

outer edge later on. At the front edges, lower end of the scroll pieces, the piece of wood nailed across is of deal 24 in. by 3 in. by $\frac{1}{2}$ in.

The bottom also is of deal boards, jointed together. It is in two parts, meeting at the centre on the bottom rail, and is fixed with fine wire nails. It must be flush with the outer surface of the rails. The bun feet are of birch turned to 3 in. diameter, and are fixed with screws. It is then ready for the upholstery work (see Fig. 136).

Webbing and Springing.—The seat frame is first webbed five in the length on the upper side and ten across, and is fixed, on the inner rails by a piece of doubled web tacked across the long webs. The scroll head is webbed four across (see Fig. 137). It is next covered with canvas, and the seventeen springs may be placed in position, as in Fig. 138. They are then stitched to the webbing as shown in Figs. 139 and 140.

The lengths of wood previously mentioned can now be nailed and the springs lashed, as in Fig. 141.

Canvasing the Springs.—The springs are next covered with strong canvas. The part that first gives way in the spring canvas is just at the edge of the wooden frame. Therefore, a few inches of canvas is allowed to lap back to be caught in the stitching of the springs, thus giving a double thickness (see Fig. 142).

Stuffing.—It is then string-looped for stuffing 4 lb. of wood fibre round the edges, 8 lb. of white
