The Revised Nomenclature for Museum Cataloging James R. Blackaby, Patricia Greeno, The Nomenclature Committee, 1995-10-06 Chenhall's System for Classifying Man Made Objects created the first common cataloging language for museums and other historical collections Now The Revised Nomenclature for Museum Cataloging develops Chenhall's ideas to provide updated material so museums can use their collections to the fullest extent The Revised Nomenclature provides a universally accepted classification system with terminology that allows curators registrars and catalogers to describe artifacts precisely It also creates a standard for cataloging so that in house record keeping is complete and accurate for use by all staff members and the exchange of cultural objects and information between museums is possible on both a national and international scale This system deals with information not with methods of recording that information and enables even the smallest museum's terminology to be in synchronization with the largest metropolitan museum No museum can afford to be without this book 01-01-2022, 0000 0000 00000 00000 00000
