The Best-laid Plans

Randal O'Toole, 2007 Drawing on 30 years of experience reviewing hundreds of government plans Randal O Toole shows that thanks to government planners American cities are choked with congestion major American housing markets have become unaffordable and the cost of government infrastructure is spiraling out of control The book makes the case for repeal of federal planning laws and closure of government planning offices Every American who worries about the insidious growth of the Nanny State must read this book **The Ideal Communist City. The Human City Joel Kotkin, 2016-04-12 The author of The

Coming of Neo Feudalism and The New Class Conflict challenges conventions of urban planning Around the globe most new urban development has adhered to similar tenets tall structures small units and high density In *The Human City* Joel Kotkin called America's uber geographer by David Brooks of the New York Times questions these nearly ubiquitous practices suggesting that they do not consider the needs and desires of the vast majority of people Built environments Kotkin argues must reflect the preferences of most people even if that means lower density development *The Human City* ponders the purpose of the city and investigates the factors that drive most urban development today Armed with his own astute research a deep seated knowledge of urban history and a sound grasp of economic political and social trends Kotkin pokes holes in what he calls the retro urbanist ideology and offers a refreshing case for dispersion centered on human values This book is not anti urban but it does advocate a greater range of options for people to live the way they want at all stages of their lives Praise for *The Human City* Kotkin presents the most cogent evidence based and clear headed exposition of the pro suburban argument In pithy readable sections each addressing a single issue he debunks one attack on the suburbs after another But he does more than that He weaves an impressive array of original observations about cities into his arguments enriching our understanding of what cities are about and what they can and must become Shlomo Angel Wall Street Journal The most eloquent expression of urbanism since Jane Jacobs's *The Death and Life of Great American Cities* Kotkin writes with a strong sense of place he recognizes that the geography and traditions of a city create the contours of its urbanity Ronnie Wachter Chicago Tribune

Urbanization in China Richard J R Kirkby, 2018-01-12 Originally published in 1985 *Urbanisation in China* is based on extensive original research and fieldwork considers the whole problem of urbanisation in China Starting with an outline of the pre communist legacy the author traces population changes and urban growth throughout the communist period assesses policies aimed at restricting urban growth and contrasts the reality of urban China with the image the authorities have tried to project The policy changes that occurred following the death of Mao are analysed and concludes with a consideration of likely developments up to the end of the century

Urban Planning and its Discontents Darshini Mahadevia, Rutool Sharma, 2023-10-16 This book, the first of its kind, introduces various aspects of urban planning in India and contributes towards debates on changes required in the current practice. Urban planning in India means many things to city residents and is used generically to include all interventions in the cities such as public policy, design, institutional design, spatial and territorial plans, infrastructure plans, public administration, community participation, and their implementation through programmes, schemes, and projects. While urban planning is expected to meet the global development agendas of equitable and just urbanisation, climate change, and sustainable development goals (SDGs), in practice it has largely remained confined to statutory spatial planning represented by Master Plan or Comprehensive Plan. This volume delves into this world of urban planning as critical insiders to see how it works in India, analysing the city-level spatial plans, the Master or Development Plans of select cities to assess whether these are capable of addressing the global agendas and coordinate with all other plans prepared for the city. It examines whether it would work in reference to the contemporary issues, SDGs, and global agendas and discusses strategies on how to make it work better. It also deals with each of the above-stated criticisms of the practice and examines the debates, data, approaches, agendas, plans, and the future of urban planning in India. This book comes in at a time when the urban planners and policy makers have themselves begun to discuss a need to relook at urban planning practices and tools to meet the future requirements of urbanisation in India. It will be a useful reference volume for the students, scholars, and practitioners alike and be of interest to researchers and students of urban planning, architecture, public administration, civil engineering, geography, economics, and sociology. It will also be useful for policy makers and professionals working in the areas of town and country planning.

Economic Science Fictions William Davies, 2018-05-04 An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new

syntheses merging social science with fiction design with politics scholarship with experimental forms With an opening chapter from Ha Joon Chang as well as theory short stories and reflections on design this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists Contributors AUDINT Khairani Barokka Carina Brand Ha Joon Chang Miriam Cherry William Davies Mark Fisher Dan Gavshon Brady and James Pockson Owen Hatherley Laura Horn Tim Jackson Mark Johnson Bastien Kerspern Nora O Murch Tobias Revell et al Judy Thorne Sherryl Vint Joseph Walton Brian Willems **Spatial Revolution** Christina E. Crawford, 2022-02-15 Spatial Revolution is the first comparative parallel study of Soviet architecture and planning to create a narrative arc across a vast geography The narrative binds together three critical industrial residential projects in Baku Magnitogorsk and Kharkiv built during the first fifteen years of the Soviet project and followed attentively worldwide after the collapse of capitalist markets in 1929 Among the revelations provided by Christina E Crawford is the degree to which outside experts participated in the construction of the Soviet industrial complex while facing difficult topographies near impossible deadlines and inchoate theories of socialist space making Crawford describes how early Soviet architecture and planning activities were kinetic and negotiated and how questions about the proper distribution of people and industry under socialism were posed and refined through the construction of brick and mortar steel and concrete projects living laboratories that tested alternative spatial models As a result Spatial Revolution answers important questions of how the first Soviet industrialization drive was a catalyst for construction of thousands of new enterprises on remote sites across the Eurasian continent an effort that spread to far flung sites in other socialist states and capitalist welfare states for decades to follow Thanks to generous funding from Emory University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Re-Humanizing Architecture Ákos Moravánszky, Judith Hopfengärtner, 2016-12-19 After the Second World War a divided Europe was much affected by a period of reconstruction This was influenced by the different political systems in the socialist East and in the capitalist West the focus was on cohesion in society and its cultural and architectural expression In parallel to the rapidly progressing industrialization of the building industry debates on the humanization of the built environment were led on both sides with great intensity The volume shows how on the back of existentialism new monumentality and socialist realism quite similar concepts and strategies were developed in order to find answers to questions relating to adequate structures for new forms of community and identity The Elemental Metropolis Qinyi Zhang, 2023-08-04 This book provides a multi scale reading of the spatial elements in which the extensive urbanity in Yangtze River Delta is constructed and from there an imagination of a new paradigm of urbanization The urbanization in Yangtze River Delta today is in need of a new interpretation and paradigm The delta is a territory with city cores but it also has vast

dispersed urbanization where the agricultural and non agricultural activities and spaces are mixed and interlinked a

The Politics of Equality Jason C. Myers,2010-12-09 Why are socialists communists and social democrats concerned with
the distribution of wealth Why do they place so much importance on public goods such as education and health care To what
extent does democracy matter to socialist ideologies In *The Politics of Equality* Jason C Myers sheds new light on questions
like this providing a readable contemporary introduction to egalitarian political philosophy Concentrating on ideas and values
rather than on the rise and fall of parties and movements the book offers crucial insights into a vital tradition of political
thought and how it is key to our understanding of contemporary debates from Obama s plans for a national health care
programme to the recent global wave of economic state regulation This is essential reading for anyone interested in
constructing a more just society *The History of Cartography, Volume 6* Mark Monmonier,2015-05-18 For more than thirty
years the History of Cartography Project has charted the course for scholarship on cartography bringing together research
from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century
continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The
twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously
unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and
reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding
Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all
parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly
demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced
volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert
contributors provide both original research often based on their own participation in the developments they describe and
interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive
volume is a reference work of first resort for all who study and love maps
