While the type and intensity of spills may vary responders who are called upon to meet these emergency situations need a consistent generic battle plan That s exactly what they ll find when they read John Hosty and Patricia Foster s practical new guide on chemical spill response They take readers from the planning stages through actual first response techniques to disposal and cleanup methods creating an airtight approach to spills that drastically reduces the possibility of error A Practical Guide to Chemical Spill Response begins by addressing pre incident activities including the development of a contingency plan and personnel training that enhances responders understanding of handling storage and disposal techniques Here the book acknowledges the many federal regulations including the Superfund Amendments and Reauthorization Act the Resource Conservation and Recovery Act and relevant Canadian standards the Transportation of Dangerous Goods Act Provincial Spill Legislation and the Workplace Hazardous Materials Information System to ensure that responders comply with these mandates The book emphasizes the need for a coherent approach to spills with coverage of the government and industry organizations that may be called upon to assist in an integrated response to specific situations And it underscores the need for good public relations stressing that personnel should be selected to deal with the media before incidents occur The guide moves on to equipment review in light of U S and Canadian statutes covering such areas as respiratory protection protective clothing and decontamination procedures It then details the specific characteristics of hazardous materials including flammability corrosivity toxicity reactivity and other incident risks Readers are then fully prepared for the ensuing coverage of actual response techniques to the full range of emergency spills among them ground spills water spills contamination of the air rail and truck spills and in plant spills Throughout illustrations clarify the response methods discussed Wide ranging enough to serve first responders working in the U S and Canada and detailed enough to point up differences in the regulatory mandates of the two countries A Practical Guide to Chemical Spill Response is a reference all spill control managers emergency response coordinators and their workers will want to have at hand

Dangerous Properties of Industrial Materials Report, 1990 **Combustibility of Plastics** F. Fire, 1991 Although many people may want to know how plastics bum the question of how plastics bum is only a part of a much larger question How does anything bum To examine the burning process of plastics in isolation does not make any sense and may lend credence to the idea that plastics are a special material with a special hazard An analogy would be to study how carbonless carbon paper bums and then to relate the burning characteristics and combustion products of this single type of paper to all

other types of paper and even to other wood products and to wood itself The testing of one type of product from a very large family of products that are physically similar and the relation of these test results to all other members of that family has no basis in the scientific method Those who do so are ignorant of science unless they have some hidden reason for wanting to ascribe certain properties to all related materials
