*The Innovation Ethic* Robert Kirk Mueller, 1971      *Innovation Ethics* Roger Hunt, 2024-02-09 While entrepreneurship characterizes an ideal form of self sufficiency in practice entrepreneurs find themselves subject to a complex network of support systems which in effect exploit their talents resources and passion for structural risk mitigation This dynamic infrastructure composed of founders investors and service providers is not a necessary institution but rather the result of intersectional incentive structures managed by the professionalization of a process which is supposed to be anti professional This paradox should be addressed at a structural level if we hope to preserve the ideal of entrepreneurship Innovation Ethics proposes a solution where we reframe a regulatory metric away from optimization towards innovation through the redistribution of risk across the entrepreneurial ecosystem This solution finds support in a model of innovation ethics which we have designed to correct the over reliance on naturalistic models by stimulating a debate over how and even if innovation should proceed
