The Indirect Object in Present-day English Jennifer Herriman, 1995 **Wh-Clauses in English** Joe

Trotta, 2016-08-22 This study provides the first description oriented theoretically unaligned account of wh clauses in Modern English The author employs a data based approach to examine aspects of both generative and non generative work as regards their relative strengths and weaknesses Wh clauses in English Aspects of Theory and Description is a unique combination of statistical findings and qualitative analysis It is not only underpinned by a systematic investigation of the Brown University corpus but also includes attested material from other sources such as the British National Corpus the CobuildDirect corpus as well as material gleaned from the internet The qualitative and quantitative analyses are combined to approach a wide range of theoretical and descriptive issues such as wh movement landing sites for moved wh XPs vacuous movement island constraints among others Not insignificantly many questions of indeterminacy are addressed such as the interface of conjunctions and relative words the problems of demarcation between interrogatives and free relatives as well as structural ambiguities between interrogatives and exclamatives *The Diachrony of Ditransitives* Chiara Fedriani, Maria

Napoli, 2020-10-26 While ample studies exist on ditransitives in various languages notably from a typological perspective more work needs to be done on identifying the main processes and factors that trigger and constrain the changes they undergo over time The goal of this volume is to help fill this gap by bringing together data and information on individual languages that have thus far been left out of the discussion and by expanding our knowledge of already studied linguistic traditions so as to achieve a broader diachronic description Since one of the distinctive features of ditransitives is their synchronic variability in terms of structural alternation and alignment split diachronic research can throw up new insights into developmental dynamics that are eminently complementary namely on the one hand the emergence development and loss of construction alternation and on the other the acquisition of new functions over time The analyses offered in the book yield different and interconnected answers to the general question of how ditransitives change by drawing on different functional principles that play a role in the diachronic reorganization of this dynamic domain and by providing a number of original theoretical suggestions **Ditransitives in Germanic Languages** Eva Zehentner, Melanie Röthlisberger, Timothy Coleman, 2023-08-15 This volume brings together twelve empirical studies on ditransitive constructions in Germanic languages and their varieties past and present Specifically the volume includes contributions on a wide variety of Germanic languages including English Dutch and German but also Danish Swedish and Norwegian as well as lesser studied ones such as Faroese While the first part of the volume focuses on diachronic aspects the second part showcases a variety of synchronic aspects relating to ditransitive patterns Methodologically the volume covers both experimental and corpus based studies Questions addressed by the papers in the volume are among others issues like the cross linguistic pervasiveness and cognitive reality of factors involved in the choice between different ditransitive constructions or differences and similarities

in the diachronic development of ditransitives The volume s broad scope and comparative perspective offers comprehensive insights into well known phenomena and furthers our understanding of variation across languages of the same family

Fredrik Valdeson,2024-06-11 This book presents the first major study of ditransitives in Swedish Using a combination of well established and innovative corpus based methods the book reveals considerable changes in the constructional behaviour of ditransitive verbs over the course of the last 200 years The key finding is that the use of the so called double object construction has decreased dramatically in terms of frequency lexical richness and semantic range This development is paralleled by a decisive increase in prepositional object constructions The results are of high relevance to the ongoing debate within construction grammar on constructional productivity and on the nature of horizontal links FoL ,2001
