The Image in Form Adrian Stokes,1972 **Adrian Stokes** Stephen Kite,2017-12-02 Adrian Stokes 1902-72 aesthete critic painter and poet is among the most original and creative writers on art of the twentieth century He was the author of over twenty critical books and numerous papers for example the remarkable series of books published in the 1930s *The Quattro Cento* 1932 *Stones of Rimini* 1934 and *Colour and Form* 1937 that embraced Mediterranean culture and modernity His criticism extends the evocative English aesthetic tradition of Walter Pater and John Ruskin into the present endowed by a stern sensibility to the consolations offered by art and architecture and the insights that psychoanalysis affords Indeed for Stokes architecture provides the entree into art and this book is the first study to comprehensively examine Stokes's theory of art from a specifically architectonic perspective The volume explores the crucial experiences through which this architectonic awareness evolved traces the influence upon Stokes of places texts and personalities and examines how his theory of art developed and matured The argument is supported by appropriate illustrations to confirm the evidence that Stokes's claim for architecture as mother of the arts carries the deepest experiential and psychological import

Psychoanalytic Criticism Elizabeth Wright,2013-08-21 First published in 2002 Modes and categories inherited from the past no longer seem to fit the reality experienced by a new generation *New Accents* is intended as a positive response to the initiative offered by such a situation Each volume in the series will seek to encourage rather than resist the process of change to stretch rather than reinforce the boundaries that currently define literature and its academic study The purpose of this book is to give a critical overview of what has become a very wide field the relationship of psychoanalytic theory to the theories of literature and the arts and the way that developments in both domains have brought about changes in critical practice

Ideas and Structures Almantas Samalavicius, 2011-02-04 This book is a scholarly inquiry into several dimensions of culture exploring the close relationship between architecture and metaphysical ideas as well as religious and philosophical concepts in each period of human history a relationship which has however been largely forgotten or neglected by modernity Rather than being a specialized account of any particular epoch it is an intellectual attempt to map out a general picture of how certain ideas have made their way into architectural structures or shaped them in one or another way from classical Antiquity through the Middle Ages and the Renaissance to the present The four essays it contains focusing on light water color and sound in architecture are written by an author who is a historian and critic of architecture as well as literary scholar who firmly believes in the value of discussing these issues from the perspective of the history of ideas The author is conscious about the limits of any generalizations but he believes that architecture should be studied not only as an art in its own right but as something larger enveloping many layers of culture and reflecting the bonds between human thinking and the practice of the art of building

Thinking Through Twentieth-Century Architecture Nicholas Ray, 2023-02-08 Shortlisted for the Architectural Book Awards 2024 Thinking Through Twentieth Century Architecture connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture

chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students **Imagining Animals**

There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition **Art and Form** Sam Rose, 2019-03-25

This important new study reevaluates British art writing and the rise of formalism in the visual arts from 1900 to 1939 Taking Roger Fry as his starting point Sam Rose rethinks how ideas about form influenced modernist culture and the movement s

significance to art history today In the context of modernism formalist critics are often thought to be interested in art rather than life a stance exemplified in their support for abstract works that exclude the world outside But through careful attention to early twentieth century connoisseurship aesthetics art education design and art in colonial Nigeria and India Rose builds an expanded account of form based on its engagement with the social world Art and Form thus opens discussions on a range of urgent topics in art writing from its history and the constructions of high and low culture to the idea of global modernism Rose demonstrates the true breadth of formalism and shows how it lends a new richness to thought about art and visual culture in the early to mid twentieth century Accessibly written and analytically sophisticated Art and Form opens exciting new paths of inquiry into the meaning and lasting importance of formalism and its ties to modernism It will be invaluable for scholars and enthusiasts of art history and visual culture *Faces in the Clouds* Stewart Elliott Guthrie, Stewart
