## **The Civilization Of Christianity:**

*The Civilization of Christianity* John L. McKenzie, 2009-01-01 The devastating thesis of this book is that there is a deadly and irreconcilable opposition between western civilization and Christianity and that one of them must destroy the other Throughout his more than forty years of teaching and writing says John L McKenzie he felt a vague but strong discomfort a malaise He finally realized that it was a deliberately unrecognized discord between what I was and the word of God which I had so long studied My way of life and my world demanded the maintenance of a number of assumptions which the world of God compelled me to question My way of life and my world did not permit me to ask those questions When the questions grew to an intolerable number this book was the only way to find comfort the comfort which I hope is reached by at last achieving total candor And candid John McKenzie is in this piercing analysis of the confrontation between Christianity and a world which has twisted it softened it rationalized it and evaded its basic precepts **The Story of Christianity** Jean-Pierre Isbouts, 2014 Focuses on the rich social and cultural history of Christianity through the ages from its roots in Palestine to its development as a global movement **How Christianity Saved Civilization** Mike Aquilina, 2019-01-11 These eye opening pages document the many ways in which Christians penetrated and civilized that debased Roman empire introducing then radical notions such as the equal dignity of women respect for life protection of the weak and vulnerable and the obligation of rulers to serve those they rule and maximize their freedom *An Outline of Christianity*, 1926 **The Influence of Christianity on Civilization** Benjamin Franklin Underwood, 1889 Christianity S Contributions to Civilization Charles David Eldridge, 2018-11-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant Christianity and Western Civilization Carlton Joseph Huntley Hayes, 1954 **How Christianity Changed the World** Alvin J. Schmidt, 2009-12-15 Western civilization is becoming increasingly pluralistic secularized and biblically illiterate Many people today have little sense of how their lives have benefited from Christianity s influence often viewing the church with hostility or resentment How Christianity Changed the World is a topically arranged Christian history for Christians and non Christians Grounded in solid research and written in a popular style this book is both a helpful apologetic tool in talking with unbelievers and a source of evidence for why Christianity deserves credit for many of the humane social scientific and cultural advances in the Western world in the last two thousand years Photographs timelines

Brownson: Explanations and index Orestes Augustus Brownson, 1887 **CHRISTIANITY AND WORLD CIVILIZATION** Li Jin Wei, 2022-09-02 Christianity constitutes the civilization to which we all in some way belong Therefore we can't consider it in the same way as ancient civilizations which we can only glimpse through the opaque medium of archeology or in the same way as the civilizations of the non European world that we strive to understand outside and from afar This implies a difference in the quality of our judgment which can be compared to the astronomer's science of a planet and the geographer's knowledge of the earth we live on For the study of Western civilization not only do we have a much more abundant reserve of materials than any other but we also have a more profound and intimate knowledge of it Western civilization is the atmosphere in which we breathe and the life we live It is our way of life and that of our ancestors therefore we know it not only from documents and monuments but also through our personal experience Let us imagine for a moment a study of religion that ignored or left aside the accumulated experience of the Christian past that he used only the distant and partly incomprehensible testimonies drawn from the study of foreign religious traditions that he resorted to abstract notions about the nature of religion and the conditions of spiritual knowledge Such a study would be incomplete inconsistent and without truth This shows us the way forward in considering the problem of the relationship between religion and civilization It is an intricate and pervasive web of connections that unite social life with spiritual beliefs and values beliefs and values that are recognized by society as the supreme norms of life and the definitive models of individual and social behaviour because these relationships can only be concretely studied in their total historical reality The world's great religions are rivers of sacred traditions flowing through the centuries and the changing historical landscape they rinse and fertilize Still ordinarily we cannot go up to the source lost in the unexplored regions of a distant past It is rarely possible to find a civilization in which religious evolution can be traced from one end to the other in the whole light of history

*Christianity and Modern Civilization* William Samuel Lilly, 1903 **CHRISTIANITY AND WORLD CIVILIZATION** Dr. LI, JIN WEI, 2022-09-01 Christianity constitutes the civilization to which we all in some way belong Therefore we can't consider it in the same way as ancient civilizations which we can only glimpse through the opaque medium of archeology or in the same way as the civilizations of the non European world that we strive to understand outside and from afar This implies a difference in the quality of our judgment which can be compared to the astronomer's science of a planet and the geographer's knowledge of the earth we live on For the study of Western civilization not only do we have a much more abundant reserve of materials than any other but we also have a more profound and intimate knowledge of it Western civilization is the atmosphere in which we breathe and the life we live It is our way of life and that of our ancestors therefore we know it not only from documents and monuments but also through our personal experience Let us imagine for a moment a study of religion that ignored or left aside the accumulated experience of the Christian past that he used only the distant

