

# Argument

1<sup>st</sup> way:

Constructing the truth table of  $p$ ,  $q$ , and  $p \rightarrow q$ , and analyzing case by case. :

$$\boxed{\begin{array}{c} p \rightarrow q \\ p \\ \hline \therefore q \end{array}}$$

$p$	$q$	$p \rightarrow q$	
T	T	T	<b>Line 1</b>
T	F	F	<b>Line 2</b>
F	T	T	<b>Line 3</b>
F	F	T	<b>Line 4</b>

- If each case “If all hypotheses are true, then the conclusion is true” applies, then the argument is valid.
- Let us check whether if hypotheses  $p \rightarrow q$  and  $p$  are true, then the conclusion  $q$  is also true.
- See line 1:  $p \rightarrow q$  and  $p$  are true at the same time, and  $q$  in line 1 is also true.
- The argument is valid.

**A Diet of Austerity** Elaine Graham-Leigh, 2015-04-24  
Received wisdom is increasingly that we all have to eat

less to save the planet but received wisdom is wrong A Diet of Austerity argues that just as the poor are blamed for the economic crisis Malthusian conceptions about food and ecology are being used to hold the working class responsible for climate change and global hunger Challenging existing dogmas about overconsumption and personal responsibility it shows that what we need to stop climate change is system change *Science for Segregation* John P. Jackson, 2005-08 With the fiftieth anniversary of the landmark Supreme Court decision *Brown v Board of Education* now upon us many have begun to reflect upon how the case altered the course of civil rights and education in America *Perspectives on Bias in Mental Testing* Cecil Reynolds, 2013-11-11 The cultural test bias hypothesis is one of the most important scientific questions facing psychology today Briefly the cultural test bias hypothesis contends that all observed group differences in mental test scores are due to a built in cultural bias of the tests themselves that is group score differences are an artifact of current psychometric methodology If the cultural test bias hypothesis is ultimately shown to be correct then the 100 years or so of psychological research on human differences or differential psychology the scientific discipline underlying all applied areas of human psychology including clinical counseling school and industrial psychology must be reexamined and perhaps dismissed as confounded contaminated or otherwise artifactual In order to continue its existence as a scientific discipline psychology must confront the cultural test bias hypothesis from the solid foundations of data and theory and must not allow the resolution of this issue to occur solely within and to be determined by the political Zeitgeist of the times or any singular work no matter how comprehensive In his recent volume *Bias in Mental Testing* New York Free Press 1980 Arthur Jensen provided a thorough review of most of the empirical research relevant to the evaluation of cultural bias in psychological and educational tests that was available at the time that his book was prepared Nevertheless Jensen presented only one perspective on those issues in a volume intended not only for the scientific community but for intelligent laypeople as well

The Science and Politics of Racial Research William H. Tucker, 1994 Unlike other critiques of the scientific literature on racial

difference The Science and Politics of Racial Research argues that there has been no scientific purpose or value to the study of innate differences in ability between groups William Tucker shows how for more than a century scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences Tucker structures his work chronologically with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda He begins with the use of science to support slavery in the mid nineteenth century and ends with the effects of Jensenism in the 1970s Highlights include one chapter describing a little known but concerted attempt by a group of scientists to overturn the Brown v Board of Education decision on the basis of expert testimony about racial differences and another that presents a review of the eugenics movement in the twentieth century The author also considers how to balance the rights and responsibilities of scientists concluding that one generally neglected method is to strengthen the rights of research subjects
