The Citizens Choice:

The citizen's choice Ernest Barker, 1972 Citizens, Context, and Choice Russell J. Dalton, Christopher J. Anderson, 2011
How do institutions and electoral systems matter for citizens electoral choices This is the first systematic study that attempts to answer this question for contemporary democracies The book assembles leading electoral researchers to examine citizen choice in over 30 democracies surveyed by the Comparative Study of Electoral Systems **Direct Democratic Choice**

Hanspeter Kriesi, 2008-01-01 Direct Democratic Choice sets out to understand how the citizens actually decide in direct democratic votes Author Hanspeter Kriesi has analyzed nearly twenty years of post election surveys in Switzerland 1981 1999 which he has contextualized according to the various political issues and the relevant arguments provided by the political elites This book's core argument is that the citizens who participate in direct democratic votes make competent choices Kriesi's extensive empirical research shows that the majority of these voters arrive at their decisions on the basis of arguments about the advantages and disadvantages of the available options The less competent and less interested citizens either do not vote or if they do employ heuristic shortcuts allowing them to make approximately reasonable decisions Kriesi provides strong support for an optimistic view of direct democratic decision making but also indicates that this process wherever it occurs can be improved by proper institutional design and by appropriate strategies enacted by the political elite

Overwhelmed by overflows? Barbara Czarniawska, Orvar Löfgren, 2019-09-25 This transdisciplinary volume investigates the ways in which people and organisations deal with the overflow of information goods or choices It explores two main themes the emergence of overflows and the management of overflows in the sense of either controlling or coping with them Individual chapters show the management of overflows taking place in various social settings periods and political contexts This includes attempts by states to manage future consumption overflow in post war Eastern European contemporary economies of sharing managing overflow in health care administration overflow problems in mass travel and migration overflow in digital services and the overflow that scholars face in dealing with an abundance of publications The Rule Of The Many Thomas Christiano, 2018-02-06 There is no problem more crucial to contemporary political thought than the status of democracy its role and its problems in the contemporary world In this survey of democratic theory Thomas Christiano introduces the reader to the principles underlying democracy and to the problems involved in applying these principles to real life situations Beginning with the simple democratically inspired presumption that the interests of all citizens are to be treated equally Christiano argues that the implications of such a minimal commitment clarify the nature of democracy and what must be demanded of democratic institutions He argues that it is the collision of this demand for equality with the fact of pluralism of interests that determines how democratic institutions ought to be designed This strong sense of reality will be welcomed by those interested in practical questions of transition in newly democratizing states Christiano combines a broad

coverage of important positions taken by others with the exposition of his own ideas allowing his text to appeal to a wide range of readers from introductory students to experienced scholars Clear accessible and often elegant The Rule of the Many is a splendid introduction to democratic theory one that will take its place as both an important scholarly contribution and as an effective text

Swedish Local Democracy at the Crossroads Gissur Ó Erlingsson, David Karlsson, Richard Öhrvall, Jessika Wide, 2025-11-01 As democratic systems come under increasing strain worldwide assessing their strength and resilience is more urgent than ever Some argue that local democracy can serve as a bulwark against democratic backsliding providing institutional resilience political diversity and grounded arenas for citizen engagement But to fulfil this role it must itself be strong accountable and responsive Swedish Local Democracy at the Crossroads makes the case for continuous systematic evaluation of democratic institutions at the local level and introduces a structured framework for doing so Applying this framework to Sweden one of the world's most decentralised countries the book offers the most comprehensive and up to date analysis of Swedish local democracy available in English Swedish municipalities are key actors in delivering welfare services upholding political legitimacy and maintaining citizen trust Yet they increasingly face rising demands institutional ambiguity and weakened party structures that challenge their ability to govern effectively Grounded in historical context and detailed empirical analysis the book explores enduring tensions and outlines potential pathways for reform It examines core dimensions such as representation participation institutional design and the evolving relationship between politicians and bureaucrats While centred on the Swedish experience its insights extend well beyond national borders and will appeal to researchers students policymakers and practitioners concerned with democratic governance and institutional renewal

