The Coelum Philosophorum Or Of Vexations:

The Coelum Philosophorum Philippus Theophrastus Paracelsus, 2015-08-28 Classic Books on Alchemy The Coelum Philosophorum The Book of Vexations By Philippus Theophrastus Paracelsus The Science and Nature of Alchemy and what Opinion Should be Formed Thereof Regulated by the Seven Rules or Fundamental Canons according to the seven commonly known Metals and containing a Preface with certain Treatises and Appendices YOU who are skilled in Alchemy and as many others as promise yourselves great riches or chiefly desire to make gold and silver which Alchemy in different ways promises and teaches equally too you who willingly undergo toil and vexations and wish not to be freed from them until you have attained your rewards and the fulfilment of the promises made to you experience teaches this every day that out of thousands of you not even one accomplishes his desire Is this a failure of Nature or of Art I say no but it is rather the fault of fate or of the unskilfulness of the operator Since therefore the characters of the sign of the stars and planets of heaven together with the other names inverted words receipts materials and instruments are thoroughly well known to such as are acquainted with this art it would be altogether superfluous to recur to these same subjects in the present book although the use of such signs names and characters at the proper time is by no means without advantage But herein will be noticed another way of treating Alchemy different from the previous method and deduced by Seven Canons from the sevenfold series of the metals This indeed will not give scope for a pompous parade of words but nevertheless in the consideration of those Canons everything which should be separated from Alchemy will be treated at sufficient length and moreover many secrets of other things are herein contained Hence too result certain marvellous speculations and new operations which frequently differ from the writings and opinions of ancient operators and natural philosophers but have been discovered and confirmed by full proof and experimentation Moreover in this Art nothing is more true than this though it be little known and gains small confidence All the fault and cause of difficulty in Alchemy whereby very many persons are reduced to poverty and others labour in vain is wholly and solely lack of skill in the operator and the defect or excess of materials whether in quantity or quality whence it ensues that in the course of operation things are wasted or reduced to nothing If the true process shall have been found the substance itself while transmuting approaches daily more and more towards perfection The straight road is easy but it is found by very few
