Medical Visions Kirsten Osther, 2013-03-11 Osther's ambitious book explores 120 years of medical image making to explain how visual representations came to play a central role in medical education and practice She demonstrates how medical images created by the healthcare industry documentary filmmakers experimental artists and the mass media acquire cultural meaning and influence shaping professional and popular understandings of health and disease **Tales From Development Hell (New Updated Edition)** David Hughes, 2012-02-28 A compulsively readable journey into the area of movie making where all writers directors and stars fear to tread Development Hell the place where scripts are written actors hired and sets designed but the movies rarely actually get made Whatever happened to Darren Aronofsky's Batman movie starring Clint Eastwood Why were there so many scripts written over the years for Steven Spielberg and George Lucas's fourth Indiana Jones movie Why was Lara Croft's journey to the big screen so tortuous and what prevented Paul Verhoeven from filming what he calls one of the greatest scripts ever written Why did Ridley Scott's Crisis in the Hot Zone collapse days away from filming and were the Beatles really set to star in Lord of the Rings What does Neil Gaiman think of the attempts to adapt his comic book series The Sandman All these lost projects and more are covered in this major book which features many exclusive interviews with the writers and directors involved Wild Science Janine Marchessault, Kim Sawchuk, 2013-10-18 Wild Science investigates the world wide boom in health culture While self help health books and medical dramas are popular around the globe we are bombarded with daily media images of DNA research and news reports about cloning the fight against AIDS cancer and depression With popular culture now the principal means through which the non scientific population encounters science why do certain images of science get promoted above others Contributors examine the public meanings of science revealing the frictions and contradictions within popular representations of what medicine can and should do Focusing on the visual culture of medicine they show how representations of science have a direct impact on popular perceptions of the limits of science and ultimately on health education funding and research and examine the belief that media literacy in popular representations of medicine makes an ethical public discourse on the aims of science possible With sections addressing the new visual technologies which make the human body into a virtual territory

the diagnostic and medical practices centered around women's bodies and popular debates around genetics and identity Wild Science argues that science is a practice bound in values and institutions and argues for a responsible engagement with the public cultures of science and health
