The Coming Revolution In Agriculture:

The Coming Revolution in Agriculture Harold Willis, 1985 *The Coming Revolution* Ben Reynolds, 2018-06-29 A technological revolution is driving capitalism toward crisis and collapse Can our society evolve in time to rescue the future Radical advances in automation robotics and computer technology have thrown millions out of work and will only continue to do so in the years to come At the same time cheap individually accessible machines will wrestle for primacy with both gleaming highly automated factories and sweatshops alike ultimately eroding the dominance of industrial production Economic growth is slowing down and it is not going to speed up again The pressures fueling today's global unrest will not go away and are only going to get worse as wages stagnate in many countries solid employment becomes harder to find and cuts to social benefits continue Competing radical and reactionary ideologies will clash as political consensus crumbles and the world's peoples search for answers to these challenges In its opening decades the 21st will be a century of war and revolution By the end of the 21st century capitalism will be consigned to the history books Despite the seeming darkness of our era our future is filled with incredible possibility If working people join together we can create a world of freedom beauty and abundance where poverty and tyranny are merely distant memories for our grandchildren This is the story of *The Coming Revolution*

The War against the Commons Ian Angus, 2023-05-02 A unique historical account of poor peoples self defence strategies in the face of the plunder of their lands and labor For five centuries the development of capitalism has been inextricably connected to the expropriation of working people from the land they depended on for subsistence Through ruling class assaults known as enclosures or clearances shared common land became privately owned capital and peasant farmers became propertyless laborers who could only survive by working for the owners of land or capital As Ian Angus documents in *The War Against the Commons* mass opposition to dispossession has never ceased His dramatic account provides new insights into an opposition that ranged from stubborn non compliance to open rebellion including eyewitness accounts of campaigns in which thousands of protestors tore down fences and restored common access to pastures and forests Such movements he shows led to the Diggers call for a new society based on shared ownership and use of the land an appeal that was more sophisticated and radical than anything else written before the 1800s Contrary to many accounts that treat the reorganization of agriculture as a purely domestic matter Angus shows that there were close connections between the enclosures in Britain and imperial expansion The consolidation of some of the largest estates in England and Scotland was directly financed by the forced labor of African slaves and the colonial plunder of India This unique historical account of ruling class robbery and poor peoples resistance offers answers to key questions about the history of capitalism Was enclosure a necessary evil that enabled economic growth What role did deliberate promotion of hunger play in the creation of the working class How did Marx and Engels view the separation of workers from the land and how does resistance to enclosure continue in the 21st century
