The Country Houses of Shropshire Gareth Williams, 2021 A gazetteer of the many fine Shropshire country houses which covers the architecture the owners family history and the social and economic circumstances that affected them Shropshire is the largest English inland county and has a wide variety of important landed country houses with owners from diverse social groups with links to trade in Liverpool Manchester and London as well as the local gentry This book is not simply about the houses they built but also about the people who lived in them and the context in which the houses are set The architecture is of course fully covered What is distinctive about the author's approach is that he treats the histories of the families their artistic tastes and their estates as an integral part of the character of each house Country houses can serve as a barometer of national tastes and of

the social and economic times in which they were built The work includes reference to the important sporting associations fine and decorative art collections and to important guests and social networks Unlike most architectural guides this aims at a wider readership and will be an important resource for social historians genealogists and local historians The Country Houses of Shropshire considers the history of 347 identified houses of varying importance those with a significant or influential history are given a main entry of up to 6000 words whilst lesser houses are treated with an entry of less than 1000 words All houses have footnoted entries enabling the reader to refer directly to source and to undertake further research themselves rtant guests and social networks Unlike most architectural guides this aims at a wider readership and will be an important resource for social historians genealogists and local historians The Country Houses of Shropshire considers the history of 347 identified houses of varying importance those with a significant or influential history are given a main entry of up to 6000 words whilst lesser houses are treated with an entry of less than 1000 words All houses have footnoted entries enabling the reader to refer directly to source and to undertake further research themselves rtant guests and social networks Unlike most architectural guides this aims at a wider readership and will be an important resource for social historians genealogists and local historians The Country Houses of Shropshire considers the history of 347 identified houses of varying importance those with a significant or influential history are given a main entry of up to 6000 words whilst lesser houses are treated with an entry of less than 1000 words All houses have footnoted entries enabling the reader to refer directly to source and to undertake further research themselves f less than 1000 words All houses have footnoted entries enabling the reader to refer directly to source and to undertake further research themselves

Shropshire John Newman,Nikolaus Pevsner,Gavin Watson,2006-01-01 This fully illustrated guide to Shropshire treats each city town and village in a detailed gazetteer and includes a variety of helpful maps plans and indexes along with an illustrated glossary The book is an invaluable reference work on the appealing and unspoiled county of Shropshire where many historic towns including Shrewsbury and Ludlow are especially plentiful in Georgian and timber framed buildings Shropshire boasts the Cistercian abbey of Buildwas and many important country houses including the 13th century fortified mansions at Acton Burnell and Stokesay John Nash s Italianate villa at Cronhill and Norman Shaw s splendid Late Victorian mansion at Adcote Shropshire is also home to numerous prehistoric hill forts and the Roman town at Wroxeter as well as Coalbrookdale s spectacular bridge the first in the world to be built of iron The unspoiled county of Shropshire is among the most appealing in England for lovers of architecture The county s many historic towns of which

Shrewsbury and Ludlow are the largest and are especially plentiful in Georgian and timber framed buildings. Shropshire's villages intriguingly varied in plan and building materials reflect the diverse landscape of plains, hills and moorland and the rich and complex underlying geology. The Cistercian abbey of Buildwas is the finest of several notable monastic ruins and outstanding medieval parish churches and castles are also numerous. Many of the country houses have a central place in the story of English architecture: the fortified mansions at Acton Burnell and Stokesay, thirteenth century design at its most sophisticated; the vigorous Baroque houses of John Prince and Francis Smith; John Nash's Italianate villa at Cronkhill looking like something in a Claude painting; Norman Shaw's splendid Late Victorian mansion at Adcote. Shropshire is also unrivalled for its early industrial remains including the spectacular bridge at Coalbrookdale, the first in the world to be built of iron. More ancient cultures are represented by the numerous prehistoric hill forts and the celebrated Roman town at Wroxeter. Each city, town or village is treated in a detailed gazetteer. A general introduction provides a historical and artistic overview. Numerous maps and plans, over a hundred new colour photographs, full indexes and an illustrated glossary help to make this book invaluable as both reference work and guide.

