The Code Of The City Standards And The Hidden Language Of Place Making:

The Code of the City Eran Ben-Joseph, 2005 Traces the evolution of urban development codes and standards examines their effect on city planning and design and proposes alternatives that will encourage innovation Place-making and Urban Development Pier Carlo Palermo, Davide Ponzini, 2014-12-05 The regeneration of critical urban areas through the redesign of public space with the intense involvement of local communities seems to be the central focus of place making according to some widespread practices in academic and professional circles Recently new expertise maintains that place making could be an innovative and potentially autonomous field competing with more traditional disciplines like urban planning urban design architecture and others This book affirms that the question of making better places for people should be understood in a broader sense as a symptom of the non contingent limitations of the urban and spatial disciplines It maintains that research should not be oriented only towards new technical or merely formal solutions but rather towards the profound rethinking of disciplinary paradigms In the fields of urban planning urban design and policy making the challenge of place making provides scholars and practitioners a great opportunity for a much needed critical review Only the substantial reappraisal of long standing technical cultural institutional and social premises and perspectives can truly improve place making practices The pressing need for place making implies trespassing undue disciplinary boundaries and experimenting a place based approach that can innovate and integrate planning regulations strategic spatial visioning and urban development projects Moreover the place making challenge compels urban experts and policy makers to critically reflect upon the physical and social contexts of their interventions In this sense facing place making today is a way to renew the civic and social role of urban planning and urban design Cryptographic City Richard Coyne, 2023-05-16 Cryptography s essential role in the functioning of the city viewed against the backdrop of modern digital life Cryptography is not new to the city in fact it is essential to its functioning For as long as cities have existed communications have circulated often in full sight but with their messages hidden In Cryptographic City Richard Coyne explains how cryptography runs deep within the structure of the city He shows the extent to which cities are built on secrets their foundations now reinforced by digital encryption and cryptocurrency platforms He also uses cryptography as a lens through which to inspect smart cities and what they deliver Coyne sets his investigation into the cryptographic city against the backdrop of the technologies claims and challenges of the smart city Cryptography provides the means by which communications within and between citizens and devices are kept secure Coyne shows how all of the smart city innovations from smart toasters to public transportation networks are enabled by secure financial transactions data flows media streaming and communications made possible by encryption Without encryption he says communications between people and digital devices would be exposed for anyone to see hack and misdirect He explains the relevant technicalities of cryptography and describes the practical difference it makes to frame cities as cryptographic Interwoven throughout the book are autobiographical anecdotes insights from Coyne s teaching

practice and historical reports making it accessible to the general reader The Equitably Resilient City Zachary B. Lamb, Lawrence J. Vale, 2024-10-01 Twelve global planning and urban design interventions and what they reveal about equity centered urban resilience in the face of climate change Hillside favelas in South America imperiled by landslides Flood threatened mobile home parks on the American Gulf Coast Canal side settlements facing eviction in megacities in Southeast Asia Too often the places most vulnerable to climate change are the ones that are home to people with the fewest economic and political resources And while some leaders are starting to take action to reduce climate risks many early adaptation schemes have actually made preexisting inequalities worse In The Equitably Resilient City Zachary Lamb and Lawrence Vale ask how cities can adapt to climate change and other threats while also doing right by disadvantaged residents Lamb and Vale's model for the equitably resilient city includes four central domains 1 environmental safety and vitality 2 security from displacement 3 stable and dignified livelihoods and 4 enhanced self governance These principles represent the four LEGS Livelihoods Environment Governance and Security of equitable resilience To illustrate these core principles the book draws on 12 case studies from settlements facing a range of hazards across diverse geographies in the Global North and South from heat stress in Paris to drought in Bolivia to floods in Bangkok and New Orleans Offering concrete strategies in the form of planning community action and design interventions Lamb and Vale show that equitable urban resilience is not a pipe dream nor an abstract ethical proposition but an achievable reality grounded in struggle and solidarity **A Just Transition for All** J. Mijin Cha, 2024-12-03 Why the energy transition must be more than a fuel source replacement and how we can seize the opportunity of the transition to build a more just future for all To meet the greenhouse gas emissions reductions needed to stave off the worst impacts of climate change a transition away from fossil fuels must occur as quickly as possible But there are many unknowns when it comes to moving from theory to implementation for such a large scale energy transition not least regarding the social impact In A Just Transition for All J Mijin Cha a seasoned climate policy researcher who also works with advocacy organizations and unions offers a comprehensive analysis of how we can enact transformational changes that meaningfully improve people's lives Cha provides a novel governance framework called the Four Pillars formulated from original research to provide a way to move from theory to practice The Pillars framework includes a novel analysis that guides readers in understanding how to formulate effective just transition policies what makes them just or unjust and similarly what makes transition just and unjust The framework also combines theoretical discussions with original empirical research and provides insights into perceptions of just transition Grounded in real world perspectives that make the case for policies that advance the interests of all not just of fossil fuel workers Cha charts the path forward to an equitable and sustainable future that no longer depends on fossil fuels Changing Lanes Joseph F.C. Dimento, Cliff Ellis, 2014-08-29 The story of the evolution of the urban freeway the competing visions that informed it and the emerging alternatives for more sustainable urban transportation Urban freeways often cut through the heart of a city destroying

