The Psychology of Perspective and Renaissance Art Michael Kubovy, 1986 Michael Kubovy an experimental psychologist recounts the lively history of the invention of perspective in the fifteenth century and shows how as soon as the invention spread it was used to achieve subtle and fascinating aesthetic effects A clear presentation of the fundamental concepts of perspective and the reasons for its effectiveness drawing on the latest laboratory research on how people perceive leads into the development of a new theory to explain why Renaissance artists such as Leonardo and Mantegna used perspective in unorthodox ways which have puzzled art scholars This theory illuminates the author s broader consideration of the evolution of art the book proposes a resolution of the debate between those who believe that the invention discovery of perspective is a stage in the steady progress of art and those who believe that perspective is merely a conventional and arbitrary system for the representation of space

Appreciating the Art of Television Ted Nannicelli, 2016-09-13 Contemporary television has been marked by such exceptional programming that it is now common to hear claims that TV has finally become an art In *Appreciating the Art of Television* Nannicelli contends that televisual art is not a recent development but has in fact existed for a long time Yet despite the flourishing of two relevant academic subfields the philosophy of film and television aesthetics there is little scholarship on television in general as an art form This book aims to provide scholars active in television aesthetics with a critical overview of the relevant philosophical literature while also giving philosophers of film a particular account of the art of television that will hopefully spur further interest and debate It offers the first sustained theoretical examination of what is involved in appreciating television as an art and how this bears on the practical business of television scholars critics students and fans namely the comprehension interpretation and evaluation of specific televisual artworks

Art and Experience Ananta C. Sukla, 2003-02-28 In recent years experience has been one of the most ambiguous evasive and controversial terms in myriad disciplines including epistemology religion literary theory and philosophical aesthetics Its association with the subjective consciousness has deprived it of the cognitive status of human knowledge I *Art and Experience* R aims to grasp a firmer hold on this elusive concept via essays written by a distinguished group of international scholars who have rediscovered the foundation of experience and restored its cognitive

status in understanding our cultural activities Indeed emotions and experience play a vital role in human cognition and the symbiotic relationship between culture and experience is a subject long overdue for further study Clarifying the intricacies scholars face in understanding the concept of experience this volume s broad approach makes it an invaluable contribution to the study of the humanities Its uniqueness lies in its focusing on the manifold aspects of the concept rather than in drawing any singular dogmatic conclusion about its nature and function *Greco-Scythian Art and the Birth of Eurasia* Caspar Meyer,2013-11 Drawing on evidence from archaeology art history and textual sources to contextualize Greco Scythian metalwork in ancient society Meyer offers unique introductions to the archaeology of Scythia and its ties to Asia and classical Greece modern museum and visual culture studies and the intellectual history of classics in Russia and the West

PaintingDigitalPhotography Carl Robinson,2019-01-29 We live in a digital age where the mediums of art are inextricably bound to the binary code and painting and photography are redefined in their interconnected relationship through digital reconfiguration As digitisation unmoors these mediums from their traditional supports their modes of production display and dissemination shift These changes bring about new ways of creating and engaging with artworks Through this the innate qualities of the mediums previously anchored in their analogue nature are re evaluated through their connection with the digital Born out of the PaintingDigitalPhotography conference held at QUAD Derby UK in May 2017 this anthology of essays investigates aspects of interconnectivity between painting digital and photography in contemporary art practices It contributes to critical discourses around networks of associations by examining where syntheses occur and differences remain between these mediums at the beginning of the twenty first century **The SAGE Handbook of Visual Research**

Methods Luc Pauwels,Dawn Mannay,2019-12-10 The second thoroughly revised and expanded edition of The SAGE Handbook of Visual Research Methods presents a wide ranging exploration and overview of the field today As in its first edition the Handbook does not aim to present a consistent view or voice but rather to exemplify diversity and contradictions in perspectives and techniques The selection of chapters from the first edition have been fully updated to reflect current developments New chapters to the second edition cover key topics including picture sorting techniques creative methods using artefacts visual framing analysis therapeutic uses of images and various emerging digital technologies and online practices At the core of all contributions are theoretical and methodological debates about the meanings and study of the visual presented in vibrant accounts of research design analytical techniques fieldwork encounters and data presentation This handbook presents a unique survey of the discipline that will be essential reading for scholars and students across the social and behavioural sciences arts and humanities and far beyond these disciplinary boundaries The Handbook is organized into seven main sections PART 1 FRAMING THE FIELD OF VISUAL RESEARCH PART 2 VISUAL AND SPATIAL DATA PRODUCTION METHODS AND TECHNOLOGIES PART 3 PARTICIPATORY AND SUBJECT CENTERED APPROACHES PART 4 ANALYTICAL FRAMEWORKS AND PERSPECTIVES PART 5 MULTIMODAL AND MULTISENSORIAL RESEARCH PART 6

