Higher Education in Texas Charles R. Matthews, 2018-02-15 Higher Education in Texas is the first book to tell the history, defining events, and critical participants in the development of higher education in Texas from approximately 1838 to 1970. Charles Matthews, Chancellor Emeritus of the Texas State University System, begins the story with the land grant policies of the Spanish-Mexican Republic of Texas and the State of Texas that led to the growth of Texas. Religious organizations supplied the first of many colleges years before the Texas Legislature began to fund and support public colleges and universities. Matthews devotes a chapter to the junior community colleges and their impact on providing a low-cost education alternative for local students. These community colleges also played a major role in economic development in their communities. Further chapters explore the access and equity in educating women, African Americans, and Hispanics.

The Case Against the SAT James Crouse, Dale Trusheim, 1988-03-31 The College Entrance Examination Board and the Educational Testing Service claim that the SAT helps colleges select students, helps college-bound students select appropriate institutions, and furthers equality of opportunity. But does it really? Drawing on three national surveys and on hundreds of studies conducted by colleges, the authors refute the justifications the College Board and the ETS give for requiring high school students to take the SAT. They show that the test neither helps colleges and universities improve their admissions decisions nor helps applicants choose schools at which they will be successful. They outline the adverse effect the SAT has on students from nonwhite and low-income backgrounds. They also question the ability of the College Board and the ETS to monitor themselves adequately. The authors do not, however, recommend abolishing either college admissions testing or the College Board and the ETS. Rather, they propose dropping the SAT and relying on such already available measures as students' high school coursework and grades, and they raise the possibility that new achievement tests that measure the mastery of high school courses could be developed to replace the SAT.
