian mechanics to industry and manufacturing They end the story with the temple to scientific and technological progress that was the Crystal Palace exhibition Choosing their examples carefully Jacob and Stewart show that there was nothing preordained or inevitable about the centrality awarded to science It is easy to forget that science might have been stillborn or remained the esoteric knowledge of court elites Instead for better and for worse science became a centerpiece of Western culture

Eighteenth-Century Authorship and the Play of Fiction Emily Hodgson Anderson, 2009-05-15 This study looks at developments in eighteenth century drama that influenced the rise of the novel it begins by asking why women writers of this period experimented so frequently with both novels and plays Here Eliza Haywood Frances Burney Elizabeth Inchbald Maria Edgeworth and Jane Austen explore theatrical frames from the playhouse to the social conventions of masquerade to the fictional frame of the novel itself that encourage audiences to dismiss what they contain as feigned Yet such frames also as a result create a safe space for self expression These authors explore such payoffs both within their work through descriptions of heroines who disguise themselves to express themselves and through it Reading the act of authorship as itself a form of performance Anderson contextualizes the convention of fictionality that accompanied the development of the novel she notes that as the novel like the theater of the earlier eighteenth century came to highlight its fabricated nature authors could use it as a covert yet cathartic space Fiction for these authors like theatrical

performance for the actor thus functions as an act of both disclosure and disguise or finally presents self expression as the ability to oscillate between the two in the play of fiction

Charles Darwin, Geologist Sandra Herbert, 2005 Pleasure of imagination I a geologist have illdefined notion of land covered with ocean former animals slow force cracking surface c truly poetical from Charles Darwin s Notebook M 1838 The early nineteenth century was a golden age for the study of geology New discoveries in the field were greeted with the same enthusiasm reserved today for advances in the biomedical sciences In her long awaited account of Charles Darwin s intellectual development Sandra Herbert focuses on his geological training research and thought asking both how geology influenced Darwin and how Darwin influenced the science Elegantly written extensively illustrated and informed by the author s prodigious research in Darwin s papers and in the nineteenth century history of earth sciences Charles Darwin Geologist provides a fresh perspective on the life and accomplishments of this exemplary thinker As Herbert reveals Darwin s great ambition as a young scientist one he only partially realized was to create a simple geology based on movements of the earth s crust Only one part of his scheme has survived in close to the form in which he imagined it a theory explaining the structure and distribution of coral reefs Darwin collected geological specimens and took extensive notes on geology during all of his travels His grand adventure as a geologist took place during the circumnavigation of the earth by H M S Beagle 1831 1836 the same voyage that informed his magnum opus *On the Origin of Species* Upon his return to England it was his geological findings that first excited scientific and public opinion Geologists including Darwin s former teachers proved a receptive audience the British government sponsored publication of his research and the general public welcomed his discoveries about the earth s crust Because of ill health Darwin s years as a geological traveler ended much too soon his last major geological fieldwork took place in Wales when he was only thirty three However the experience had been transformative the methods and hypotheses of Victorian era geology Herbert suggests profoundly shaped Darwin s mind and his scientific methods as he worked toward a full blown understanding of evolution and natural selection
