J. Gullan, P. S. Cranston, 2014-11-03 Insects represent over half of the planet s biological diversity This popular textbook provides a comprehensive introduction to this extraordinary diversity and places entomology central to the theory and practice of evolutionary and ecological studies Fully revised this fifth edition opens with a chapter concerning the popular side of insect studies including insects in citizen science zoos and butterfly houses and insects as food for humans and animals Key

features of insect structure function behaviour ecology and classification are integrated with appropriate molecular studies Much of the book is organized around major biological themes living on the ground in water on plants in colonies and as predators parasites parasitoids and prey insects A strong evolutionary theme is maintained throughout There is major revision to the chapter on systematics and a new chapter Insects in a Changing World includes insect responses to and the consequences of both climate change and human assisted global alterations to distributions Updated Taxoboxes demonstrate topical issues and provide concise information on all aspects of each of the 28 major groupings orders of insects plus the three orders of non insect hexapods New boxes describe a worrying increase in insect threats to landscape and commercial trees including eucalypts palms and coffee and explain the value of genetic data including evolutionary developmental biology and DNA barcoding in insect biodiversity studies The authors maintain the clarity and conciseness of earlier editions and extend the profuse illustrations with new hand drawn figures Over 50 colour photographs together with the informative text and an accompanying website with links to video clips appendices textboxes and further reading lists encourage a deeper scientific study of insects The book is intended as the principal text for students studying entomology as well as a reference text for undergraduate and graduate courses in the fields of ecology agriculture fisheries and forestry palaeontology zoology and medical and veterinary science
