Siren City Robert Miklitsch,2011-02-01 Hailed for its dramatic expressionist visuals film noir is one of the most prominent genres in Hollywood cinema Yet despite the boom in sound studies the role of sonic effects and source music in classic American noir has not received the attention it deserves Siren City engagingly illustrates how sound tracks in 1940s film noir are often just as compelling as the genre's vaunted graphics Focusing on a wide range of celebrated and less well known films and offering an introductory discussion of film sound Robert Miklitsch mobilizes the notion of audiovisuality to investigate period sound technologies such as the radio and jukebox phonograph and Dictaphone popular American music such as hot black jazz and big numbers featuring iconic performers such as Lauren Bacall Veronica Lake and Rita Hayworth Siren City resonates with the sounds and source music of classic American noir gunshots and sirens swing riffs and canaries Along with the proverbial private eye and femme fatale these audiovisuals are central to the noir aesthetic and one important reason the genre reverberates with audiences around the world

Novacene James Lovelock,2020-11-10 A fascinating new study from the originator of the Gaia Theory who conceived the first wholly new way of looking at life on earth since Charles Darwin Independent One of the world's leading scientific thinkers offers a vision of a future epoch in which humans and artificial intelligence unite to save the Earth James Lovelock creator of the Gaia hypothesis and the greatest environmental thinker of our time has produced an astounding new theory about future of life on Earth He argues that the Anthropocene the age in which humans acquired planetary scale technologies is after 300 years coming to an end A new age the Novacene has already begun In the Novacene new beings will emerge from existing artificial intelligence systems They will think 10 000 times faster than we do and they will regard us as we now regard plants But this will not be the cruel violent machine takeover of the planet imagined by science fiction These hyperintelligent beings will be as dependent on the health of the planet as we are They will need the planetary cooling system of Gaia to defend them from the increasing heat of the sun as much as we do And Gaia depends on organic life We will be partners in this project It is crucial Lovelock argues that the intelligence of Earth survives and prospers He does not think there are intelligent aliens so we are the only beings capable of understanding the cosmos Perhaps he speculates the Novacene could even be the beginning of a process that will finally lead to intelligence suffusing the entire cosmos At the age of 100 James Lovelock has produced the most important and compelling work of his life

The Degenerate Muse Robin G. Schulze,2013-08-01 A tide of newfound prosperity swept through America as the nineteenth century turned into the twentieth Modernity had arrived Yet amid this climate of progress concerns over the perils of modernity and civilization began to creep into the national consciousness Stress overcrowding and immigration stoked fears of degeneration among the white middle and upper classes To correct course the Back to Nature movement was born By shedding the shackles of modernity and embracing the great outdoors Americans could keep fit and stave off a descent down the evolutionary ladder Drawing on a wide range of primary

and archival sources Robin Schulze examines how the return to nature altered the work of three modernist poets Harriet Monroe Ezra Pound and Marianne Moore Like other Americans of their day the trio heeded the widespread national call to head back to nature for the sake of the nation's health but they faced a difficult challenge Turning to nature as a means to combat the threat of degeneration in their literary and editorial work they needed to envision a form of poetry that would be a cure for degeneration rather than a cause The Degenerate Muse reveals the ways in which Monroe Pound and Moore struggled to create and publish poems that resisted degeneration by keeping faith with nature influenced ideas about what American poetry should be and do in the twentieth century A combination of environmental history and modernist studies The Degenerate Muse reveals that the American relationship to nature was a key issue of modernity and an integral part of literary modernism

Russian Absurd Daniil Kharms, 2017-02-15 A writer who defies categorization Daniil Kharms has come to be regarded as an essential artist of the modernist avant garde His writing which partakes of performance narrative poetry and visual elements was largely suppressed during his lifetime which ended in a psychiatric

ward where he starved to death during the siege of Leningrad His work which survived mostly in notebooks can now be seen as one of the pillars of absurdist literature most explicitly manifested in the 1920s and 30s Soviet Union by the OBERIU group which inherited the mantle of Russian futurism from such poets as Vladimir Mayakovsky and Velimir Khlebnikov This selection of prose and poetry provides the most comprehensive portrait of the writer in English translation to date revealing the arc of his career and including a particularly generous selection of his later work **Tom Brown's Schooldays** Thomas Hughes, 2008-06-12 Recounts the adventures of a young English boy at Rugby School in the early nineteenth century

War, Peace and World Orders in European History Anja V. Hartmann, Beatrice Heuser, 2002-11 This book explores a new way for students of International Relations to look at war peace and world orders throughout European history The contributors argue that the predominant realist paradigm that focuses on states and their self interest is not applicable to the largest period of European history because states either did not exist or were only in the making Instead they argue we have to look through the eyes of historical entities to see how they understood the world in which they lived The authors use a wide range of case studies focusing on subjects as diverse as the ancient Greek concept of honour and persecution under Communist regimes during the Cold War to explore the ways in which people in different societies at different times perceived and felt about war and peace in the world around them **Christmas at the Cross Keys.