and partly incomprehensible testimonies drawn from the study of foreign religious traditions that he resorted to abstract notions about the nature of religion and the conditions of spiritual knowledge. Such a study would be incomplete, inconsistent, and without truth. This shows us the way forward in considering the problem of the relationship between religion and civilization. It is an intricate and pervasive web of connections that unite social life with spiritual beliefs and values, beliefs and values that are recognized by society as the supreme norms of life and the definitive models of individual and social behaviour, because these relationships can only be concretely studied in their total historical reality. The world's great religions are rivers of sacred traditions flowing through the centuries and the changing historical landscape; they rinse and fertilize. Still, ordinarily we cannot go up to the source lost in the unexplored regions of a distant past. It is rarely possible to find a civilization in which religious evolution can be traced from one end to the other in the whole light of history. But the history of Christianity is an extraordinary exception to this rule. We know the historical framework in which it first arose; we have letters from the Churches' founders to the first Christian communities in Europe, and we can trace the new religion's entry into the West in great detail. After that, and especially during the last sixteen centuries, the quantity of documents available for study is so considerable that a single intelligence cannot grasp them in their entirety. Consequently, the study of Western religion and civilization is complex and challenging for a reason contrary to that which makes the study of ancient or prehistoric Eastern religions difficult: we know too much rather than too little. But while this specialization has succeeded in increasing our knowledge in almost all aspects of history, it has had a deleterious influence on the study that occupies us, as it has led to the separating and dividing elements that we must bring together. On the one hand, the scientific historian has concentrated his research on the criticism of sources and documents, while on the other, the student of Christianity has devoted himself to the history of dogmas and ecclesiastical institutions. The result is that we have many different and very advanced kinds of studies: constitutional history, political history, and economic history on the one hand; ecclesiastical history, history of dogmas, and history of the liturgy on the other. But the vital subject of reciprocity of influence between religion and civilization, and the fecundating power of the latter, meanwhile, new social forces have emerged outside the academic world that uses history or a particular version of history for social ends to transform human life and actions. And the appearance of these new political ideologies of history has shown that the progress of scientific specialization has in no way diminished man's need for a historical faith for an interpretation of contemporary civilization in terms of social evolution and goals. Spiritual, whether these ends are defined in religious or secular formulas. This conflict of ideologies, the Marxist doctrine of historical materialism, and the attempt of the new totalitarian states to create historical myths as the psychological basis of social unity.

The Thinking Christian Gene Wesley Marshall, 2020-04-13 The practice of Christianity is going through a transition that is deeper than the Reformation. The Thinking Christian explores two main questions: 1. What is religion as a general social process that can link humans to Profound Reality? and 2. What is a meaningful and appropriate mode of Christian theologizing?

communal life and mission to this planet for a viable and vital next Christian practice These are profound probes and they are communal and activist guidelines for general readers Such union of the profound and the practical pertains to the needs of scholars as well

**How Christianity Built Western Civilization** Dr. Alex Locay,2022-01-05 Today the voices from the secular left are hard at work removing any trace of religion from government and the law Meanwhile secular historians have successfully limited Christianity's contribution in history to the Crusades and Inquisitions as if that is all Christians have to speak for The real story is quite different primarily that everything good in Western Civilization has its roots in the Christian religion How Christianity Built Western Civilization is the epic tale of how our Christian forefathers stood up to history's darkest forces to forge a new way of life grounded in the biblical worldview Over the centuries it has become evident that Western Civilization has emerged as mankind's greatest achievement It is here where the greatest political and economic systems were born and here that we see the concept of human rights emerge along with the modern scientific process and the greatest discoveries It is in the West that we find the most advanced educational institutions along with the greatest charities artistic masterpieces and architectural innovations Is this a coincidence or the deliberate result of our worldview How Christianity Built Western Civilization answers this question with chapters on human rights modern science universal education charity art and architecture focusing entirely on the revolutionary milestones and individuals that made these achievements possible Each chapter unfolds chronologically starting with the biblical foundation and moving through the work of the early and Medieval Church arriving at modern times The author builds a compelling case demonstrating how Western Civilization would be indistinguishable from India China or Africa today if not for the teachings of Christ and the Bible

**What's So Great About Christianity** Dinesh D'Souza,2008-11-04 Is Christianity true Can educated thinking people really believe the Bible Or do the atheists have it right Has Christianity been disproved by science and discredited as a guide to morality Best selling author Dinesh D Souza What's So Great About America approaches Christianity with a skeptical eye but treats the skeptics with equal skepticism The result is a book that will challenge the assumptions of doubters and affirm that there really is indeed something great about Christianity
