The Social and Economic Impact of New Technology 1978-84: A Select Bibliography Leslie Grayson, 2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

The Urban and Regional Transformation of Britain John Goddard, Anthony Champion, 2018-05-30 Originally published in 1983 The Urban and Regional Transformation of Britain analyses economic and social changes recorded across the cities and regions of Britain since the Barlow Report The collection analyses the whole country at a more detailed scale than the ten Standard Regions for which most official statistics are produced Although there are important differences between the major regions of Britain many of the recent processes of change appear to have operated at a local level within rather than between regions The essays in this volume bring together change at the regional and local labour market scales and provides a comprehensive statement of urban and regional change seeking to highlight the new spatial priorities of the 1980s

Industrial Relations and New Technology Annette Davies, 2018-03-22 New technology arguably provided the greatest challenge to industrial relations since the formation of unions. The problems raised led to a whole range of responses from rejection of the new technology to acceptance of the change with management and workers making new and sometimes unheard of agreements. This book, originally published in 1986 and based on extensive original research, examines the changes in industrial relations which the new technology of the 1980s caused, analysing the implications for the workforce and the reactions of the management and trade unions to the challenges.

Information Technology and Industrial Policy Jill Hills, 2018-03-26 Published in 1984, this book reviews British industrial policy towards information technology within the context of the international trading system. It argues that the incoherence of British policy stems from the clash between its core liberal ideology and its centralised political system, and that unless Britain's traditional liberal ideology in trade policy was abandoned, within this market Britain was set to become a mere technological dependency of America. It discusses how the British government needed to develop effective non-tariff barriers in the form of industrial policy to minimise the political and economic costs of technological dependence.
