Birzache, 2016-02-05 This monograph explores the way that the profile and the critical functions of the holy fool have developed in European cinema allowing this traditional figure to capture the imagination of new generations in an age of religious pluralism and secularization Alina Birzache traces the cultural origins of the figure of the holy fool across a variety of European traditions In so doing she examines the critical functions of the holy fool as well as how filmmakers have used the figure to respond to and critique aspects of the modern world Using a comparative approach this study for the first time offers a comprehensive explanation of the enduring appeal of this protean and fascinating cinematic character Birzache examines the trope of holy foolishness in Soviet and post Soviet cinema French cinema and Danish cinema corresponding broadly to and permitting analysis of the three main orientations in European Christianity Orthodox Catholic and Protestant This study will be of keen interest to scholars of religion and film European cinema and comparative religion

*What Form of Government for the European Union and the Eurozone?* Federico Fabbrini, Ernst Hirsch Ballin, Han Somsen, 2015-10-29 What is the form of government of the European Union EU And how is the institutional governance of the Eurozone evolving These questions have become pressing during the last few years On the one hand the Euro crisis and the legal and institutional responses to it have had major implications on the constitutional architecture of the EU and the Eurozone On the other hand the May 2014 elections for the European Parliament and the ensuing struggle to form the European Commission have brought to the fore new tensions in the EU political system The purpose of this book which brings together the contributions of EU lawyers comparative constitutional lawyers and political scientists from all over Europe and the United States is to offer a new look at the form of government of the EU and the Eurozone and consider its potential for future development While offering a plurality of perspectives on the form of government of the EU and the Eurozone this book emphasises how the Euro crisis represents a watershed in the process of European integration makes the case for a more legitimate and effective form of government for the EU and the Eurozone and identifies possible windows of opportunity for future treaty reforms The volume will provide food for thought for scholars policy makers and the public at large as they continue debating the most apt form of government for the EU and the Eurozone

**The Figure of the Migrant in Contemporary European Cinema** Temenuga Trifonova, 2020-07-09 The Figure of the Migrant in Contemporary European Cinema explores contemporary debates around the concepts of Europe and European identity through an examination of recent European films dealing with various aspects of globalization the refugee crisis labour migration the resurgence of nationalism and ethnic violence neoliberalism post colonialism with a particular attention to the figure of the migrant and the ways in which this figure challenges us to rethink Europe and its core

Enlightenment values citizenship justice ethics liberty tolerance and hospitality in a post national context of ephemerality volatility and contingency that finds people desperately looking for firmer markers of identity The book argues that a compelling case can be made for re orienting the study of contemporary European cinema around the figure of the migrant viewed both as a symbolic figure representing post national citizenship urbanization the gap between ethics and justice and as a figure occupying an increasingly central place in European cinema in general rather than only in what is usually called migrant and diasporic cinema By drawing attention to the structural and affective affinities between the experience of migrants and non migrants Europeans and non Europeans Trifonova shows that it is becoming increasingly difficult to separate stories about migration from stories about life under neoliberalism in general

**The Gift of European Thought and the Cost of Living** Vassos Argyrou,2013-09-01 European thought is often said to be a gift to the rest of the world but what if there is no gift as such What if there is only an economy where every giving is also a taking and every taking is also a giving This book extends the question of economies by making a case for an economy of thought and a political economy It argues that all thinking and doing presupposes taking and therefore giving as the price to pay for taking or that there exists a cost of living which renders the idea of free thinking and living untenable The argument is developed against the

Enlightenment directive to think for oneself as the means of becoming autonomous and shows that this light given to the rest of the world as a gift turns out to be nothing

The Dynamics of European Integration Thomas König,2024-05-02 In Europe s recent history there have been several challenges to the strength of the European Union Brexit COVID financial crises and global tensions bringing an increased need to understand the ways that the European Union EU could successfully stay together or fall apart In examining how the European Union has changed since 1993 important puzzles have emerged including how national government functions are transferred to the EU without reforming the EU how increased transparency is announced while decisions are approved in informal meetings and how the effects of the polarizing rise of Euroscepticism can be managed to still promote the formation of solidarity and trust among Europeans To understand these puzzles Thomas König introduces a new theory of supra national partyism to help explain the causes and consequences of choices made by political leaders for Europe He uses a game theoretical perspective to look at how conditions for leaders change through accessions of new members shocks and crises and separates institutional choices into two different games played by office and policy seeking political leaders the interstate summit game and the national game of party competition The Dynamics of European Integration reveals how the reorganization of electoral systems can harness dissensus and polarization among diverse national constituencies to enable the promotion of solidarity and trust in the EU

*The Politicisation of the European Commission's Presidency* Matilde Ceron,Thomas Christiansen,Dionyssis G.

