The Chronically Ill Psychiatric Patient And The Community:

The Chronic Psychiatric Patient in the Community R.D. Budson, I. Barofsky, 2012-12-06 The purpose of this book is to present an integrated approach to the treatment of the chronic psychiatric patient living in the community. This requires that topics as diverse as pharmacokinetics, psychotherapy, and community organization be appropriately coordinated. Such an approach is partly complicated by the wide range of differences among patients in terms of social skills, intellectual capacity, and psychiatric diagnosis. In addition, unclear, insular, or overlapping roles of various mental health disciplines further confound integrated treatment efforts. Given such complexity, any single clinician's point of view is subject to the distortion inherent in specialization. Too often a volume in the field of mental health focuses either on only one aspect or presents only one clinician's unique perspective of a task that is in fact multifaceted. We have tried to avoid this pitfall by having representatives from many of the concerned professions present a variety of treatment approaches and associated issues in one text. Further, the editors have attempted to illuminate the relevant clinical and/or administrative interrelationship between the subjects of each section through a succinct introductory commentary. The book is divided into five sections. The first section represents an attempt to address some of the interactive sociological, psychological, and pharmacological background issues common to all attempts at treatment of this population. *The Chronically Ill Psychiatric Patient and the Community*

When human populations and their needs change, organizations responsible for their care inevitably react. With the rapidly and significantly increased demand for chronic care at mid-twentieth century, solutions deemed satisfactory in the past were entirely inadequate. Thus, community leaders and politicians began promoting several approaches to long-term care services in the two decades between 1945 and 1965, but without an adequate source of financing to establish an effective system. In contrast to acute care services, and despite the need, chronic care remained unavailable and of poor quality. This study consists of six chapters: an introduction and conclusion, along with four case studies that examine in detail the development of a long-term care system in Philadelphia between 1945 and 1965. *Community Mental Health Centers, Perspectives of the Seventies*, 1981 **Comprehensive Psychiatric Nursing** Judith Haber, 1987 **Building America's Health: The people speak; excerpts from regional public hearings on health** United States.
