Abstract

Comprehensibility has risen to the forefront of second language (L2) speech research. To date, research has focused on identifying the linguistic, behavioral, and affective correlates of comprehensibility, how it develops over time, and how it evolves over the course of an interaction. In all these approaches, comprehensibility is the dependent measure, but comprehensibility can also be construed as a predictor of other communicative outcomes. In this study, we examined the extent to which comprehensibility predicted interlocutors' overall impression of their interaction. We analyzed data from 90 paired interactions encompassing three communicative tasks. Interactive partners were L2 English speakers who did not share the same native language. After each task, they provided self- and partner-ratings of comprehensibility, collaboration, and anxiety, and at the end of the interaction, they provided exit ratings of their overall experience in the interaction, communication success, and comfort interacting with their partner. We fit mixed-effects models to the self- and partner-ratings to investigate if those ratings changed over time, and we used the results to derive model-estimated predictors to be incorporated into regression models of the exit ratings. Only the self-ratings, including self-comprehensibility, were significantly associated with the exit ratings, suggesting a speaker-centric view of L2 interaction.

Comprehensibility refers to a listener's subjective experience of difficulty when processing second language (L2) speech. Although comprehensibility is often aligned with intelligibility, or actual understanding, the two are distinct, in that intelligible speech often shows varying levels of comprehensibility depending on the amount of effort that the listener must invest (Munro & Derwing, 1995; Nagle & Huensch, 2020). Pronunciation experts have long advocated for an intelligibility- and comprehensibility-focused approach to L2 learning and teaching

The Communicative Experience:

The Communicative Experience Lawrence William Rosenfield, Laurie Schultz Hayes, Thomas S. Frentz, 1976 **The Experience of Human Communication** Frank J. Macke, 2014-12-24 This book deals with matters of embodiment and meaning in other words the essential components of what Continental thought since Heidegger has come to consider as communication A critical theme of this book concerns the basic tenet that consciousness of one's Self and one's body is only possible through human relationship This is of course the phenomenological concept of intersubjectivity But rather than let this concept remain an abstraction by discussing it as merely a function of language and signs this work attempts to explicate it empirically That is it discusses the manner in which from infancy to childhood and adolescence and the dawning of our sexual identities through physical maturity and old age we come to experience the ecstasy of what Merleau-Ponty has so poetically termed flesh It is rarely clear what someone means when she or he uses the word communication An important objective of this book is thus to advance understanding of what communication is In academic discourse communication has come to be understood in a number of contexts some conflicting and overlapping as a process a strategy an event an ethic a mode or instance of information or even a technology In virtually all of these discussions the concept of communication is discussed as though the term's meaning is well known to the reader When communication is described as a process the meaning of the term is held at an operational level that is in the exchange of information between one person and another what must unambiguously be inferred is that communication is taking place In this context information exchange and communication become functionally synonymous But as a matter of embodied human psychological experience there is a world of difference between them As such this book attempts to fully consider the question of how we experience the event of human communication The author offers a pioneering study that advances the *raison d'être* of the emergent field of communicology while at the same time offering scholars of the human sciences a new way of thinking about embodiment and relational experience Reimagining Communication: Experience Michael Filimowicz, Veronika Tzankova, 2020-04-30 Reimagining Communication: Experience explores the embodied and experiential aspects of media forms across a variety of contemporary platforms uses content variations audiences and professional roles A diverse body of contributions offer a broad range of perspectives on memory embodiment time and more The volume is organized to reflect a pedagogical approach of carefully laddered and sequenced topics which supports meaningful project-based learning in addition to a course's traditional writing requirements As the field of Communication Studies has been continuously growing and reaching new horizons this volume presents a survey of the foundational theoretical and methodological approaches that continue to shape the discipline synthesizing the complex relationship of communication to forms of experience in a uniquely accessible and engaging way This is an essential introductory text for advanced undergraduate and graduate students and scholars of communication media and interactive technologies with an interdisciplinary focus and an emphasis on the integration of new

Intercultural Pragmatics Istvan Kecskes, 2013-11-05 Intercultural Pragmatics studies how language systems are used in social encounters between speakers who have different first languages and cultures yet communicate in a common language The field first emerged in the early 21st century joining two seemingly antagonistic approaches to pragmatics research the cognitive philosophical approach which considers intention as an a priori mental state of the speaker and the sociocultural interactional approach which considers it as a post factum construct created by both speaker and hearer through conversation Istvan Kecskes an early proponent of intercultural pragmatics was among the first to propose merging the two to form the socio cognitive approach now core to the field In Intercultural Pragmatics the first book on the subject Kecskes establishes the foundations of the field boldly combining the pragmatic view of cooperation with the cognitive view of egocentrism in order to incorporate emerging features of communication He argues that people cooperate by generating and formulating intention that is relevant to the given actual situational context At the same time however because of their egocentrism they activate the most salient information to their attention in the construction and comprehension of utterances Within this approach interlocutors are considered as social beings searching for meaning with individual minds embedded in a socio cultural collectivity and intention is a cooperation directed practice that is governed by relevance which depends on actual situational experience Intercultural pragmatics is a rapidly growing field and the only subfield of pragmatics to incorporate features of intercultural interaction into mainstream

pragmatics This volume offers both a valuable synthesis of current research and a new way to think about pragmatics

Public Health Communication Challenges to Minority and Indigenous Communities Aiseng, Kealeboga, Fadipe, Israel A., 2024-04-30 Language has emerged as both a powerful bridge and a formidable barrier in the realm of public health communication. The ongoing COVID-19 pandemic has highlighted a significant challenge faced by minority and indigenous communities, particularly in regions of Sub-Saharan Africa. It's a challenge deeply rooted in the historical use of colonial languages: English, French, and Spanish to disseminate critical health information. For many, this has translated into a linguistic exclusion, depriving them of access to essential resources and a voice in matters of national interest. This issue transcends mere communication; it touches upon the fundamental rights of individuals to participate in their own healthcare decisions and influences their sense of belonging and citizenship. *Public Health Communication Challenges to Minority and Indigenous Communities* proposes a solution with a transformative potential. This groundbreaking edited volume invites scholars from
