Biotechnology Organizations in Action J. Norus, 2002-03-06 This volume analyzes the dynamics and interactive processes among the players individuals institutions and organizations firms that have constituted and legitimized the development of the biotechnology industries The unit of analysis is small entrepreneurial firms developing biotechnological products and processes What types of strategies are small entrepreneurs pursuing in order to create markets for their new products and processes and how have specific strategies emerged The primary interest is the network process through which the technological field and the development of institutions and routines evolve and co evolve The theoretical contribution of the book is its focus on the development of the concept of networks From being regarded as a relative static concept the book transforms the concept into a dynamic concept of networking The dynamic view on the creation and development of new technologies through network formations is linked to the concept of strategy that is used throughout the book Hence the strategies are developed along with the creation of technological knowledge and it is hoped that the diffusion of this specific knowledge will bring new actors into the technological arena or community This book will be useful to the academic community those studying the formation of networks strategic management organizational behavior and management of technology as well as business observers with a specific interest in the evolution of the biotechnology industry

Organizations and the Bioeconomy Alexander Styhre, 2012 The advancement of the life sciences and the technosciences has enhanced the longevity of citizens in the Western world and half of the generation born in the first decade of the new millennium is now expected to live to the age of one hundred years In a society with such longevity and affluence consumption of health related goods and services such as pharmaceuticals and scanning procedures may be seen as a sustainable source of income for the industries that promote it Though the healthcare sector has traditionally been organized in the public sector in Europe and in the private sector in the US the recent advancement of new therapies and direct to consumer marketing have opened up new streams of consumption and revenue for health care goods and services around the globe This book examines the so called bioeconomy as a new economic and commercial field that emphasizes the management of individual life including the regulation and control of weight and food consumption and other issues pertaining to individual well being In addition the bioeconomy includes a variety of practices based on commercial interests such as organ donations reproductive medicine and technologies and what has been referred to as the tissue economy the various forms of trade with human tissues Author Alexander Styhre provides a thorough introduction to the bioeconomy

exploring this new and unique intersection of the life sciences and the technosciences with more traditional consumer markets

Reproductive Medicine and the Life Sciences in the Contemporary Economy Alexander Styhre, 2016-04-08 In *Reproductive Medicine and the Life Sciences in the Contemporary Economy* Alexander Styhre and Rebecka Arman illuminate issues that have given rise to terms such as the bioeconomy and the baby business The life sciences play an increasing role in providing services and commodities consumed by businesses and the public Based on an in depth study of clinics offering assisted fertilization in Sweden this book is the first to examine the commercialization and commodification of know how derived from the life sciences from the point of view of organization theory In the field of reproductive medicine there has been significant growth of both public and private clinical work Clinics are places where individual interests and concerns and social and institutional arrangements intersect With a front office where patients encounter various professional groups and a back office comprising the laboratories wherein human reproductive materials are handled and stored they are more than just places in which medicine is applied in a clinical setting Clinicians in this field actively influence policy making and the regulatory frameworks that monitor and set the boundaries for their work These are places where social and cultural interests and concerns are translated into policies and practice The clinics are open social systems responding to and influencing discussions This book combines organization theory sociological theory gender theory science and technology studies and philosophy It emphasises the critical importance of a sociomaterial perspective on organization stressing how material and social resources are always of necessity folded into each other in day to day

organizing New Frontiers in Entrepreneurship David B. Audretsch, Giovanni Battista Dagnino, Rosario Faraci, Robert E. Hoskisson, 2009-11-24 The volume presents and discusses a variety of recent developments and achievements in research on entrepreneurship It focuses on the strategic aspects of entrepreneurship and new firm creation and brings together the insights of an array of experts **Professionals Making Judgments** A. Styhre, 2013-10-24 Professionals Making Judgments examines the role of judgment in professional work The book makes the argument that too many studies of professionalism put emphasis on rational decision making The more theoretical parts of the book are complemented by empirical studies of three distinct domains of professional practice *Venturing into the Bioeconomy* A. Styhre, Mats Sundgren, 2011-06-30 This book reports empirical material from three case studies in the pharmaceutical industry the biotechnology industry and the domain of academic research New technoscientific frameworks that have not yet translated into new therapies in the future may play a more central role in the late modern society *Visual Culture in Organizations* Alexander Styhre, 2010-06-10 Vision and visuality are two concepts widely discussed and debated in philosophy and social science literature Some authors even suggest that the entire Western intellectual tradition is strongly shaped by the paradigm of vision the inspection and analysis of specimens collected from social reality are regarded as the only legitimate source of truth However in organizations a variety of visual practices are employed in for instance science based innovation in for instance the pharmaceutical industry and in architect work Such visual practices include the use of various technoscientific machinery and tools to more mundane uses of full scale models and photos in architect work In comparison to the various linguistic perspectives on organizations vision and visuality remain surprisingly little theorized and examined in the organization literature Visual Culture in Organizations offers an introduction to the literature on vision and visuality that is relevant to organizational theory comparing and contrasting it to the well documented area of linguistic theory in organizations proposes a theoretical framework for visual culture in organizations and provides empirical illustrations to the theoretical framework The book shows that visual practices are a central procedure in the day to day routines of organizations and are long overdue for close examination **The Biotech Age : The Business of Biotech and How to Profit From It** Richard L. Oliver, 2003-03-24 A look at the forefront of an industry revolution Ive been deep inside the biotech industry since its infancy This book provides fresh insights about how it started what drives it and most importantly where its going Scott W Morrison partner Ernst Young LL Richard W Oliver predicted the onset of a new era with The Coming Biotech Age Now that age is here and companies are reaping the benefits of this incredible new revolution As biotech companies become the new economic engines of growth and innovation businesses must have access to the latest developments of this area of research In a special revised edition now titled The Biotech Age Oliver has created the first practical guide to this fascinating realm of scientific development With updated information on the latest research examples of biotech breakthroughs and a close examination of current biotech issues such as cloning and stem cell research The Biotech Age presents an accessible
