and humanities      Machines of Nature and Corporeal Substances in Leibniz Justin E. H. Smith, Ohad Nachtomy, 2011-01-04  
In recent decades there has been much scholarly controversy as to the basic ontological commitments of the philosopher Gottfried Wilhelm Leibniz 1646 1716 The old picture of his thought as strictly idealistic or committed to the ultimate reduction of bodies to the activity of mind has come under attack but Leibniz's precise conceptualization of bodies and the role they play in his system as a whole is still the subject of much controversy One thing that has become clear is that in order to understand the nature of body in Leibniz and the role body plays in his philosophy it is crucial to pay attention to the related concepts of organism and of corporeal substance the former being Leibniz's account of the structure of living bodies which turn out for him to be the only sort of bodies there are and the latter being an inheritance from the Aristotelian hylomorphic tradition which Leibniz appropriates for his own ends This volume brings together papers from many of the leading scholars of Leibniz's thought all of which deal with the cluster of questions surrounding Leibniz's philosophy of body

Aicher, 2015-03-09 Otl Aicher 1922 1991 was an outstanding personality in modern design he was a co founder of the

legendary Hochschule für Gestaltung HfG the Ulm School of Design Germany His works since the fifties of the last century in the field of corporate design and his pictograms for the 1972 Summer Olympics in Munich are major achievements in the visual communication of our times An integral component of Aicher's work is that it is anchored in a philosophy of making inspired by such thinkers as Ockham Kant or Wittgenstein a philosophy concerned with the prerequisites and aims the objects and claims of design Aicher's complete theoretical and practical writings on design which include all other aspects of visual creativity such as architecture are available with this new edition of the classic work If Aicher prefers the analogous and concrete to the digital and abstract he does it with a philosophical intention He relativizes the role of pure reason He criticizes the rationality of Modernism as a result of the dominance of purely abstract thinking Anyone who prefers the abstract to the concrete does not only misunderstand the mutual dependence of concept and view In Aicher's judgement he is also creating a false hierarchy a rank order that is culturally fatal Things that are digital and abstract are not greater higher and more important than things that are analogous and concrete Wilhelm Vossenkuhl *The Gospel in Nature* Henry Christopher McCook, 1887 **The Academy**, 1869 **Academy; a Weekly Review of Literature, Learning, Science and Art**, 1869 The Poetical gazette the official organ of the Poetry society and a review of poetical affairs nos 4 7 issued as supplements to the Academy v 79 Oct 15 Nov 5 Dec 3 and 31 1910 Outlook Alfred Emanuel Smith, Francis Walton, 1895 **The Outlook**, 1895 Cultural Histories of Ageing Margery Vibe Skagen, 2021-05-12 Drawing on sixteenth to twenty first century American British French German Polish Norwegian and Russian literature and philosophy this collection teases out culturally specific conceptions of old age as well as subjective constructions of late life identity and selfhood The internationally known humanistic gerontologist Jan Baars the prominent historian of old age David Troyansky and the distinguished cultural historian and pioneer in the field of literature and science George Rousseau join a team of literary historians who trace out the interfaces between their chosen texts and the respective periods medical and gerontological knowledge The chapters in depth analyses of major and less known works demonstrate the rich potential of fiction poetry and autobiographical writing in the construction of a cultural history of senescence These literary examples not only bear witness to longue durée representations of old age and epochal transitions regarding cultural attitudes to the aged they also foreground the subjectivities that produced some of these representations and that continue to communicate with readers of other times and places By casting a net over a variety of authors genres periods and languages the collection gives a broad sense of how literature is among the richest and most engaging sources for historicizing the ageing self Anthropology and Nature Kirsten Hastrup, 2013-08-15 On the basis of empirical studies this book explores nature as an integral part of the social worlds conventionally studied by anthropologists The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making The present interest in the natural world is partly a response to large scale natural disasters and global climate

change and to a keen sense that nature matters matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co species development to macro ecological changes of weather and climate Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work The book thus opens up a space for new forms of reflection on how natures and societies are generated      **The Guide to Nature** ,1915
