abstract This research investigates the intricate relationship between air pollution and respiratory health by integrating real time air quality data with longitudinal health records Using sophisticated statistical techniques including multivariate regression and machine learning algorithms we analyze the impact of key pollutants such as PM2.5 PM10 NOx and SO2 on the prevalence and severity of respiratory conditions Our study not only identifies significant pollutant health associations but also introduces a novel predictive model that assesses individual risk based on dynamic air quality metrics and personal health data The model's predictive accuracy offers a proactive tool for public health interventions allowing for targeted health advisories and personalized prevention strategies The findings enhance our understanding of air pollution's multifaceted effects on respiratory health providing crucial evidence to guide effective policy measures and improve health outcomes in affected populations

Air Pollution Anca Moldoveanu,2011-09-06 Today an important issue is environmental pollution especially air pollution Due to pollutants present in air human health as well as animal health and vegetation may suffer The book can be divided in two parts The first half presents how the environmental modifications induced by air pollution can have an impact on human health by inducing modifications in different organs and systems and leading to human pathology This part also presents how environmental modifications induced by air pollution can influence human health during pregnancy The second half of the book presents the influence of environmental pollution on animal health and vegetation and how this impact can be assessed the use of the micronucleus tests on *TRADESCANTIA* to evaluate the genotoxic effects of air pollution the use of transplanted lichen *PSEUDEVERNIA FURFURACEA* for biomonitoring the presence of heavy metals the monitoring of epiphytic lichen biodiversity to detect environmental quality and air pollution etc The book is recommended to professionals interested in health and environmental issues