the Image Yirong Hu, 2025-06-18 This book provides a groundbreaking exploration of image semiotics. Going far beyond traditional analyses of static visual texts, it includes dynamic imagery, literary iconography, and psychological images, offering a holistic view of how semiotics permeates various forms of media and cultural expression. The book integrates various case studies on Chinese culture, providing scholars outside China a unique lens through which to understand Chinese cultural thinking through semiotics. This approach not only enriches the academic discussion but also enhances cross-cultural understanding. In addition, the book collects and synthesizes significant achievements in semiotics, incorporating traditional visual theory research from the Panofsky and Warburg schools. This synthesis forms a comprehensive semiotics of images, providing an interdisciplinary analytical framework for contemporary media spectacles. The book employs multiple methodologies to dissect the visual image spectacles constructed by modern media signs, culminating in a macro-level understanding of cultural spectacles. Furthermore, it situates the comparison between Chinese and Western civilizations within a broad context of cultural philosophy and history, enriching the discourse on cultural differences and similarities.

The Poetics of Perspective James Elkins, 2018-10-18 Perspective has been a divided subject, orphaned among various disciplines from philosophy to gardening. In the first book to bring together recent thinking on perspective from such fields as art history, literary theory, aesthetics, psychology, and the history of mathematics, James Elkins leads us to a new understanding of how we talk about pictures. Elkins provides an abundantly illustrated history of the theory and practice of perspective. Looking at key texts from the Renaissance to the present, he traces a fundamental historical change that took place in the way in which perspective was conceptualized: first a technique for constructing pictures, it slowly became a metaphor for subjectivity. That gradual transformation, he observes, has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic, cognitive, or epistemological metaphor. Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky, Hubert Damisch, Martin Jay, Paul Ricoeur, Jacques Lacan, Maurice Merleau-Ponty, and E. H. Gombrich. *The Poetics of Perspective* illustrates that perspective is an unusual kind of subject: it exists as a coherent idea, but no one discipline offers an adequate exposition of it. Rather than presenting perspective as a resonant metaphor for subjectivity, a painter's tool without meaning, a disused historical practice, or a model for vision and representation, Elkins proposes a comprehensive revaluation. The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world.

Even Odder Perceptions Richard L. Gregory, 2017-03-27 Why did Newton struggle for thirty years to make gold by alchemy and then become Master of the Mint? Why do we blush? Why do we have illusions? In this collection of essays, originally published in 1994, Richard Gregory once again delights and tantalizes with tales of his childhood, his family, and friends, the famous and the infamous, and weaves them into a rich pattern to illuminate scientific principles and puzzles. If you can put the

book down each essay is complete on its own but they are united by the magic of human perception From seeing and hearing to feeling and believing from the shape of traffic signs to knowledge of quantum mechanics all our interactions with the outside world are mediated by perception Our knowledge is further distilled by the machines which help our own biological mechanisms like microscopes and telescopes electric light and even more powerfully by computer technology But if the natural structures of perception can affect our interpretation of the world how much more dramatically might science education and tools of information technology enhance though sometimes mislead our perception of reality Even Odder Perceptions may not have all the answers but it certainly poses more questions **Visual Communication** Rick

Williams, Julianne Newton, 2009-03-04 A well rounded education in the 21st century requires not just verbal and mathematical proficiency but also the ability to interpret critique create and use visual communication on sophisticated levels In today's visual world it is critically important to hold an appreciation for the profound effects imagery has on individuals and the communities in which they live Visual Communication focuses on cultivating visual and media literacy from both consumption and production points of view and introduces students to the application of intuitive intelligence to a visual context Innovative in its field it provides a solid theoretical overview of the most advanced thinking and research about visual communication teaching readers how to apply theory to enhance their understanding of and work with images This book is intended for students in visual literacy and communication courses It can also be used in photojournalism courses and other coursework with a visual component Individuals interested in mass media studies will likewise find the book to be a worthwhile read *The Handbook of Organizational Rhetoric and Communication* Oyvind Ihlen, Robert L. Heath, 2018-05-10

A one stop source for scholars and advanced students who want to get the latest and best overview and discussion of how organizations use rhetoric While the disciplinary study of rhetoric is alive and well there has been curiously little specific interest in the rhetoric of organizations This book seeks to remedy that omission It presents a research collection created by the insights of leading scholars on rhetoric and organizations while discussing state of the art insights from disciplines that have and will continue to use rhetoric Beginning with an introduction to the topic The Handbook of Organizational Rhetoric and Communication offers coverage of the foundations and macro contexts of rhetoric as well as its use in organizational communication public relations marketing management and organization theory It then looks at intellectual and moral foundations without which rhetoric could not have occurred discussing key concepts in rhetorical theory The book then goes on to analyze the processes of rhetoric and the challenges and strategies involved A section is also devoted to discussing rhetorical areas or genres namely contextual application of rhetoric and the challenges that arise such as strategic issues for management and corporate social responsibility The final part seeks to answer questions about the book's contribution to the understanding of organizational rhetoric It also examines what perspectives are lacking and what the future might hold for the study of organizational rhetoric Examines the advantages and perils of organizations that seek to project their voices in

order to shape society to their benefits Contains chapters working in the tradition of rhetorical criticism that ask whether organizations rhetorical strategies have fulfilled their organizational and societal value Discusses the importance of obvious traditional nuanced and critically valued strategies such as rhetorical interaction in ways that benefit discourse Explores the potential risks paradoxes and requirements of engagement Reflects the views of a team of scholars from across the globe Features contributions from organization centered fields such as organizational communication public relations marketing management and organization theory The Handbook of Organizational Rhetoric and Communication will be an ideal resource for advanced undergraduate students graduate students and scholars studying organizational communications public relations management and rhetoric

Mental States Andrea C. Schalley, Drew Khlenzoz, 2007 Collecting the work of linguists psychologists neuroscientists archaeologists artificial intelligence researchers and philosophers this volume presents a richly varied picture of the nature and function of mental states Starting from questions about the cognitive capacities of the early hominin *Homo floresiensis* the essays proceed to the role mental representations play in guiding the behaviour of simple organisms and robots thence to the question of which features of its environment the human brain represents and the extent to which complex cognitive skills such as language acquisition and comprehension are impaired when the brain lacks certain important neural structures Other papers explore topics ranging from nativism to the presumed constancy of categorization across signed and spoken languages from the formal representation of metaphor actions and vague language to philosophical questions about conceptual schemes and colours Anyone interested in mental states will find much to reward them in this fine volume

Key Writers on Art: The Twentieth Century Chris Murray, 2005-06-27 A unique and authoritative guide to modern responses to art Featuring forty eight essays and written by a panel of expert contributors it introduces readers to the key approaches and analytical tools of contemporary art study and debate

Practicing Art/Science Philippe Sormani, Guelfo Carbone, Priska Gisler, 2018-07-11 Over the last two decades multiple initiatives of transdisciplinary collaboration across art science and technology have seen the light of day Why by whom and under what circumstances are such initiatives promoted What does their experimental character look like and what can be learned epistemologically and institutionally from probing the multiple practices of art science at work In answer to the questions raised *Practicing Art Science* contrasts topical positions and insightful case studies ranging from the detailed investigation of art at the nanoscale to the material analysis of Leonardo's *Mona Lisa* and its cracked smile In so doing this volume brings to bear the practice turn in science and technology studies on the empirical investigation of multifaceted experimentation across contemporary art science and technology in situ Against the background of current discourse on artistic research the introduction not only explains the particular relevance of the practice turn in STS to tackle the interdisciplinary task at hand but offers also a timely survey of varying strands of artistic experimentation In bringing together ground breaking studies from internationally renowned scholars and upcoming researchers in sociology art theory

and artistic practice as well as history and philosophy of science Practicing Art Science will be essential reading for practitioners and professionals in said fields as well as postgraduate students and representatives of higher education and research policy more broadly

Poetics of Cinema David Bordwell, 2012-11-12 Bringing together twenty five years of work on what he has called the historical poetics of cinema David Bordwell presents an extended analysis of a key question for film studies how are films made in particular historical contexts in order to achieve certain effects For Bordwell films are made things existing within historical contexts and aim to create determinate effects Beginning with this central thesis Bordwell works out a full understanding of how films channel and recast cultural influences for their cinematic purposes With more than five hundred film stills *Poetics of Cinema* is a must have for any student of cinema

Drawing Distinctions Patrick Maynard, 2018-07-05 If our procedure is to work steadily in the direction of drawing as fine art rather than as we so often find beginning from examples of such art where shall we begin One attractive possibility is to begin at the beginning not the beginning in prehistory which is already wonderful art but with our personal beginnings as children From there it will be the ambitious project of this book to investigate the course of drawing from the first marks children make to the greatest graphic arts of different cultures from the Introduction Patrick Maynard surveys the rich and varied practices of drawing from the earliest markings on cave walls to the complex technical schematics that make the modern world possible from cartoons and the first efforts of preschoolers to the works of skilled draftspeople and the greatest artists East and West Despite or perhaps because of its ubiquity drawing as such has provoked remarkably little philosophical reflection Nonphilosophical writing on the topic tends to be divided between specialties such as art history and mechanics In this engagingly written and well illustrated book Maynard reveals the interconnections and developments that unite this fundamental autonomous human activity in all its diversity Informed by close discussion of work in art history art criticism cognitive and developmental psychology and aesthetics *Drawing Distinctions* presents a theoretically sophisticated yet approachable argument that will improve comprehension and appreciation of drawing in its many forms uses and meanings