Constructive Conversations About Health Marshall Marinker, Fritjof Capra, 2018-08-15 Current health policy is required to respond to a constantly changing social and political environment characterised particularly in Europe by ageing populations increased migration and growing inequalities in health and services With health systems under increasing strain there is a sense that we need to seek new means of determining health policy Much political debate focuses on managerial issues such as the levels of health funding and the setting and missing of targets Meanwhile our moral imperatives our values and principles go relatively unexamined What are these values Can we agree their validity and salience How do we manage the paradox of competing goods Can we find new ways of talking about and resolving our conflicting values and competing priorities in order to create sound appropriate and just health policies for the 21st Century Written by leading health policy makers and academics from many countries Constructive Conversations about Health examines in depth the underlying values and principles of health policy and posits a more enlightened public and political discourse The book will be invaluable for those involved in health policy making and governance politicians healthcare managers researchers ethicists health and social affairs media health rights and patient participation groups The literature on health policy is vast On offer are models of health services economic theory management theory disquisitions on ethical

principles social analyses literally thousands of publications In a globalised and electronically networked world this literature has already generated its own particular language a policy jargon replete with terms that look deceptively familiar terms that will be much in evidence in what now follows terms whose meanings require our closest attention Marshall Marinker

Waterhouse,2015-11-24 Lobbying America tells the story of the political mobilization of American business in the 1970s and 1980s Benjamin Waterhouse traces the rise and ultimate fragmentation of a broad based effort to unify the business community and promote a fiscally conservative antiregulatory and market oriented policy agenda to Congress and the country at large Arguing that business s political involvement was historically distinctive during this period Waterhouse illustrates the changing power and goals of America s top corporate leaders Examining the rise of the Business Roundtable and the revitalization of older business associations such as the National Association of Manufacturers and the U S Chamber of Commerce Waterhouse takes readers inside the mind set of the powerful CEOs who responded to the crises of inflation recession and declining industrial productivity by organizing an effective and disciplined lobbying force By the mid 1970s that coalition transformed the economic power of the capitalist class into a broad reaching political movement with real policy consequences Ironically the cohesion that characterized organized business failed to survive the ascent of conservative politics during the 1980s and many of the coalition s top goals on regulatory and fiscal policies remained unfulfilled The industrial CEOs who fancied themselves the voice of business found themselves one voice among many vying for influence in an increasingly turbulent and unsettled economic landscape Complicating assumptions that wealthy business leaders naturally get their way in Washington Lobbying America shows how economic and political powers interact in the American democratic system **Citizenship and Democratic Innovations in Europe** Ireneusz Paweł Karolewski,Carsten

Herzberg,2025-10-16 This book brings together scholarship and debates on citizenship and democratic innovation and examines how democratic innovations might change or even consolidate the existing contours of citizenship Arguing that the nexus between research on citizenship and democratic innovations can be found in the praxis approach to citizenship where citizenship can be framed as a realm of actions and practices the book shifts the discussion from the institutional level into a more conceptual realm of analysis Taking stock of the democratic innovations at the local level the national level and the EU level such as citizen assemblies referendums and participatory budgeting the book further surveys and maps their contribution to the democratic quality of citizenship across various European countries This book is of key interest to scholars and students of democratic innovations citizenship studies democratization governance and more generally public policy and European Politics and Studies **The Logic of Political Survival** Bruce Bueno De Mesquita,Alastair Smith,Randolph M. Siverson,James D. Morrow,2005-01-14 The authors of this ambitious book address a fundamental political question why are leaders who produce peace and prosperity turned out of office while those who preside over corruption war and misery endure Considering this political puzzle they also answer the related economic question of why some countries experience successful economic development and others do not The authors construct a provocative theory on the selection of leaders and present specific formal models from which their central claims can be deduced They show how political leaders allocate resources and how institutions for selecting leaders create incentives for leaders to pursue good and bad public policy They also extend the model to explain the consequences of war on political survival Throughout the book they provide illustrations from history ranging from ancient Sparta to Vichy France and test the model against statistics gathered from cross national data The authors explain the political intuition underlying their theory in nontechnical language reserving formal proofs for chapter appendixes They conclude by presenting policy prescriptions based on what has been demonstrated theoretically and empirically **State Constitutions for the Twenty-first Century, Volumes 1, 2 & 3** G.