neighborhoods displacing residents and reconfiguring street maps These massive infrastructure projects costing billions of dollars in transportation funds have been shaped for the last half century by the ideas of highway engineers urban planners landscape architects and architects with highway engineers playing the leading role In *Changing Lanes* Joseph DiMento and Cliff Ellis describe the evolution of the urban freeway in the United States from its rural parkway precursors through the construction of the interstate highway system to emerging alternatives for more sustainable urban transportation DiMento and Ellis describe controversies that arose over urban freeway construction focusing on three cases Syracuse which early on embraced freeways through its center Los Angeles which rejected some routes and then built I 105 the most expensive urban road of its time and Memphis which blocked the construction of I 40 through its core Finally they consider the emerging urban highway removal movement and other innovative efforts by cities to re envision urban transportation

Global Cities Robert Gottlieb, Simon Ng, 2018-08-28 How Los Angeles Hong Kong and China deal with such urban environmental issues as ports goods movement air pollution water quality transportation and public space Over the past four decades Los Angeles Hong Kong and key urban regions of China have emerged as global cities in financial political cultural environmental and demographic terms In this book Robert Gottlieb and Simon Ng trace the global emergence of these urban areas and compare their responses to a set of six urban environmental issues These cities have different patterns of development Los Angeles has been the quintessential horizontal city the capital of sprawl Hong Kong is dense and vertical China's new megacities in the Pearl River Delta created by an explosion in industrial development and a vast migration from rural to urban areas combine the vertical and the horizontal All three have experienced major environmental changes in a relatively short period of time Gottlieb and Ng document how each has dealt with challenges posed by ports and the movement of goods air pollution Los Angeles Hong Kong and urban China are all notorious for their hazardous air quality water supply all three places are dependent on massive transfers of water and water quality the food system from seed to table transportation and public and private space Finally they discuss the possibility of change brought about by policy initiatives and social movements

Bridging Silos Katrina Smith Korfmacher, 2019-08-27 How communities can collaborate across systems and sectors to address environmental health disparities with case studies from Rochester New York Duluth Minnesota and Southern California Low income and marginalized urban communities often suffer disproportionate exposure to environmental hazards leaving residents vulnerable to associated health problems Community groups academics environmental justice advocates government agencies and others have worked to address these issues building coalitions at the local level to change the policies and systems that create environmental health inequities In *Bridging Silos* Katrina Smith Korfmacher examines ways that communities can collaborate across systems and sectors to address environmental health disparities with in depth studies of three efforts to address long standing environmental health issues childhood lead poisoning in Rochester New York unhealthy built environments in Duluth Minnesota and pollution related to commercial

ports and international trade in Southern California All three efforts were locally initiated driven by local stakeholders and each addressed issues long known to the community by reframing an old problem in a new way These local efforts leveraged resources to impact community change by focusing on inequities in environmental health bringing diverse kinds of knowledge to bear and forging new connections among existing community academic and government groups Korfmacher explains how the once integrated environmental and public health management systems had become separated into self contained silos and compares current efforts to bridge these separations to the development of ecosystem management in the 1990s Community groups government agencies academic institutions and private institutions each have a role to play but collaborating effectively requires stakeholders to appreciate their partners diverse incentives capacities and constraints

