The Inside Story A Narrative Approach To Religious Understanding And Truth:

The Inside Story Paul Brockelman, 1992-08-17 This book explores what is meant by claims of religious understanding and truth It argues that at the end of the twentieth century we are undergoing a revolution in our thinking about ourselves and our place in nature and that the worldview pervading modern culture is dissolving because it has marginalized and hindered authentic religious understanding and practice It has spiritually degraded and destroyed the natural environment upon which it depends The book describes how this situation developed and proposes an alternative postmodern narrative concept of religious understanding that may help us to transcend these spiritual and ecological problems This model of religious truth explores a new cosmological story that has emerged over the past twenty five years It is a story that will enrich and deepen our spiritual experience while helping us cope with possibly the most disastrous and dangerous consequence of modernity the present worldwide ecological crisis

Telling God's Story Gerard Loughlin, 1999-09-23 This book presents narrative theology as radically orthodox It is orthodox because in the tradition of all those who maintain the priority of the story of Jesus as it is sacramentally performed in the Church and radical because it eschews all modern attempts to found Christian faith on some other story such as that of reason critical history or human consciousness Acknowledging the indeterminacy of and textuality of human existence *Telling God's Story* presents the Christian life as as a truly postmodern venture the groundless enactment of God's future now

The Greening of Faith John E. Carroll, Paul Brockelman, 2016-10-04 The recent release of Pope Francis's much discussed encyclical on the environment *Laudato Si' On Care for Our Common Home* has reinforced environmental issues as also moral and spiritual issues This anthology twenty years ahead of the encyclical but very much in line with its agenda offers essays by fifteen philosophers theologians and environmentalists who argue for a response to ecology that recognizes the tools of science but includes a more spiritual approach one with a more humanistic holistic view based on inherent reverence toward the natural world Writers whose orientations range from Buddhism to evangelical Christianity to Catholicism to Native American beliefs explore ways to achieve this paradigm shift and suggest that the environment is not only a spiritual issue but the spiritual

issue of our time **The Truth of Broken Symbols** Robert C. Neville,1996-01-01 This book provides a cross cultural analysis of how religious symbols function from a theological and philosophical perspective Showing how religious symbols can be true in various qualified senses Neville presents a theory of religious symbolism in the American pragmatic tradition extending and elaborating Tillich s claim that religious symbols participate in the divine realities to which they refer and yet must be broken in order not to be idolatrous or demonic The Truth of Broken Symbols offers a theory of religious symbolism treating reference meaning and interpretation and discussing different functions of religious symbols in theological practical and devotional contexts It shows that religious symbols are to be properly understood as true or false and that symbol systems such as myths theologies or liturgical symbols are to be used to engage divine realities while internally exhibiting semiotic structures of reference meaning and interpretation Cosmology and Creation Paul T. Brockelman,1999 In this fascinating look at the spiritual side of modern cosmology the author of The Greening of Faith God the Environment and the Good Life seeks to bridge the gap between the scientific and the spiritual offering a vision of a wider order of being

Rethinking Organizational Change Muayyad Jabri,2015-12-22 Rethinking Organizational Change The Role of Dialogue Dialectic based on a rendition of Mikhail Bakhtin s anthropological concept of polyphony applied to organizational change The reader is treated to a cutting edge discussion of a variety of contemporary ontological and epistemological themes

centered on process dialectic dialogue and social construction Many Heavens, One Earth Clifford Chalmers Cain,2012-01-01 Many Heavens One Earth is a collection of first person voices from nine of the world religions In fifteen articles devotees and scholars reveal the contributions these traditions make to informing and motivating an ecological response to the environmental issues that beset planet earth The spiritual messages of world religions have an indispensable and decisive role to play in addressing these environmental problems for at their root these ecological issues are spiritual problems Unless greed is replaced by moderation and sharing materialism by spiritual insights and values consumerism by restraint and simpler living exploitation by respect and service and pollution by caring and protection nature s hospitality will be foolishly rebuffed and therefore our descendants will inherit a polluted and depleted earth Religion can be and must be a part of this replacement Since at least 90% of the world s people claim allegiance to various major world religious traditions religion can exert a crucial and transforming influence The Inklings, the Victorians, and the Moderns Christopher

Butynskyi,2020-01-28 In The Inklings the Victorians and the Moderns the author examines the dynamics of a small group of twentieth century traditionalists who reacted in opposition to the spirit of the intellectual movements of the modern age In particular he draws on the Inklings e g C S Lewis J R R Tolkien Christian humanists such as G K Chesterton and other proponents of the Great Books and classical liberal learning to outline a position that eschewed reactionary rejections of modern thought but sought to transcend its perceived limitations by asserting the continued value of myth religion liberal education and ancient texts They were more than instigators and wished to reconcile and translate conservative traditional ideas within a progressive modern scientific context The author magnifies the intellectual trends in modern Western thought in the twentieth century and provides the historical context for the resistance to the prominent and convincing tenets of modernity Given the myriad responses he focuses on a more conservative response to reductive definitions born out of well intentioned progressivism The author approaches the subject matter from an historical perspective but utilizes an interdisciplinary discourse to create a multi dimensional explanation of the intellectual atmosphere of the twentieth century

Relationality and the Concept of God Henry Jansen, 2025-02-10 Classical theism the dominant tradition in Christian theology has stressed the metaphysical concept of God i e God s ontological transcendence and independence from the world In this century however this concept of God has increasingly met with criticism On the basis of the Bible and new philosophical considerations it is argued that a relational concept of God better answers the fundamental concerns of the Christian faith In this book the author investigates the questions of whether one can conceive of God apart from the metaphysical attributes and whether reflection on the biblical depiction of God leads necessarily to a relational concept of God The author explores the questions by examining the relational concepts of God found in two contemporary German theologians J rgen Moltmann and Wolfhart Pannenberg and uses the divine attribute of immutability as a focus for the discussion He argues that the relational concept of God presupposes another metaphysical conception of God which raises problems as serious as those in classical theism and that the Bible itself because of its nature as a narrative text is ambiguous in many respects as far as God is concerned A truly Christian doctrine of God must take both the metaphysical and relational aspects of God into account

Reading Our Lives William L. Randall, Elizabeth McKim, 2008-06-03 Against the background of Socrates insight that the unexamined life is not worth living Reading Our Lives The Poetics of Growing Old investigates the often overlooked inside dimensions of aging Despite popular portrayals of mid and later life as entailing inevitable decline this book looks at aging as potentially a process of poesis a creative endeavor of fashioning meaning from the ever accumulating texts memories and reflections that constitute our inner worlds At its center is the conviction that although we are constantly reading our lives to some degree anyway doing so in a mindful matter is critical to our development in the second half of life Drawing on research in numerous disciplines affected by the so called narrative turn including cognitive psychology neuroscience and the psychology of aging authors Randall and McKim articulate a vision of aging that promises to accommodate such time honored concepts as wisdom and spirituality one that understands aging as a matter not merely of getting old but of consciously growing old

Feminist

Reconstructions of Christian Doctrine Kathryn Greene-McCreight, 2000-03-09 What is the relationship between feminist theology and classical Christian theology Is feminist theology Christian and if so in what respect and to what extent This study seeks to analyze and evaluate the relation of feminist reconstructions to traditional Christian teaching Greene McCreight uses the extent to which the biblical depiction of God is allowed to guide theological hermeneutics as a test of orthodoxy She looks at the writings of a wide range of contemporary feminist theologians discusses their doctrinal patterns and demonstrates how the Bible is used in undergirding their theological reconstructions
