The Man With The Shattered World:

The Man with a Shattered World A. R. Luria, 1987-04-30 Luria presents a compelling portrait of a man's heroic struggle to regain his mental faculties. A soldier named Zasetsky, wounded in the head at the battle of Smolensk in 1943, found himself unable to recall his recent past or speak, read or write without difficulty. Woven throughout his first-person account are interpolations by Luria himself.

The Man with a Shattered World Aleksandr Romanovič Lurija, 1972 *The Man with a Shattered World* Aleksandr Romanovich Lurii[a], 1976-09-01 A young soldier suffered a severe brain injury resulting in impaired vision, loss of memory, and loss of the ability to speak, read, and write. As though he were a child, he has to relearn. Professor Luria worked with him for over twenty years together, building a life for him.

The Man Who Mistook His Wife for a Hat Oliver Sacks, 2021-09-14 THE INSPIRATION FOR THE NBC SERIES BRILLIANT MINDS In his most extraordinary book, the bestselling author of *Awakenings* and poet laureate of medicine, *The New York Times* recounts the case histories of patients inhabiting the compelling world of neurological disorders: from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Oliver Sacks has become the world's best-known neurologist. His case studies of broken minds offer brilliant insight into the mysteries of consciousness. *The Guardian* Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human, and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: the suffering, afflicted, fighting human subject.

The Legacy of Alexander Luria:
Neuropsychology as a Humane Science Bella Kotik-Friedgut, 2025-05-22 This book invites you into the remarkable life and enduring legacy of Alexander Romanovich Luria, whose groundbreaking contributions to understanding of the human mind continue to reverberate through modern neuroscience and clinical practice. Drawing from previously unknown personal diaries, intimate family archives, and firsthand accounts from those who knew him best, this book depicts the man behind the science. Born in revolutionary Russia and navigating the tumultuous political landscape of the Soviet era, Luria emerged as a brilliant mind whose work transcended borders and ideologies. It is not merely a biography; it is an invitation to discover how one exceptional scientist's blend of brilliant observation, methodological innovation, and profound empathy created a legacy that continues to transform how we understand and treat neurological conditions today. The book highlights Luria's revolutionary contributions to neuropsychology, his unique romantic science approach, and the personal insights offered through previously unpublished materials. What made Luria truly exceptional was his refusal to reduce patients to clinical

cases Instead he pioneered what he called romantic science an approach that honored the whole person behind the neurological condition This small book gives the reader in depth analysis of two of Luria s celebrated case studies The Mind of a Mnemonist and The Man with a Shattered World including the afterlife of these books showing that decades later Luria s work remains essential reading for anyone seeking to understand the complex relationship between brain mind and human experience Delving into personal accounts from Luria s students and collaborators highlights his pivotal role in shaping the global neuropsychology community His visionary approach to education established him as a mentor who profoundly influenced generations leaving an enduring legacy through his systemic dynamic method His influence continues to resonate today as his students make his ideas accessible to a new generation of scientists through webinars conferences books and journal publications including the Lurian Journal

An Analysis of Oliver Sacks's The Man Who Mistook His Wife for a Hat and Other Clinical Tales Dario Krpan,Alexander O' Connor,2017-07-05 In The Man Who Mistook His Wife for a Hat neurologist Oliver Sacks looked at the cutting edge work taking place in his field and decided that much of it was not fit for purpose Sacks found it hard to understand why most doctors adopted a mechanical and impersonal approach to their patients and opened his mind to new ways to treat people with neurological disorders He explored the question of deciding what such new ways might be by deploying his formidable creative thinking skills Sacks felt the issues at the heart of patient care needed redefining because the way they were being dealt with hurt not only patients but practitioners too They limited a physician s capacity to understand and then treat a patient s condition To highlight the issue Sacks wrote the stories of 24 patients and their neurological clinical conditions In the process he rebelled against traditional methodology by focusing on his patients subjective experiences Sacks did not only write about his patients in original ways he attempt to come up with creative ways of treating them as well At root his method was to try to help each person individually with the core aim of finding meaning and a sense of identity despite or even thanks to the patients condition Sacks thus redefined the issue of neurological work in a new way and his ideas were so influential that they heralded the arrival of a broader movement narrative medicine that placed stronger emphasis on listening to and incorporating patients experiences and insights into their care

The Seventy Prepositions Carol Snow,2004-04-19 Carol Snow s award winning poetry has been admired and celebrated as work of difficult beauty Robert Hass ever restless ever re framing the frame of reference Boston Review teaching us how brutally self transforming a verbal action can be when undertaken in good faith Jorie Graham In this her third volume Snow continues to mine the language to its most mysterious depths and to explore the possibilities its meanings and mechanics hold for definition transformation and emotional truth These poems place us before and in language as we stand before and in the world The Seventy Prepositions comprises three suites of poems The first Vocabulary Sentences reflects on words and reality by taking as a formal motif the sort of sentences used to test vocabulary skills in elementary school The poems of the second suite Vantage gather loosely around questions of perspective and perception The closing

