John Harrison, 2020-08-20 Throughout his career M John Harrison s writing has defied categorisation building worlds both unreal and all too real overlapping and interlocking with each other His stories are replete with fissures and portals into parallel dimensions unidentified countries and lost lands But more important than the places they point to are the obsessions that drive the people who so believe in them characters who spend their lives hunting for and haunted by clues and maps that speak to the possibility of somewhere else This selection of stories drawn from over 50 years of writing bears witness to that desire for difference whether following backstreet occultists amateur philosophers down and outs or refugees we see our relationship with the other in microscopic detail and share in Harrison s rejection of the idea that the world or our understanding of it could ever be settled      **Be An Icon** Kenneth Nkemnacho, 2016-03-14 In BE AN ICON you ll be motivated educated and informed Within this book you ll find How ordinary people became extraordinary How to change your mindset for the best The relevance of focus keenness and precision What you mustn t lose as a visionary and How to generate and develop ideas BE AN ICON is endowed with goal setting techniques the need for being resolute the essence of positioning direction and destination and so much more Looking into the book will make you realise that you can t get enough of it It is not a one time read book it is a book that is required daily for continuous success      **Dimension Wave:** **Volume 4** Aneko Yusagi, 2025-07-10 With the development of the uninhabited Cal Mira island completed Kizuna a boy forced

The Monkey's Tail Tom Lethbridge, 2024-11-01 In the 1960s T C Lethbridge's challenging probing studies were well established First published in 1969 The Monkey's Tail was as remarkable as his previous investigations Mr Lethbridge who was trained in Natural Science before he became an archaeologist had for years been unable to accept Darwin's theory of Evolution In this book he examines the theory in the light of his observations and experience He found it wanting in every particular which he examined In the first part of the book Mr Lethbridge puts his case against the theory of Evolution and in the second part he shows that the known facts of Evolution could be equally well explained in another way He had for many years been working on the fringe study of Extra Sensory Perception and he used that study to present an alternative theory to Darwinism Mr Lethbridge was well aware that much more evidence was needed before his ideas could either be proved or disproved finally but they do provide a reasoned explanation based on years of careful study The theory he put forward was not only more compatible with observed scientific fact at the time but less at variance with accepted religious beliefs This book is a re issue originally published in 1969 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication
