Berkowitz,2018-04-19 *Animals and Animality in the Babylonian Talmud* selects key themes in animal studies animal intelligence morality sexuality suffering danger personhood and explores their development in the Babylonian Talmud Beth A Berkowitz demonstrates that distinctive features of the Talmud the new literary genre the convergence of Jewish Christian and Zoroastrian cultures the Talmud's remove from Temple centered biblical Israel led to unprecedented possibilities within Jewish culture for conceptualizing animals and animality She explores their development in the Babylonian Talmud showing how it is ripe for reading with a critical animal studies perspective When we do we find waiting for us a multi layered surprisingly self aware discourse about animals as well as about the anthropocentrism that infuses human relationships with them For readers of religion Judaism and animal studies her book offers new perspectives on animals from the vantage point of the ancient rabbis      **The Philosophy of Animal Minds** Robert W. Lurz,2009-09-03 This volume is a collection of

fourteen essays by leading philosophers on issues concerning the nature existence and our knowledge of animal minds The nature of animal minds has been a topic of interest to philosophers since the origins of philosophy and recent years have seen significant philosophical engagement with the subject However there is no volume that represents the current state of play in this important and growing field The purpose of this volume is to highlight the state of the debate The issues which are covered include whether and to what degree animals think in a language or in iconic structures possess concepts are conscious self aware metacognize attribute states of mind to others and have emotions as well as issues pertaining to our knowledge of and the scientific standards for attributing mental states to animals      **The Oxford Handbook of Evolutionary Perspectives on Violence, Homicide, and War** Todd K. Shackelford,Viviana A. Weekes-Shackelford,2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the

evolutionary sciences to produce an extensive and authoritative review of this literature      *The Animal Manifesto* Marc Bekoff,2010-10-05 In this inspirational call to action Marc Bekoff the world's leading expert on animal emotions gently shows that improving our treatment of animals is a matter of rethinking our many daily decisions and expanding our compassion footprint He demonstrates that animals experience a rich range of emotions including empathy and compassion and that they clearly know right from wrong Driven by moral imperatives and pressing environmental realities Bekoff offers six compelling reasons for changing the way we treat animals whether they're in factory farms labs circuses or our vanishing wilderness The result is a well researched informative guide that will change animal and human lives for the better      Thomism and the Problem of Animal Suffering B. Kyle Keltz,2020-06-12 The problem of animal suffering is the atheistic argument that an all

knowing all powerful and all good God would not use millions of years of animal suffering disease and death to form a planet for human beings This argument has not received as much attention in the philosophical literature as other forms of the problem of evil yet it has been increasingly touted by atheists since Charles Darwin While several theists have attempted to provide answers to the problem they disagree with each other as to which answer is correct Also some of these theists have given in to the problem and believe it entails that God is limited in certain ways B Kyle Keltz seeks to provide a classical answer to the problem of animal suffering inspired by the medieval philosopher theologian Thomas Aquinas In doing so Keltz not only utilizes the wisdom of Aquinas but also contemporary insights into non human animal minds from contemporary philosophy and science Keltz provides a compelling neo Thomistic answer to the problem of animal suffering and explains why the classical God of theism would create a world that includes animal death

Parrish,2013-11-07 Rhetorical scholarship has for decades relied solely on culture to explain persuasive behavior While this focus allows for deep explorations of historical circumstance it neglects the powerful effects of biology on rhetorical behavior how our bodies and brains help shape and constrain rhetorical acts Not only is the cultural model incomplete but it tacitly endorses the fallacy of human exceptionalism By introducing evolutionary biology into the study of rhetoric this book serves as a model of a biocultural paradigm Being mindful of biological and cultural influences allows for a deeper view of rhetoric one that is aware of the ubiquity of persuasive behavior in nature Human and nonhuman animals and even some plants persuade to survive to live love and cooperate That this broad spectrum of rhetorical behavior exists in the animal world demonstrates how much we can learn from evolutionary biology By incorporating scholarship on animal signaling into the study of rhetoric the author explores how communication has evolved and how numerous different species of animals employ similar persuasive tactics in order to overcome similar problems This cross species study of rhetoric allows us to trace the origins of our own persuasive behaviors providing us with a deeper history of rhetoric that transcends the written and the televised and reveals the artifacts of our communicative past

**Animal Subjects: Volume 1** Caroline Hovanec, 2018-09-06 Animal Subjects identifies a new understanding of animals in modernist literature and science Drawing on Darwin s evolutionary theory British writers and scientists of the late nineteenth and early twentieth centuries began to think of animals as subjects dwelling in their own animal worlds Both science and literature aimed to capture the

complexity of animal life and their shared attention to animals pulled the two disciplines closer together. It led scientists to borrow the literary techniques of fiction and poetry and writers to borrow the observational methods of zoology. *Animal Subjects* tracks the coevolution of literature and zoology in works by H. G. Wells, Aldous Huxley, D. H. Lawrence, Virginia Woolf, and modern scientists including Julian Huxley, Charles Elton, and J. B. S. Haldane. Examining the rise of ecology, ethology, and animal psychology, this book shows how new subject-centered approaches to the study of animals transformed literature and science in the modernist period.
