Simon, Ye-Qiong Song, Christophe Aubrun, 2013-03-04 Networked Control Systems NCS is a growing field of application and calls for the development of integrated approaches requiring multidisciplinary skills in control real time computing and communication protocols This book describes co design approaches and establishes the links between the QoC Quality of Control and QoS Quality of Service of the network and computing resources The methods and tools described in this book take into account at design level various parameters and properties that must be satisfied by systems controlled through a network Among the important network properties examined are the QoC the dependability of the system and the feasibility of the real time scheduling of tasks and messages Correct exploitation of these approaches allows for efficient design diagnosis and implementation of the NCS This book will be of great interest to researchers and advanced students in automatic control real time computing and networking domains and to engineers tasked with development of NCS as well as those working in related network design and engineering fields

A Simulation Study of Emergency Lunar Escape to Orbit Using Several Simplified Manual Guidance and Control Techniques David B. Middleton, 1971

A fixed base piloted simulator investigation has been made of the feasibility of using any of several manual guidance and control techniques for emergency lunar escape to orbit with very simplified lightweight vehicle systems The escape to orbit vehicles accommodate two men but one man performs all of the guidance and control functions Three basic attitude control modes and four manually executed trajectory guidance schemes were used successfully during approximately 125 simulated flights under a variety of conditions These conditions included thrust misalignment uneven propellant drain and a vehicle moment of inertia range of 250 to 12 000

slugs per square foot Two types of results are presented orbit characteristics and pilot ratings of vehicle handling qualities
