California Institute of Technology in Pasadena Einstein's work focuses on the teleparallel approach to unified field theory on which he engages in intensive correspondence with Lie Cartan and begins his collaboration with Walther Mayer He also presents popular accounts of his work surveying the historical progression from classical to twentieth century physics leading up to the latest developments in unified field theory He also engages in lively exchanges on both technical and foundational issues in quantum mechanics with W Pauli M Born M Schlick and others His personal correspondence reflects eventful changes the Einsteins realize their dream of owning a summer house outside Berlin Einstein becomes a grandfather his younger son Eduard commences his university studies and has his first serious mental health crisis and his younger stepdaughter Margot gets married Einstein's ties to the Zionist movement are seriously tested in the wake of the violence that erupts in British Mandate Palestine in 1929 to which he reacts with forceful calls for a genuine symbiosis between Jews and Arabs proposing the establishment of joint administrative economic and social organizations He warns that without finding the path to honest cooperation and honest negotiations with the Arabs we Jews have learned nothing from our two thousand year ordeal and deserve the fate that will befall us In Germany too Einstein champions democracy in the face of rising support for the Nazi Party is active on behalf of Jewish refugees opposes the death penalty and supports abortion rights and the decriminalization of homosexuality Einstein promotes pacifism more vigorously His efforts to promote peace follow three distinct transnational avenues disarmament conscientious objection and apolitical pacifism aimed to find practical mechanisms to restrict the nation state

The Collected Papers of Albert Einstein, Volume 14 Albert Einstein, 1987

The more than one thousand letters and several dozen writings included in this volume cover the years immediately before the final formulation of new quantum mechanics The discovery of the Compton effect in 1923 vindicates Einstein's light quantum hypothesis Niels Bohr still criticizes Einstein's conception of light quanta and advances an alternative theory but Walther Bothe and Hans Geiger perform a difficult experiment that decides in favor of Einstein's theory At the same time Satyendranath Bose sends a new quantum theoretical derivation of Planck's law to Einstein and he discovers what is now known as Bose Einstein condensation Einstein attempts to reformulate a unified theory of the gravitational and electromagnetic fields In early November 1923 Einstein flees overnight to the Netherlands in the wake of threats on his life and anti-Semitic rioting in Berlin He rejoins the International Committee on Intellectual Cooperation in June 1924 and supports the idea of a European union He joins the board of governors of Hebrew University which opens in April 1925 and celebrates the event in Buenos Aires while on a seven week lecture tour of Argentina Uruguay and Brazil During this period he delivers lectures meets with heads of state visits major institutions and attends receptions hosted by the local Jewish and German communities He has a serious but short lived falling out with his son Hans Albert and his first wife Mileva Maric Einstein over how to invest part of the Nobel Prize money and he rescues his sister Maja and her husband from debt on their house Einstein has a fourteen month romantic relationship with his secretary Betty Neumann which he ends in October 1924

Collected Papers of Albert Einstein, Volume 12 (english) - the Berlin Years Albert Einstein, 2009 The Collected Papers of Albert Einstein, Volume 15 Albert Einstein, 1987 This volume covers one of the most thrilling two year periods in twentieth century physics as matrix mechanics developed chiefly by W Heisenberg M Born and P Jordan and wave mechanics developed by E Schrödinger supplanted the earlier quantum theory The almost one hundred writings by Einstein of which a third have never been published and the more than thirteen hundred letters show Einstein's immense productivity and hectic pace of life Einstein quickly grasps the conceptual peculiarities involved in the new quantum mechanics such as the difference between Schrödinger's wave function and a field defined in spacetime or the emerging statistical interpretation of both matrix and wave mechanics Inspired by correspondence with G Y Rainich he investigates with Jakob Grommer the problem of motion in general relativity hoping for a hint at a new avenue to unified field theory Einstein falls victim to scientific fraud when in a collaboration with E Rupp he becomes convinced that the latter's experiments aimed at deciding whether excited atoms emit light instantaneously in quanta or in a finite time in waves confirm a wave theoretic explanation While it was known that the teenage Einstein had been romantically involved with Marie Winteler in 1895 newly discovered documents reveal that his love for Marie was rekindled in 1909-10 while he was still married to Mileva Marić The 1925 Locarno Treaties renew Einstein's optimism in European reconciliation He backs the International manifesto against compulsory military service and continues his participation in the League of Nations International Committee on Intellectual Cooperation He remains intensely committed to the shaping of the Hebrew University in Jerusalem although his enthusiasm for this cause is sorely tested **The Collected Papers of Albert Einstein, Volume 12 (English)** Albert Einstein, 2009-07-26 Every document in The Collected Papers of Albert Einstein appears in the language in which it was written and this supplementary paperback volume presents the English translations of all non English materials This translation does not include notes or annotation of the documentary volume and is not intended for use without the original language documentary edition which provides the extensive editorial commentary necessary for a full historical and scientific understanding of the documents **The Collected Papers of Albert Einstein: The Berlin years: writings & correspondence, April 1923-May 1925** Albert Einstein, 1987