suite finds its inspiration in the Japanese dry landscape gardens known as karesansui such as the famous rock garden at Ryoan ji Temple in Kyoto Here the poet approaches composition as one faces a miniature Zen garden choosing and positioning words rather than stones formally precisely evocatively *Pride and a Daily Marathon* Jonathan Cole,Ian Waterman,1995-07-11 At the age of 19 Ian Waterman was suddenly struck down at work by a rare neurological illness that deprived him of all sensation below the neck He fell on the floor in a heap unable to stand or control his limbs having lost the sense of joint position and proprioception of that sixth sense of his body in space which we all take for granted After months in a neurological ward he was judged incurable and condemned to a life of wheelchair dependence This is the first U S publication of a remarkable book by his physician Jonathan Cole It tells the compelling story including a clear clinical description of a rare condition of how Waterman reclaimed a life of full mobility against all expectations by mental effort and sheer courage Cole describes how Waterman gradually adapted to his strange condition As the doctors had predicted there was no neurological recovery He had to monitor every movement by sight to work out where his limbs were since he had no feedback from his peripheral nerves But with astonishing persistence Waterman developed elaborate tricks and strategies to control his movements enabling him to cope not only with the day to day problems of living but even with the challenges of work love and marriage *Self-Knowledge and the Self* David A Jopling,2002-09-11 In this clear and reasoned discussion of self knowledge and the self the author asks whether it is really possible to know ourselves as we really are He illuminates issues about the nature of self identity which are of fundamental importance in moral psychology epistemology and literary criticism Jopling focuses on the accounts of Stuart Hampshire Jean Paul Sartre and Richard Rorty and dialogical philosophical psychology and illustrates his argument with examples from literature drama and psychology **The Psychology of Autobiographical Memory** Igor Sotgiu,2021-04-12 This book provides an overview of the key theoretical and empirical issues relating to autobiographical memory the extraordinarily complex psychological activity that enables us to retrieve relive and reappraise our pasts The first part of the book retraces the genesis and historical development of the psychology of autobiographical memory from the pioneering contributions of Francis Galton Victor Henri and Sigmund Freud to the most recent research in the fields of cognitivism cognitive science and neuroscience The author then moves on to two key topics in the contemporary panorama the content and organisation of autobiographical memory what we remember from our lives and how we link together specific segments of our personal pasts and the functions of autobiographical memory why we remember our pasts This book will provide a valuable scholarly overview for cognitive psychologists and an authoritative critical introduction to the field for students and scholars from across psychology philosophy literary criticism sociology and law *The Woman Who Changed Her Brain* Barbara Arrowsmith-Young,2013-09-17 Previously published in hardcover New York Free Press 2012 *A Man Without Words* Susan Schaller,2014-05-15 For more than a quarter of a century Ildefonso a Mexican Indian lived in total isolation set apart from the rest of the world He wasn't a political prisoner

or a social recluse he was simply born deaf and had never been taught even the most basic language Susan Schaller then a twenty four year old graduate student encountered him in a class for the deaf where she had been sent as an interpreter and where he sat isolated since he knew no sign language She found him obviously intelligent and sharply observant but unable to communicate and she felt compelled to bring him to a comprehension of words The book vividly conveys the challenge the frustrations and the exhilaration of opening the mind of a congenitally deaf person to the concept of language This second edition includes a new chapter and afterword

The Man Who Could Not Forget, digital original edition Rodrigo Quian Quiroga,2014-01-10 Imagine the astonishment felt by neuroscientist Rodrigo Quian Quiroga when he found a fantastically precise interpretation of his research findings in a story written by the great Argentinian fabulist Jorge Luis Borges fifty years earlier In this BIT Quian Quiroga explores real life cases that recall Borges s fictional Funes the Memorious investigating a man who couldn t forget and another who could not form new memories *Book Review Index* ,1965 Every 3rd issue is a quarterly cumulation

The Book Of Lists David Wallechinsky,Amy Wallace,2009-08-06 The first and best compendium of facts weirder than fiction of intriguing information and must talk about trivia has spawned many imitators but none as addictive or successful For nearly three decades the editors researched curious facts unusual statistics and the incredible stories behind them The most entertaining and informative of these have been brought together in this edition

Teaching Through the Ill Body Marla Morris,2008-01-01 This book raises questions around pedagogy and illness Morris explores two large issues that run through the text What does the ill body teach What does the teacher do through the ill body The body has something to teach while teaching through the ill body This book is theoretically framed by connections

between spirituality and aesthetics As the great spiritual traditions teach our responsibility as teachers is to help others especially those who are marginalized What is lacking in our educational discourse is a discussion of the responsibility we all have to help those who get sick and not marginalize them More specifically pedagogical and curricular questions are fleshed out through working in the area of curriculum studies depth psychology and the medical humanities These three disciplines have something in common autobiography But in the field of curriculum studies autobiographies pathographies of sickness are few and far between This book is meant to fill that gap in the educational literature This pathography is a study that explores the mysteries of suffering storytelling memory and poesis Compassion woundedness vulnerability testimony and authenticity are all issues Morris raises here Teachers scholars depth psychologists and medical educators might be particularly interested in this intensely felt narrative about what it is like for teachers to teach while suffering from chronic illness

Beyond Culture Edward T. Hall, 1976-12-07 From a renowned American anthropologist comes a proud celebration of human capacities For too long people have taken their own ways of life for granted ignoring the vast international cultural community that surrounds them Humankind must now embark on the difficult journey beyond culture to the discovery of a lost self a sense of perspective By holding up a mirror Hall permits us to see the awesome grip of unconscious culture With concrete examples ranging from James Joyce's *Finnegans Wake* to the mating habits of the bowerbird of New Guinea Hall shows us ourselves *Beyond Culture* is a book about self discovery it is a voyage we all must embark on if mankind is to survive Fascinating and emotionally challenging The book's graceful non technical style and the many illuminating real life illustrations make it a delight to read *Library Journal* Hall's book helps us to rethink our values We come away from it exhilarated Ashley Montagu In this penetrating analysis of the culturally determined yet unconscious attitudes that mold our thought feeling communication and behavior Hall makes explicit taken for granted linguistic patterns body rhythms personality dynamics educational goals Many of Hall's ideas are original and incisive and should reward careful readers with new ways of thinking about themselves and others *Publishers Weekly* A fascinating book which stands beside *The Hidden Dimension* and *The Silent Language* to prove Hall one of the most original anthropologists of our era Paul Bohannon
