Rotherham, 2013-04-01

The loss of the great fenlands of eastern England is the greatest single removal of ecology in our history So thorough was the process that most visitors to the regions or even people living there have little idea of what has gone For many the Fenlands are the vast expansive flatlands of intensive farming the breadbaskets of Britain Lost are the vast flocks of wetland birds that filled the evening skies in winter the frozen wetlands and the fen skaters of the winter and the abundant black terns or breeding wading birds of the summer months However pause a while off main roads and consider place names and road names Fenny Lane The Withies Commonside Reed Holme Fen Common Turbary Lane Wildmore Adventurers Fen Wicken Fen and more they tell a story of a landscape now gone but once hugely important The Fens bred revolution and civil war and paid the penalty They nurtured religious non conformism with global impact After 1066 the Saxons withheld the Normans onslaught and in the 1970s unting's Beavers took action against twentieth century invaders The fenscapes neither water nor land but something in between breed independence and if necessary dissent This story is of politically and economically driven ecological catastrophe and loss So much has gone but we do not even know fully what was there before With global environmental change and especially climate change fenlands once again have major roles in our sustainable futures **A**