Ironbridge and Coalbrookdale Barrie Trinder, 2017-08. The Ironbridge Gorge, a cradle of the Industrial Revolution in the late 18th century, was a magnet for writers, artists and industrial spies. The latest wonders of engineering and metallurgical technology were to be seen in a spectacular natural setting where the fast-flowing Severn passed between towering cliffs of limestone and hillsides honeycombed with mine workings amid the smoke of furnaces and the clanking of engines. Barrie Trinder, the acknowledged authority on the subject, has selected the most interesting descriptions and pictures to provide an invaluable anthology through contemporary evidence of the place and the people in that pioneering period when this corner of Shropshire was changing the world and was indeed, as Charles Hulbert described it in 1837, 'the most extraordinary district in the world'. This book has become essential reading for anyone with an interest in the history of this fascinating area or in the Industrial Revolution in general. It brings new understanding of the gorge itself and the industrial monuments preserved there and new insights for the specialist historian, whether concerned with social conditions, popular religion or industrial technology. This edition will continue to serve the same main groups of readers: local historians, educational groups and specialist historians, and most of all those general readers who know the area and recognise that something strange and seminal happened there that transformed not only Ironbridge and Coalbrookdale but the whole of our civilisation. The activity that once made the gorge so extraordinary has spread and grown to become a commonplace in modern industrial societies, leaving the place where it began a monument and a museum.

Shropshire J. A. B. Somerset, 1994-01-01. The Records of Early English Drama volumes make available historical transcripts that provide evidence of early English drama, music, ceremonial dance and other forms of communal public entertainment in Britain before 1642, together with the necessary interpretive introductions and notes to explicate the materials for the reader. Shropshire in two volumes is the eleventh publication in the series. In the introduction Alan Somerset surveys the social and economic

history of each major borough and provides a commentary on the major issues raised in the documents He discusses travelling performers routes the places they performed and the remarkable public exhibitions of high wire artists camels bears and giants The records for this county are rich and varied providing new detail about local playing and festivities From Shrewsbury for example comes the complete documentation of a unique semi circular outdoor amphitheatre The documents reveal much from robbery and riots to the sometimes acrimonious disputes that show the growing Puritan opposition to sports which attempted to combat an equally stubborn affection for traditional customs These records are an invaluable addition to the scholarship of early drama establishing as they do part of the total context of the great drama of Shakespeare his predecessors and his contemporaries

The Practice of British Geology, 1750-1850 Hugh Torrens,2024-10-28 Geology is the most historical of all sciences Yet its own history remains neglected especially the many aspects of how geology was practised in the past This volume analyses the careers of some important practical figures in English Welsh Scottish and Irish geology between 1750 and 1850 These include people who would have regarded themselves more as mining engineers or coal viewers as they were then called in the vital coal industry or mineral surveyors as today s mineral prospectors were first called from 1808 or even inventors Their expertise in the land which led the industrial revolution took them all over the world Those included here went to Italy and South Peru and North America Virginia and Canada The practice of geology through the search for mines and minerals has been much less attended to by historians than the geology which was undertaken by leisured amateurs even though practical geology was as important in the past as the oil industry is today

The Significance and Social Impact of Quarrying in Shropshire in the 19th and 20th Centuries Robert S. Galloway,2019-06-19 Quarrying is one of the oldest industries known to man as from early times people have been making items from stone However the quarrying industry is only briefly mentioned in most archaeological and historical records with some books only giving a passing account of this activity This book alters this and provides an in depth analysis of this important industry not only with regards to Shropshire but the whole country Many structures in Shropshire and various parts of the country are constructed from stone quarried from this large county This book shows that quarries are not just holes or scars on the landscape highlighting the machinery used in extracting and processing the quarried minerals
