The Ecological Basis of Conservation Steward Pickett, Richard S. Ostfeld, Moshe Shachak, Gene E. Likens, 2012-12-06 From its inception the U.S. Department of the Interior has been charged with a conflicting mission. One set of statutes demands that the department must develop America's lands that it get our trees, water, oil, and minerals out into the marketplace. Yet an opposing set of laws orders us to conserve these same resources to preserve them for the long term and to consider the noncommodity values of our public landscape. That dichotomy between rapid exploitation and long-term protection demands what I see as the most significant policy departure of my tenure in office: the use of science interdisciplinary science as the primary basis for land management decisions. For more than a century that has not been the case. Instead we have managed this dichotomy by compartmentalizing the American landscape. Congress and my predecessors handled resource conflicts by drawing enclosures. We'll create a national park here they said and we'll put a wildlife refuge over there. Simple enough as far as protection goes. And outside those protected areas the message was equally simplistic. You all come and get it. Have at it. The nature and the pace of the resource extraction was not at issue if you could find it it was yours

Teaching British Women Writers, 1750-1900 Jeanne Moskal, Shannon R. Wooden, 2005 The exuberant recovery from obscurity of scores of British women writers has prompted professors and publishers to revisit publication of women's writings. New curricular inclusion of these sometimes quirky, often passionate writers profoundly disrupts traditional pedagogical assumptions about what constitutes literature. This book addresses this radically changed educational landscape, offering practical, proven teaching strategies for newly recovered writers both in special topics courses and in traditional teaching environments. Moreover, it addresses the institutional issues confronting feminist scholars who teach women writers in a variety of settings and the kinds of career-altering effects the decision to teach this material can have on junior and senior scholars alike. Collectively, these essays argue that teaching noncanonical women writers invigorates the curriculum as a whole, not only by introducing the voices of women writers but by incorporating new genres by asking new questions about

readers assumptions and aesthetic values and by altering the power relations between teacher and student for the better

THE STORM (Unabridged) Daniel Defoe, 2024-01-13 In *The Storm* Daniel Defoe employs his renowned narrative technique to vividly recount the harrowing experiences of a tempest that struck the British Isles in 1703. This unabridged work masterfully blends factual accounts with imaginative storytelling, capturing the chaos and destruction of one of history's most violent storms. Defoe's prose is characterized by its meticulous detail and psychological insight, showcasing the human response to nature's unpredictability. Set against the backdrop of emerging Enlightenment thought, the text not only illustrates the physical wildness of nature but also reflects the burgeoning interest in empiricism and rationality within early 18th-century literature. Daniel Defoe, best known for his groundbreaking novel *Robinson Crusoe*, was a keen observer of social and environmental phenomena. His life as a writer, journalist, and merchant gave him a unique perspective on the interconnectedness of humanity and nature. Drawing upon his own experiences with trade and shipwrecks, Defoe infuses *The Storm* with a sense of urgency and realism, allowing readers to grapple with the sublime forces that shape human existence. This compelling narrative is recommended for anyone interested in the intersection of literature, history, and natural disasters. Defoe's rich descriptive style and thoughtful commentary offer not just an account of a tempest but also a reflection on human endurance, making it a vital read for scholars and casual readers alike.
