Services Science Bernd Stauss, Kai Engelmann, Anja Kremer, Achim Luhn, 2007-10-15 The service sector has dominated advanced economies for years In many countries it accounts for more than 70% of gross domestic product and approximately the same percentage of all employees work in this sector To reflect the economic relevance of the service sector services science must be established as an academic discipline But the path in pursuit of this goal is riddled with challenges especially in the fields of services research service oriented education and service related collaborations This book includes detailed articles and short statements on each field written by academics and experts They explain which challenges need to be met by research and academic training in the services community of the 21st century The contributions contained in this book reflect the content of presentations and statements given at the first German Services Science Conference

Basic Research And Industrial Innovation In China Xielin Liu, Yubing He, Peng Cheng, 2018-10-31 Chinese enterprises have relied on importing technology and imitation as their main technology strategies in the past Based on analysis of cross countries case studies and the history of industrial innovation the authors proposed the concept of industry driven basic research and expounds the important role of scientific discovery in industrial technological innovation They are convinced that both the government and enterprises should focus on industry driven basic research in order to bridge the gap between the government's target and what enterprises actually do in China The challenge remains to be seen if China can transform Science and technology investment

into real industrial innovation capability *Technology Transfer Systems in the United States and Germany* National Academy of Engineering, Fraunhofer Institute for Systems and Innovation Research, 1997-09-26 This book explores major similarities and differences in the structure conduct and performance of the national technology transfer systems of Germany and the United States It maps the technology transfer landscape in each country in detail uses case studies to examine the dynamics of technology transfer in four major technology areas and identifies areas and opportunities for further mutual learning between the two national systems **The Business of Higher Education** John C. Knapp Ph.D., David J. Siegel, 2009-10-22 At a time of great economic uncertainty The Business of Higher Education looks at the pros and cons of colleges and universities taking a more business like approach to fulfilling their missions How can colleges and universities navigate their way between shrinking commitments and the increasing expectations of their students Does the answer lie in taking a more business like approach This extraordinary resource considers the costs and benefits to both public and private institutions and to society when academe embraces business models for improving cost efficiency marketing hiring practices and customer service Bringing together a diverse team of contributors from the academic and business worlds The Business of Higher Education offers 35 essays in three volumes The first volume explores issues of leadership and culture the second focuses on management and fiscal strategies and the third volume takes up issues of marketing and consumer interests Throughout the work balances the contrasting perspectives of those within the academy and those outside of it as it considers whether higher education and the public interest are ultimately helped or harmed by the application of business methods to essential academic functions Safe Medical Devices for Children Institute of Medicine, Board on Health Sciences Policy, Committee on Postmarket Surveillance of Pediatric Medical Devices, 2006-01-20 Innovative medical devices have helped reduce the burden of illness and injury and improve the quality of life for countless children Mechanical ventilators and other respiratory support devices rescue thousands of fragile newborns every year Children who once would have died of congenital heart conditions survive with the aid of implanted pacemakers mechanical heart valves and devices that close holes in the heart Responding to a Congressional request the Institute of Medicine assesses the system for postmarket surveillance of medical devices used with children The book specifically examines The Food and Drug Administration's monitoring and use of adverse event reports The agency's monitoring of manufacturers fulfillment of commitments for postmarket studies ordered at the time of a device's approval for marketing The adequacy of postmarket studies of implanted devices to evaluate the effects of children's active lifestyles and their growth and development on device performance Postmarket surveillance of medical devices used with children is a little investigated topic in part because the market for most medical products is concentrated among older adults Yet children differ from adults and their special characteristics have implications for evaluation and monitoring of the short and long term safety and effectiveness of medical devices used with young patients Handbook of Research on Driving Competitive Advantage through Sustainable, Lean,
