The Individual And Everybody Else:

The Myth of the Individual Charles Wesley Wood,1927 A Worldview of Everything Brian Cronin,2022-11-30
Philosophy has sometimes been described as the discipline in which you can never be wrong as the reserve of absentminded professors aloof academics and purveyors of obscure ideas or interesting opinions Quite the contrary Philosophy answers the hard questions Does everything happen by chance Is there anything more than matter in the universe Are humans in the same class as animals Is there a God Can we know the correct answer to these questions The answers to these questions matter We are all philosophers even though we are not aware of the fact We each have a set of ultimate priorities and principles answers to these questions a big picture that determines our everyday thoughts decisions and actions In this book Brian Cronin uses the ideas of Bernard Lonergan s Insight A Study of Human Understanding to argue methodically towards a correct critical comprehensive worldview an answer to those big questions which is the precise task of first philosophy This book is an accessible and readable presentation of Lonergan s metaphysics a somewhat neglected topic Science and philosophy are complementary Scientists answer the concrete detailed questions about everything around us the parts Philosophy integrates all these into a correct worldview of the whole of everything **Essays in the Metaphysics of Modality** Alvin Plantinga,2003-03-27 Perhaps no one has done more in the last 30 years to advance thinking in the metaphysics of modality than has Alvin Plantinga Collected here are some of his most important essays on this influential subject Dating back from the late 1960 s to the present they chronicle the development of Plantinga s thoughts about some of the most fundamental issues in metaphysics what is the nature of abstract objects like possible worlds properties propositions and such phenomena Are there possible but non actual objects Can objects that do not exist exemplify properties Plantinga gives thorough and penetrating answers to all of these questions and many others This volume contains some of the best work in metaphysics from the past 30 years and will remain a source of critical contention and keen interest among philosophers of metaphysics and philosophical logic for years to come **Report of the Commission with Annexures and Appendices ...: Appendix C (cont.): Minutes of evidence taken in Rhodesia, the Bechuanaland Protectorate, British Bechuanaland (Cape Colony), the Orange River Colony, Basutoland, the Transvaal Colony, and again in the Cape Colony** South African Native Affairs Commission,1904 The ^ASolidarity Solution Kristi A. Olson,2020-10-15 In this book Kristi A Olson addresses the question of fair labor income distribution by proposing the solidarity solution a new test she defines and defends as an answer She examines existing traditions in analytic philosophy and formal reasoning including the work of economists Kohn and Varian and philosophers Dworkin and Van Parijs and creatively applies these thought experiments to distributive philosophy Building specifically on the envy test which states that envy freeness is achieved when no one prefers someone else s circumstances to their own she develops her own solidarity solution fair labor income bundles must be impersonal envy free and derived from a relational ideal She also

relates the solidarity solution to concrete problems such as the gender wage gap and taxation *Social and Behavioural Macroeconomics* Christopher Tsoukis,Frédéric Tournemaine,Edward John Driffill,2025-03-28 Despite significant theoretical advances in social and behavioural macroeconomics little has been done to synthesise the disparate developments in these fields and point the way forward to future research directions and policy implications This book reviews unifies and extends diverse strands of thinking and shows how these theories can be used to improve macroeconomic modelling for policy development in a range of spheres The book explores how the most empirically relevant socio behavioural traits can widen the scope of macroeconomics to fruitfully address new issues and challenges such as rising inequality the change in the functional distribution of income labour and capital shares and a further understanding of the government spending multiplier Chapters also address more traditional topics such as macroeconomic policy effectiveness growth saving and labour supply Other more open ended themes of the book include whether the concept of individual rationality should be complemented by collective rationality whether socio behavioural traits underlie socially inefficient outcomes such as tragedies of the commons rat races financial crises and global warming and whether such traits can provide new foundations for New Keynesian macroeconomics This book will be essential reading for advanced researchers and students working in macroeconomics and other social sciences including psychology and politics as well as those working on the theoretical end of public policy

Persons, Interests, and Justice Nils Holtug,2010-04-22 In our lives we aim to achieve welfare for ourselves that is to live good lives But we also have another more impartial perspective where we aim to balance our concern for our own welfare against a concern for the welfare of others This is a perspective of justice Nils Holtug examines

these two perspectives and the relations between them The first part of the book is concerned with prudence more precisely with what the necessary and sufficient conditions are for having a self interest in a particular benefit It includes discussions of the extent to which self interest depends on preferences personal identity and what matters in survival It also considers the issue of whether it can benefit or harm a person to come into existence and what the implications are for our theory of self interest A prudential view is defended according to which a person has a present self interest in a future benefit if and only if she stands in a relation of continuous physical realization of appropriate psychology to the beneficiary where the strength of the self interest depends both on the size of the benefit and on the strength of this relation The second part of the book concerns distributive justice and so how to distribute welfare or self interest fulfilment over individuals It includes discussions of welfarism egalitarianism and prioritarianism population ethics the importance of personal identity and what matters for distributive justice and the importance of all these issues for various topics in applied ethics including the badness of death Here a version of prioritarianism is defended according to which roughly the moral value of a benefit to an individual at a time depends on both the size of the benefit and on the individual s self interest at that time in the other benefits that accrue to her at this and other times *The Limits of Individual Liberty* Francis Charles Montague,1885
