The Immigration Restrictions On Employment Order 1996 Immigration Statutory Instruments 1996 3225:

Migrants at Work Cathryn Costello, Mark Freedland, 2014-10-30 There is a highly significant and under considered intersection and interaction between migration law and labour law Labour lawyers have tended to regard migration law as generally speaking outside their purview and migration lawyers have somewhat similarly tended to neglect labour law The culmination of a collaborative project on Migrants at Work funded by the John Fell Fund the Society of Legal Scholars and the Research Centre at St John's College Oxford this volume brings together distinguished legal and migration scholars to examine the impact of migration law on labour rights and how the regulation of migration increasingly impacts upon employment and labour relations Examining and clarifying the interactions between migration migration law and labour law contributors to the volume identify the many ways that migration law as currently designed divides the objectives of labour law privileging concerns about the labour supply and demand over worker protective concerns In addition migration law creates particular forms of status which affect employment relations thereby dividing the subjects of labour law Chapters cover the labour laws of the UK Australia Ireland Israel Italy Germany Sweden and the US References are also made to discrete practices in Brazil France Greece New Zealand Mexico Poland and South Africa These countries all host migrants and have developed systems of migration law reflecting very different trajectories Some are traditional countries of immigration and settlement migration while others have traditionally been countries of emigration but now import many workers There are nonetheless common features in their immigration law which have a profound impact on labour law for instance in their shared contemporary shift to using temporary labour migration programmes Further chapters examine EU and international law on migration labour rights human rights and human trafficking and smuggling developing cross jurisdictional and multi level perspectives Written by leading scholars of labour law migration law and migration studies this book provides a diverse and multidisciplinary approach to this field of legal interaction of interest to academics policymakers legal practitioners trade unions and migrants groups alike

Judicial Review, Socio-Economic Rights and the Human Rights Act Ellie Palmer, 2007-08-31 In the United Kingdom during the past decade individuals and groups have increasingly tested the extent to which principles of English administrative law can be used to gain entitlements to health and welfare services and priority for the needs of vulnerable and disadvantaged groups One of the primary purposes of this book is to demonstrate the extent to which established boundaries of judicial intervention in socio economic disputes have been altered by the extension of judicial powers in sections 3 and 6 of the Human Rights Act 1998 and through the development of a jurisprudence of positive obligations in the European Convention on Human Rights 1950 Thus the substantive focus of the book is on developments in the constitutional law of the United Kingdom However the book also addresses key issues of theoretical human rights international and comparative constitutional law Issues of justiciability in English administrative law have therefore been explored against a background of two factors a growing acceptance of the need for balance in the

protection in modern constitutional arrangements afforded to civil and political rights on the one hand and socio economic rights on the other hand and controversy as to whether courts could make a more effective contribution to the protection of socio economic rights with the assistance of appropriately tailored constitutional provisions **Statutory Instruments**