Dimitrakopoulos,2024-04-04 This book is the first systematic effort to investigate the ramifications of the introduction of the Spitzenkandidaten process for the appointment of the President of the European Commission It does so by examining the

first two applications of the Spitzenkandidaten process from an historical legal and political perspective Although this process has spurred vibrant debate regarding its impact on EU elections and the EU political system it has yet to be comprehensively analysed by scholars Addressing this important gap the book provides a conceptual framework for analysing the impact of the Spitzenkandidaten process takes stock of its internal inter institutional and constitutional repercussions and assesses its future prospects Interdisciplinary in nature the book touches on several important themes including European elections EU policy making leadership legitimacy supranationalism and European integration Published to coincide with the 2024 European Parliament election it will appeal to scholars and students of the politics of European integration public administration governance European politics and EU constitutional law

**National and Regional Symbolic Boundaries in the European Commission** Daniel Drewski, 2021-07-21 The process of European integration and the transfer of political authority from the national to the European level have led to the emergence of a field of EU policy making in Brussels which attracts professionals and experts from all EU member states This book contributes to research on the dynamics of social integration unfolding at the heart of this field Based on in depth interviews with officials working for the European Commission the EU's supranational organization the author explores the perception and negotiation of symbolic boundaries related to their diverse national and regional backgrounds In line with their cosmopolitan attitudes and role conception as European civil servants Commission officials tend to de-emphasize national and regional divisions among them Nevertheless subtle symbolic boundaries remain in connection with their diverse organizational cultures working language preferences professional values and influence and career prospects This nuanced account of patterns of social categorization and group making in a European context will appeal to sociologists with interests in European integration and the emergence of social fields and groups beyond the nation state

**European Yearbook of Constitutional Law 2022** Jurgen de Poorter, Gerhard van der Schyff, Maarten Stremmer, Maartje De Visser, Ingrid Leijten, Charlotte van Oirsouw, 2023-07-25 The European Yearbook of Constitutional Law EYCL is an annual publication devoted to the study of constitutional law It aims to provide a forum for in depth analysis and discussion of new developments in the field both in Europe and beyond This fourth volume of the EYCL addresses the underexplored and contentious topic of whether the EU possesses a constitutional identity of its own To date the main focus of scholarship and case law concerns the constitutional identities of the Member States of the EU This is because the EU has to respect such identities according to article 4 2 TEU The attention for Member States constitutional identities stands in stark contrast to the notion of an EU constitutional identity Such an identity features very little in the literature and debate on constitutional identity and the legal architecture of the EU Consequently this edition of the EYCL addresses the gap in legal research by studying constitutional identity with a focus on the EU itself The book explores various views on whether the EU possesses such an identity and what any possible identity might entail In this way a fuller and more inclusive picture can be formed of constitutional identity as it relates to the multilevel constitutional order inhabited by the EU and its Member States This volume will be of special interest to constitutional and legal scholars who are interested in EU and national constitutional law as well as to political scientists In addition the book is relevant for judges government officials judges and policy makers who work with EU constitutional law and its relationship with national constitutional law Jurgen de Poorter is State Councillor at the Dutch Council of State and professor at Tilburg Law School Department of Public Law and Governance Gerhard van der Schyff is associate professor at Tilburg Law School Department of Public Law and Governance Maarten Stremmer is assistant professor at Maastricht University Faculty of Law Department of Public Law Maartje De Visser is associate professor at SMU School of Law Singapore Ingrid Leijten is professor at Tilburg Law School Department of Public Law and Governance Charlotte van Oirsouw is PhD researcher at Utrecht University Department of Constitutional and Administrative Law

