### **Reaganism in Literary Theory**

Jeremiah Bowen, 2020-07-15 Reaganism is a discourse of devotion and disqualification combining a neoliberal negative theology of the market with a neoconservative demonization of opponents Reagan's personality cult shelters the aggressivity of a war of all against all by representing the market as a moralistic standard of perfection a representation of goodness and freedom In literary theory and criticism a homologous valuative system centered itself on the canon representing culture as a study of perfection Paul de Man argued for the displacement of this positive moralistic reference but his proposals ultimately replace it with a negative moralistic reference to literariness De Man's premises have been perpetuated in subsequent theory by persistent misrecognitions of dialectic as suspicious hermeneutics of materialism as reference to materiality and of demands for democratic equity as identity politics Tracing this motivated reasoning through misreadings of Eve Sedgwick's critique of conspiracy theory and Edward Said's secular criticism we are led back to the unexamined premises of Paul de Man's negative moralism and the opportunistic competition of academic careerism

**The Bible and the University** Zondervan, 2009-09-03 It is well known that the Western university gradually evolved from the monastic stadium via the cathedral schools of the twelfth century to become the remarkably vigorous and interdisciplinary European institutions of higher learning that transformed Christian intellectual culture in the thirteenth and fourteenth centuries It is equally well known that subsequent disciplinary developments in higher education including the founding and flourishing of many of the most prestigious of North American universities owe equally to the Protestant and perhaps particularly Calvinist influence But that the secularized modern university that descended from these developments is now in something of an identity crisis is becoming widely and often awkwardly apparent The reason most often given for the crisis is our general failure to produce a morally or spiritually persuasive substitute for the authority that undergirded the intellectual culture of our predecessors This is frequently also a reason for the discomfort many experience in trying to address the problem for it requires an acknowledgement at least that the secularization hypothesis has proven inadequate as a basis for the sustaining of coherence and general intelligibility in the university curriculum Nowhere is this more apparent than in the disciplines of biblical studies and theology which once were the anchor or common point of reference for theological thought but which are now both marginalized in the curriculum and

internally divided as to meaning and purpose even where the Church itself is concerned In this final volume of the Scripture and Hermeneutic Series a group of distinguished scholars have sought to understand the role of the Bible in relation to the disciplines in a fresh way Offered in a spirit of humility and experimentally the essays here consider the historic role of the Bible in the university the status of theological reflection regarding Scripture among the disciplines today the special role of Scripture in the development of law the humanities and social sciences and finally the way the Bible speaks to issues of academic freedom intellectual tolerance and religious liberty Contributors Include Dallas Willard William Abraham Al Wolters Scott Hahn Glenn Olsen Robert C Roberts Byron Johnson Robert Cochran Jr David I Smith John Sullivan Robert Lundin C Stephen Evans David Lyle Jeffrey

**History of Humanity** UNESCO, 2005-12-31 Volume V of the History of Humanity is concerned with the early modern period the sixteenth seventeenth and eighteenth centuries It gives an extensive overview of this crucial stage in the rise of the West as well as examining the development of cultures and societies elsewhere Structure The volume is divided into two main parts The first is thematic discussing the geography chronology and sociology of cultural change in this period The second is regional less theoretical and more empirical it stresses cultural diversity the links between different activities in a given region and the importance of social contexts and local circumstances Each chapter has a bibliography which directs the reader to sources of further information The volume is extensively illustrated with line drawings and plates and is comprehensively indexed

**A Short History of Western Ideology** Rolf Petri, 2018-02-22 We are arguably living in a postideological era However when we tune into the TV news we can hear political leaders talk about advanced societies geopolitical experts suggest humanitarian interventions and sober events presenters qualify a murder as barbaric What does this mean In this comprehensive book Rolf Petri reveals how our everyday political language is full of ideological representations of the world and places them in an accessible historical narration From the secularization of Europe and the Enlightenment project of civilization to the contemporary preoccupation with ecological catastrophes or the end of history A Short History of Western Ideology carves out the central elements of western ideology It focuses on a wide variety of issues including religion colonialism race and gender which are essential for how we conceive of the modern world By creating an

awareness of the ideological character of the western worldview its limits and its flaws this book warns us of the dangers that derive from a self righteous mindset It is stimulating and important reading for history and politics students seeking to understand the ideology of the western world      *Conservation Concepts* Kurt Jax,2023-10-31 This book provides a review of the multitude of conservation concepts both from a scientific philosophical and social science perspective asking how we want to shape our relationships with nature as humans and providing guidance on which conservation approaches can help us to do this Nature conservation is a contested terrain and there is not only one idea about what constitutes conservation but many different ones which sometimes are conflicting Employing a conceptual and historical analysis this book sorts and interprets the differing conservation concepts with a special emphasis on narrative analysis as a means for describing human nature relationships and for linking conservation science to practice and to society at large Case studies illustrate the philosophical issues and help to analyse major controversies in conservation biology While the main focus is on Western ideas of conservation the book also touches upon non Western including indigenous concepts The approach taken in this book emphasises the often implicit strategic and societal dimensions of conservation concepts including power relations In finding a path through the multitude of concepts the book showcases that it is necessary to maintain the plurality of approaches in order to successfully address different situations and societal choices Overall this book highlights the very tension which conservation biology must withstand between science and society between what is possible and what we want individually or as a society or even more what is desirable Bringing some order into this multitude will support more efficient conservation and conservation biology This book will be of great interest to students and scholars studying nature conservation from a variety of disciplines including biology ecology anthropology sociology geography and philosophy It will also be of use to professionals wanting to gain an understanding of the broad spectrum of conservation concepts and approaches and when to apply them
