## **The Collection Boulliau An Inventory:**

**The Collection Boulliau (BN, FF. 13019-13059)** Robert A. Hatch, 1982 The life career of Ismael Boulliau virtually spanned the century of genius An accomplished astronomer mathematician classical scholar Boulliau was an activist in the cause of Scientific Revolution His voluminous correspondence placed him at the heart of one of the largest intelligence networks of the century This work is designed as a guide to a correspondence network that helped to unite the learned world of his time Accordingly this vol includes a short sketch of Boulliau s life career followed by an Inventory Name Index of the 41 vols of the Collection Boulliau BN FF 13019 13059 Consisting of over 22 000 pages of manuscript materials The Collection ranks as one of the largest sources of its kind in the 17th century *Archives of the Scientific Revolution* Michael Cyril William Hunter, Michael Hunter, 1998 The seventeenth century in Western Europe remains the key time and place for the development of modern science the basic theme of this book is what the nature of seventeenth century archives can tell us about this development through a series of case studies Boyle Galileo Huygens Newton included Manuscript collections created by the individuals and institutions who were responsible for the scientific revolution offer valuable evidence of the intellectual aspirations and working practices of the principal protagonists This volume is the first to explore such archives focusing on the ways in which ideas were formulated stored and disseminated and opening up understanding of the process of intellectual change It analyses the characteristics and history of the archives of such leading intellectuals as Robert Boyle Galileo Galilei G W Leibniz Isaac Newton and William Petty also considered are the new scientific institutions founded at the time the Royal Society and the Académie des Sciences In each case significant broader findings emerge concerning the nature and role of such holdings an introductory essay discusses the interpretation and exploitation of archives MICHAEL HUNTER is Professor of History at Birkbeck College University of London Contributors MICHAEL HUNTER MASSIMO BUCCIANINI MARK GREENGRASS ROBERT A HATCH FRANCES HARRIS JOELLA YODER DOMENICO BERTOLONI MELI ROB ILIFFE JAMES G O HARA MORDECHAI FEINGOLD CHRISTIANE DEMEULENAERE DOUYRE DAVID STURDY

**Ismaël Boulliau, 1605-1694, Astronomer, Savant** Robert Alan Hatch, 1978 *Change and Continuity in Early Modern Cosmology* Patrick Bonner, 2011-02-01 Viewed as a flashpoint of the Scientific Revolution early modern astronomy witnessed a virtual explosion of ideas about the nature and structure of the world This study explores these theories in a variety of intellectual settings challenging our view of modern science as a straightforward successor to Aristotelian natural philosophy It shows how astronomers dealt with celestial novelties by deploying old ideas in new ways and identifying more subtle notions of cosmic rationality Beginning with the celestial spheres of Peurbach and ending with the evolutionary implications of the new star Mira Ceti it surveys a pivotal phase in our understanding of the universe as a place of constant change that confirmed deeper patterns of cosmic order and stability *A Catalogue of the Manuscripts of Christiaan Huygens including a concordance with his Oeuvres Complètes* Joella Yoder, 2013-05-13 A Catalogue of the Manuscripts of Christiaan Huygens

inventories all known manuscripts written by Christiaan Huygens as well as all letters to or from him. Because almost all of the manuscripts are housed at the University of Leiden in a collection entitled *Codices Hugeniani*, the catalogue contains an inventory of that entire collection of family papers including many involving Constantijn Huygens. In addition, because most scholars begin their research by consulting *Oeuvres Complètes de Christiaan Huygens*, which does not provide enough information to relocate the manuscripts edited therein, this catalogue essentially footnotes every edited piece by listing the source manuscripts page by page for each volume. Thus the researcher should be able to move easily between manuscript and edition.

*God and Nature* David C. Lindberg, Ronald L. Numbers, 2023-11-15. Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom*, no comprehensive history of the subject has appeared in the English language. Although many twentieth-century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions, the image of warfare lingers in the public mind. To provide an up-to-date alternative based on the best available scholarship and written in nontechnical language, the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book, these authors cover the period from the early Christian church to the twentieth century, offering fresh appraisals of such encounters as the trial of Galileo, the formulation of the Newtonian worldview, the coming of Darwinism, and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also to serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable.

Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom*, no comprehensive history of the subject has appeared in the English language. Although many twentieth-century historians

Ismaël Boulliau (1605-1694) Astronomer, Savant Robert A. Hatch, 1978 Manuscripta, 1984. Issues for Feb 1957, July 1959 include a Checklist of the Vatican manuscript codices available for consultation at the Knights of Columbus Vatican Film Library at St. Louis University, pts 1-8.

*Encyclopedia of the Scientific Revolution* Wilbur Applebaum, 2003-12-16. With unprecedented current coverage of the profound changes in the nature and practice of science in sixteenth and seventeenth-century Europe, this comprehensive reference work addresses the individuals, ideas, and institutions that defined culture in the age when the modern perception of nature of the universe and of our place in it is said to have emerged. Covering the historiography of the period, discussions of the Scientific Revolution's impact on its contemporaneous disciplines, and in-depth analyses of the importance of historical context to major developments in the sciences, *The Encyclopedia of the Scientific Revolution* is an indispensable resource for students and researchers in the history and philosophy of science.

The Copernican Question Robert Westman, 2020-04-21. In 1543 Nicolaus Copernicus publicly defended his hypothesis that the earth is a planet and the

sun a body resting near the center of a finite universe But why did Copernicus make this bold proposal And why did it matter The Copernican Question reframes this pivotal moment in the history of science centering the story on a conflict over the credibility of astrology that erupted in Italy just as Copernicus arrived in 1496 Copernicus engendered enormous resistance when he sought to protect astrology by reconstituting its astronomical foundations Robert S Westman shows that efforts to answer the astrological skeptics became a crucial unifying theme of the early modern scientific movement His interpretation of this long sixteenth century from the 1490s to the 1610s offers a new framework for understanding the great transformations in natural philosophy in the century that followed *François Blondel* Anthony Gerbino,2012-12-06 First director of the Acad mie royale d architecture Fran ois Blondel established a lasting model for architectural education that helped transform a still largely medieval profession into the one we recognize today Most well known for his 1676 urban plan of Paris Blondel is also celebrated as a mathematician scientist and scholar Few figures are more representative of the close affinity between architecture and the new science of the seventeenth century The first full length study in English to appear on this polymath this book adds to the scholarship on early modern architectural history and particularly on French classicism under Louis XIV and his minister Jean Baptiste Colbert It studies early modern science and technology Baroque court culture and the development of the discipline of architecture

**Economic Evolution and Revolution in Historical Time** Paul W. Rhode,Joshua L. Rosenbloom,David F. Weiman,2011-01-28 This book challenges the static ahistorical models on which Economics continues to rely These models presume that markets operate on a frictionless plane where abstract forces play out independent of their institutional and spatial contexts and of the influences of the past In reality at any point in time exogenous factors are themselves outcomes of complex historical processes They are shaped by institutional and spatial contexts which are carriers of history including past economic dynamics and market outcomes To examine the connections between gradual evolutionary change and more dramatic revolutionary shifts the text takes on a wide array of historically salient economic questions ranging from how formative European encounters reconfigured the political economies of indigenous populations in Africa the Americas and Australia to how the rise and fall of the New Deal order reconfigured labor market institutions and outcomes in the twentieth century United States These explorations are joined by a common focus on formative institutions spatial structures and market processes Through historically informed economic analyses contributors recognize the myriad interdependencies among these three frames as well as their distinct logics and temporal rhythms

**Reappraisals of the Scientific Revolution** David C. Lindberg,Robert S. Westman,1990-07-27 A compendium offering broad reflections on the Scientific Revolution from a spectrum of scholars engaged in the study of 16th and 17th century science Many accepted views and interpretations of the scientific revolution are challenged *Gassendi the Atomist* Lynn Sumida Joy,2002-08-08 An account of Gassendi s life and work illuminating the influence of humanism on seventeenth century thought
