place where big government first took root in America fostered what historian Steven Conn terms the anti urban impulse In response anti urbanists called for the decentralization of the city and rejected the role of government in American life in favor of a return to the pioneer virtues of independence and self sufficiency In this provocative and sweeping book Conn explores the anti urban impulse across the 20th century examining how the ideas born of it have shaped both the places in which Americans live and work and the anti government politics so strong today Beginning in the booming industrial cities of the Progressive era at the turn of the 20th century where debate surrounding these questions first arose Conn examines the progression of anti urban movements He describes the decentralist movement of the 1930s the attempt to revive the American small town in the mid century the anti urban basis of urban renewal in the 1950s and 60s and the Nixon administration s program of building new towns as a response to the urban crisis illustrating how by the middle of the 20th century anti urbanism was at the center of the politics of the New Right Concluding with an exploration of the New Urbanist experiments at the turn of the 21st century Conn demonstrates the full breadth of the anti urban impulse from its inception to the present day Engagingly written thoroughly researched and forcefully argued *Americans Against the City* is important reading for anyone who cares not just about the history of our cities but about their future as well

Violent Death in the City Roger Lane, 1979 Roger Lane uses the statistics on violent death in Philadelphia from 1839 to 1901 to study the behavior of the living His extensive research into murder suicide and accident rates in Philadelphia provides an excellent factual foundation for his theories A computerized study of every homicide indictment during the sixty two years covered is the source of the most detailed information Analysis of suicide and accident statistics reveals differences in behavior patterns between the sexes the races young and old professional and laborer native and immigrant and how these patterns changed overtime Using both these group differences and the changing overall incidence of the three forms of death Lane synthesizes a comprehensive theory of the influences of industrial urbanization on social behavior He believes that the demands of the rising industrial system as transmitted through factory school and bureaucracy combined to socialize city dwellers in new ways to raise the rate of suicide and to lower rates of simple accident and murder Finally Lane suggests a relation between these developments and the violent disorder in the postindustrial city which has lost the older mechanisms of socialization without finding any effective new ones Original and probing Lane s combination of statistics and theory makes this a significant new work in social urban and medical history