Hybrid Nature Daniel Schneider, 2011 A history of the industrial ecosystem that focuses on the biological sewage treatment plant as an early example Biological sewage treatment like electricity power generation telephones and mass transit has been a key technology and a major part of the urban infrastructure since the late nineteenth century But sewage treatment plants are not only a ubiquitous component of the modern city they are also ecosystems a hybrid variety that incorporates elements of both nature and industry and embodies multiple contradictions In *Hybrid Nature* Daniel Schneider offers an environmental history of the biological sewage treatment plant in the United States and England viewing it as an early and influential example of an industrial ecosystem The sewage treatment plant relies on microorganisms and other plants and animals but differs from a natural ecosystem in the extent of human intervention in its creation and management Schneider explores the relationship between society and nature in the industrial ecosystem and the contradictions that define it the naturalization of industry versus the industrialization of nature the public interest versus private patented technology engineers versus bacterial and human labor and purification versus profits in the marketing of sewage fertilizer Schneider also describes biotechnology's direct connections to the history of sewage treatment and how genetic engineering is extending the reaches of the industrial ecosystem to such natural ecosystems as oceans rivers and forests In a conclusion that shows how industrial ecosystems continue to evolve Schneider discusses John Todd's *Living Machine* a natural purification method of sewage treatment as the embodiment of the contradictions of the industrial ecosystem

Flint Fights Back Benjamin J. Pauli, 2019-05-07 An account of the Flint water crisis shows that Flint's struggle for safe and affordable water is part of a broader struggle for democracy When Flint Michigan changed its source of municipal water from Lake Huron to the Flint River Flint residents were repeatedly assured that the water was of the highest quality At the switchover ceremony the mayor and other officials performed a celebratory toast declaring Here's to Flint and downing glasses of freshly treated water But as we now know the water coming out of residents taps harbored a variety of contaminants including high levels of lead In *Flint Fights Back* Benjamin Pauli examines the water crisis and the political activism that it inspired arguing that Flint's struggle for safe and affordable water was part of a broader struggle for democracy Pauli

connects Flint's water activism with the ongoing movement protesting the state of Michigan's policy of replacing elected officials in financially troubled cities like Flint and Detroit with appointed emergency managers Pauli distinguishes the political narrative of the water crisis from the historical and technical narratives showing that Flint activists' emphasis on democracy helped them to overcome some of the limitations of standard environmental justice frameworks. He discusses the pro-democracy anti-emergency manager movement and traces the rise of the water warriors, describes the uncompromising activist culture that developed out of the experience of being dismissed and disparaged by officials, and examines the interplay of activism and scientific expertise. Finally, he explores efforts by activists to expand the struggle for water justice and to organize newly mobilized residents into a movement for a radically democratic Flint.

Sewer of Progress Cindy McCulligh, 2023-07-25 A creative and comprehensive exploration of the institutional forces undermining the management of environments critical to public health. For almost two decades, the citizens of Western Mexico have called for a cleanup of the Santiago River, a water source so polluted it emanates an overwhelming acidic stench. Toxic clouds of foam lift off the river in a strong wind. In *Sewer of Progress*, Cindy McCulligh examines why industrial dumping continues in the Santiago despite the corporate embrace of social responsibility and regulatory frameworks intended to mitigate environmental damage. The fault she finds lies in a disingenuous discourse of progress and development that privileges capitalist growth over the health and well-being of ecosystems. Rooted in research on institutional behavior and corporate business practices, *Sewer of Progress* exposes a type of regulatory greenwashing that allows authorities to deflect accusations of environmental dumping while regulated dumping continues in an environment of legal certainty. For transnational corporations, this type of simulation allows companies to take advantage of double standards in environmental regulations while presenting themselves as socially responsible and green global actors. Through this inversion, the Santiago and other rivers in Mexico have become sewers for urban and industrial waste. Institutionalized corruption, a concept McCulligh introduces in the book, is the main culprit: a system that permits and normalizes environmental degradation, specifically in the creation and enforcement of a regulatory framework for wastewater discharge that prioritizes private interests over the common good. Through a research paradigm based in institutional ethnography and political ecology, *Sewer of Progress* provides a critical in-depth look at the power relations subverting the role of the state in environmental regulation and the maintenance of public health.

