American Academy of Political and Social Science, 1921      **Report** Carnegie Endowment for International Peace, 1925      Worlds Apart Branko Milanovic, 2007-01-22 We are used to thinking about inequality within countries about rich Americans versus poor Americans for instance But what about inequality between all citizens of the world Worlds Apart addresses just how to measure global inequality among individuals and shows that inequality is shaped by complex forces often working in different directions Branko Milanovic a top World Bank economist analyzes income distribution worldwide using for the first time household survey data from more than 100 countries He evenhandedly explains the main approaches to the problem offers a more accurate way of measuring inequality among individuals and discusses the relevant policies of first world countries and nongovernmental organizations Inequality has increased between nations over the last half century richer countries have generally grown faster than poorer countries And yet the two most populous nations China and India have also grown fast But over the past two decades inequality within countries has increased As complex as reconciling these three data trends may be it is clear the inequality between the world's individuals is staggering At the turn of the twenty first century the richest 5 percent of people receive one third of total global income as much as the poorest 80 percent While a few poor countries are catching up with the rich world the differences between the richest and poorest individuals around the globe are huge and likely growing      **Antisemitism, Its History and Causes** Bernard Lazare, 1903      *The Annals of the American Academy of Political and Social Science*, 1921

Exploring globalization's role in the evolution of inequality Bourguignon takes an original and truly international approach to the decrease in inequality between nations the increase in inequality within nations and the policies that might moderate inequality's negative effects Demonstrating that in a globalized world it becomes harder to separate out the factors leading to domestic or international inequality Bourguignon examines each trend through a variety of sources and looks at how these inequalities sometimes balance each other out or reinforce one another Factoring in the most recent economic crisis Bourguignon investigates why inequality in some countries has dropped back to levels that have not existed for several decades and he asks if these should be considered in the context of globalization or if they are in fact specific to individual nations Ultimately Bourguignon argues that it will be up to countries in the developed and developing world to implement better policies even though globalization limits the scope for some potential redistributive instruments An informed and original contribution to the current debates about inequality this book will be essential reading for anyone who is interested in the future of the world economy
