The Ilkhanid Heartland Hasanlu Tepe Iran Period I:

The Ilkhanid Heartland Michael D. Danti, 2004-07 The site of Hasanlu Tepe in Iran is today known mainly for its Iron Age archaeology In this report Michael Danti has re examined the records from excavations between 1956 and 1962 to reconstruct the sequence of occupation on the mound from the late 13th to early 14th centuries **Equipment for Horses from the Period IVB Level at Tepe Hasanlu, Iran** Maude De Schauensee, 2024-12-31 This book presents for the first time the complete corpus of equipment for horses excavated by The Hasanlu Project in the Iron II level at Hasanlu Tepe Iran The equipment is varied extensive and in a context sealed as buildings collapsed during the violent surprise attack and resulting fire that destroyed the town The equipment most still in its primary location ready for active use make it of particular if not unique importance It is also remarkable in the quantity recovered its variety and richness the functional types that could be identified riding draft ceremonial and the amount that could be reconstructed Its life context gives new information about equipment and usage not otherwise available and allows suggestions for the layered importance of the horse as evidenced by the equipment No other book presents equipment for horses in a similar context and quantity because the preservation at Hasanlu is unique for this part of the Near East in this time period The equipment also provides new insight into space use in Hasanlu one of the most important Iron Age sites in northwest Iran Findspots yield information about building use and reuse some as stables These and architectural alterations provide unique information regarding changes to the town over time some of which most likely reflect changes in the dynamics of the region **Hasanlu V** Michael D. Danti, 2013-09-24 Hasanlu V provides archaeologists with a new more accurate chronology of Hasanlu the largest and arguably the most important archaeological site in the Gadar River Valley of northwestern Iran This revised chronology introduces Hasanlu Periods VIa V and IVc for the first time Based on new findings the report overturns current constructions of the origins of the archaeological culture in Hasanlu which sought to link the Monochrome Burnished Ware Horizon formerly known as the Early Western Grey Ware Horizon to the migration of new peoples into western Iran in the later second millennium B C Hasanlu V shows instead that the Monochrome Burnished Ware Horizon developed gradually from indigenous traditions This reappraisal has important implications for our understanding of Indo Iranian migrations into the Zagros region University Museum Monograph 137 **The American Institute of Iranian Studies** Erica Ehrenberg, 2025-06-17 The American Institute of Iranian Studies is devoted to fostering research in the field of Iranian studies and promoting scholarly exchange between the United States and Iran This collection of essays addresses the history and development of Iranian studies in the United States and the pivotal role of the Institute in furthering research in the field The purview of the Institute is vast covering Iranology the study of Iranian peoples and cultures both within and across regions of Central and South Asia and the Middle East where various forms of the Persian language are spoken In keeping with the Institute s dedication to facilitating research in Iran the chapters in this volume represent fields of inquiry that have benefited from direct access to