Shifting Gears Susan Handy, 2023-10-31 An expertly woven history and critique of the ideas shaping transportation in the United States. Excruciating traffic jams. Struggling transit agencies. An epidemic of pedestrian fatalities. It is clear that transportation is not working in the United States, and that we need to rethink our approach. In *Shifting Gears*, Susan Handy provides an in-depth history of the ideas embedded in American transportation policy and the emergence of new ways of thinking that could give us better transportation options. Weaving in bits of her own personal narrative, Handy gives readers a deeper and clearer understanding of our transportation system and the roots of its successes and failures. Handy covers the myriad costs of car

ownership the futility of expanding highways and the misplaced faith in technological innovation She offers new ideas and strategies that can improve the health of our car centric transportation system most crucially the idea that communities across the country must create an array of choices for daily travel Shifting Gears asserts that a diverse transportation ecosystem is essential for creating more just sustainable communities but getting there will take a dramatic shift in how we think about transportation

Remaking the American Dream Vinit Mukhija, 2022-12-20 The redefinition of the single family house the urban landscape and the American Dream Sitting squarely at the center of the American Dream the detached single family home has long been the basic building block of most US cities In Remaking the American Dream Vinit Mukhija considers how this is changing in both the American psyche and the urban landscape In defiance of long held norms and standards single family housing is slowly but significantly transforming through incremental additions of second and third units Drawing on empirical evidence of informal and formal changes Remaking the American Dream documents homeowners quiet unpermitted modifications conversions and workarounds as well as gradual institutional alterations to once rigid local land use regulations Mukhija s primary case study is Los Angeles and the role played by the State of California findings he contrasts with the experience of other cities including Santa Cruz Seattle Portland Minneapolis and Vancouver In each instance he shows how and asks why homeowners are adapting their homes and governments are changing the rules that regulate single family housing to allow for accessory dwelling units ADUs or second units Key to Mukhija s research is the question of why the idea of single family living is changing and what this means for the future of US cities The answer this book suggests heralds nothing less than a redefinition of American urbanism and the American Dream

Resigned Activism, revised edition Anna Lora-Wainwright, 2021-03-09 An examination of the daily grind of living with pollution in rural China and of the varying forms of activism that develop in response Residents of rapidly industrializing rural areas in China live with pollution every day Villagers drink obviously tainted water and breathe visibly dirty air afflicted by a variety of ailments from arthritis to nosebleeds that they ascribe to the effects of industrial pollution In Resigned Activism Anna Lora Wainwright explores the daily grind of living with pollution in rural China and the varying forms of activism that develop in response This revised edition offers expanded acknowledgment of the contributions of Lora Wainwright s collaborators in China Lora Wainwright finds that claims of health or environmental damage are politically sensitive and that efforts to seek redress are frustrated by limited access to scientific evidence growing socioeconomic inequalities and complex local realities Villagers feeling powerless often come to accept pollution as part of the environment their activism is tempered by their resignation Drawing on fieldwork done with teams of collaborators Lora Wainwright offers three case studies of resigned activism in rural China examining the experiences of villagers who live with the effects of phosphorous mining and fertilizer production lead and zinc mining and electronic waste processing The book also includes extended summaries of the in depth research carried out by Ajiang Chen and his team in some of China s cancer villages

village sized clusters of high cancer incidence These cases make clear the staggering human costs of development and the deeply uneven distribution of costs and benefits that underlie China s economic power Transit Life David

Bissell,2018-03-23 An exploration of the ways that everyday life in the city is defined by commuting We spend much of our lives in transit to and from work Although we might dismiss our daily commute as a wearying slog we rarely stop to think about the significance of these daily journeys In Transit Life David Bissell explores how everyday life in cities is increasingly defined by commuting Examining the overlooked events and encounters of the commute Bissell shows that the material experiences of our daily journeys are transforming life in our cities The commute is a time where some of the most pressing tensions of contemporary life play out striking at the heart of such issues as our work life balance our relationships with others our sense of place and our understanding of who we are Drawing on in depth fieldwork with commuters journalists transit advocates policymakers and others in Sydney Australia Transit Life takes a holistic perspective to change how we think about commuting Rather than arguing that transport infrastructure investment alone can solve our commuting problems Bissell explores the more subtle but powerful forms of social change that commuting creates He examines the complex politics of urban mobility through multiple dimensions including the competencies that commuters develop over time commuting dispositions and the social life of the commute the multiple temporalities of commuting the experience of commuting spaces from footpath to on ramp both physical and digital the voices of commuting from private rants to drive time radio and the interplay of materialities ideas advocates and organizations in commuting infrastructures **Installing**