**The Total Work of Art in European Modernism** David Roberts, 2011-12-15 In this groundbreaking book David Roberts

sets out to demonstrate the centrality of the total work of art to European modernism since the French Revolution The total work of art is usually understood as the intention to reunite the arts into the one integrated whole but it is also tied from the beginning to the desire to recover and renew the public function of art The synthesis of the arts in the service of social and cultural regeneration was a particularly German dream which made Wagner and Nietzsche the other center of aesthetic modernism alongside Baudelaire and Mallarmé The history and theory of the total work of art pose a whole series of questions not only to aesthetic modernism and its utopias but also to the whole epoch from the French Revolution to the totalitarian revolutions of the twentieth century The total work of art indicates the need to revisit key assumptions of modernism such as the foregrounding of the autonomy and separation of the arts at the expense of the countertendencies to the reunion of the arts and cuts across the neat equation of avant gardism with progress and deconstructs the familiar left right divide between revolution and reaction the modern and the antimodern Situated at the interface between art religion and politics the total work of art invites us to rethink the relationship between art and religion and art and politics in European modernism In a major departure from the existing literature David Roberts argues for twin lineages of the total work a French revolutionary and a German aesthetic which interrelate across the whole epoch of European modernism culminating in the aesthetic and political radicalism of the avant garde movements in response to the crisis of autonomous art and the accelerating political crisis of European societies from the 1890s forward

**European 'Security' Governance** George Christou, Stuart Croft, 2014-06-11 This book argues that we can understand and explain the EU as a security and peace actor through a framework of an updated and deepened concept of security governance It elaborates and develops on the current literature on security governance in order to provide a more theoretically driven analysis of the EU in security Whilst the current literature on security governance in Europe is conceptually rich there still remains a gap between those that do security governance and those that focus on security per se A theoretical framework is constructed with the objective of creating a conversation between these two literatures and the utility of such a framework is demonstrated through its application to the geospatial dimensions of EU security as well as specific cases studies in varied fields of EU security This book was originally published as a special issue of European Security

**Britain's Failure to Enter the European Community, 1961-63**

George Wilkes,2013-05-13 The essays collected here outline a number of factors which made the EC too young to be able to assimilate Britain's important interests and the British over optimistic in their approach to negotiations with the Community The role of conflict over Western strategy and European political union in the breakdown of the negotiations is reassessed and the negotiations over agriculture and the Commonwealth are revealed in an entirely new light Institutional

Challenges in the European Union Madeleine O. Hosli,Mika Widgrén,Adrian M. A. van Deemen,2012-10-12 The European Union EU is a continuously evolving entity Starting with six member states in the late 1950s the EU currently encompasses fifteen states of Western Europe It is expected to almost double in size in the near future however taking in a number of states located in Central and Eastern Europe in addition to Cyprus and Malta This dramatic increase has led to an intensive debate on how the institutions of the EU should be adapted in order to cope with this growth This book addresses the challenges that EU enlargement and institutional change imply for various policy fields such as EU trade policy agriculture and monetary policy in the framework of European economic and monetary union It will be of interest to economists and political scientists seeking an up to date overview of institutional challenges facing the European Union **Text, Cases and**

**Materials on European Union Law** John Tillotson,2013-03-04 First published in 2003 Routledge is an imprint of Taylor Francis an informa company **The Contested Diplomacy of the European External Action Service** Jost-Henrik

Morgenstern-Pomorski,2018-03-09 The creation of the European External Action Service EEAS the EU's new diplomatic body was accompanied by high expectations for improving the way Europe would deal with foreign policy However observers of its first years of operation have come to the opposite conclusion This book explains why the EEAS despite being hailed as a milestone in integration in Europe's foreign policy has fallen short of the mark It does so by enlisting American institutionalist approaches to European questions of institutional creation bureaucratic organisations and change The book examines the peculiar shape the EEAS's organisation has taken what political factors determined that shape and design and how it has operated Finally it looks at the autonomous operation of the EEAS from a bureaucratic theory perspective concluding that this is the best way to understand its course Including data gathered from elite interviews of politicians and senior officials involved in the institutional process an assessment of official documentary evidence and a survey of EEAS officials at the organisation's beginning it sheds new light on a controversial tool in the EU's foreign policy This text will be of key interest to scholars and students of European Union foreign policy public administration and more broadly to European Union and European politics as well as to practitioners within those fields