Automobility Govind Gopakumar,2020-04-07 An examination of the process of prioritizing private motorized transportation in Bengaluru a rapidly growing megacity of the Global South Automobiles and their associated infrastructures deeply embedded in Western cities have become a rapidly growing presence in the mega cities of the Global South Streets once crowded with pedestrians pushcarts vendors and bicyclists are now choked with motor vehicles many of them private automobiles In this book Govind Gopakumar examines this shift analyzing the phenomenon of automobility in Bengaluru formerly known as Bangalore a rapidly growing city of about ten million people in southern India He finds that the advent of automobility in Bengaluru has privileged the mobility needs of the elite while marginalizing those of the rest of the population Gopakumar connects Bengaluru s burgeoning automobility to the city s history and to the spatial technological and social interventions of a variety of urban actors Automobility becomes a juggernaut threatening to reorder the city to enhance automotive travel He discusses the evolution of congestion and urban change in Bengaluru the regimes of congestion that emerge to address the issue an infrastructurescape that shapes the mobile behavior of all residents but is largely governed by the privileged and the enfranchisement of an automotive citizenship and the disenfranchisement of non automobile using publics Gopakumar also finds that automobility in Bengaluru faces ongoing challenges from such diverse sources as waste flows popular religiosity and political leadership These challenges however introduce messiness without

upsetting automobility He therefore calls for efforts to displace automobility that are grounded in reordering the mobility regime relandscaping the city and its infrastructures and reclaiming streets for other uses **Fighting King Coal** Shannon Elizabeth Bell,2016-03-25 Contextualizing the Case Central Appalachia Micro Level Processes and Social Movement Participation The Depletion of Social Capital in Coalfield Communities Identity and Environmental Justice Movement Participation Cognitive Liberation and Coal Industry Ideology Cognitive Liberation and Hidden Destruction in Central Appalachia Photovoice in Five Coalfield Communities Becoming and Un Becoming an Activist **Blue and Green** Scott L. Cummings,2018-11-13 How an alliance of the labor and environmental movements used law as a tool to clean up the trucking industry at the nation s largest port In Blue and Green Scott Cummings examines a campaign by the labor and environmental movements to transform trucking at America s largest port in Los Angeles Tracing the history of struggle in an industry at the epicenter of the global supply chain Cummings shows how an unprecedented blue green alliance mobilized to improve working conditions for low income drivers and air quality in nearby communities The campaign for clean trucks Cummings argues teaches much about how social movements can use law to challenge inequality in a global era Cummings shows how federal deregulation created interrelated economic and environmental problems at the port and how the campaign fought back by mobilizing law at the local level He documents three critical stages initial success in passing landmark legislation requiring port trucking companies to convert trucks from dirty to clean and drivers from contractors to employees with full labor rights campaign decline after industry litigation blocked employee conversion and campaign resurgence through an innovative legal approach to driver misclassification that realized a central labor movement goal unionizing port truckers Appraising the campaign Cummings analyzes the tradeoffs of using alternative legal frameworks to promote labor organizing and explores lessons for building movements to regulate low wage work in the gig economy He shows how law can bind coalitions together and split them apart and concludes that the fight for legal reform never ends but rather takes different turns on the long road to justice *Just Housing* Casey J. Dawkins,2021-08-31 A new conception of housing justice grounded in moral principles that appeal to the home s special connection to American life In response to the twin crises of homelessness and housing insecurity an emerging housing justice coalition argues that America s apparent inability to provide decent housing for all is a moral failing Yet if housing is a right as housing justice advocates contend what is the content of that right In a wide ranging examination of these issues Casey Dawkins chronicles the concept of housing justice investigates the moral foundations of the US housing reform tradition and proposes a new conception of housing justice that is grounded in moral principles that appeal to the home s special connection to American life Dawkins examines the conceptual foundations of justice and explores the social meaning of the American home He chronicles the evolution of American housing reform showing how housing policy was pieced together from layers of housing and land use policies enacted over time and investigates the endurance from the founding of the republic through the postwar era of the owned

single family home as the embodiment of national values Finally Dawkins considers housing justice drawing on elements of liberalism republicanism progressivism and pragmatism to defend a right based conception of housing justice grounded in the ideal of civil equality Arguing that any defense of private property must appeal to the interests of those whose tenure is made insecure by the institution of private property he proposes a secure tenure property regime and a negative housing tax that would fund a guaranteed housing allowance
