The Imitation Game and Other Plays Ian McEwan, 1982 *Plays and Games for Indoors and Out* Belle Ragnar Parsons, 1919 **Ian McEwan** Lynn Wells, 2009-12-07 This introduction to the work of Ian McEwan places his fiction in historical and theoretical context It explores his biography literary techniques and the issues of ethics and representation Including a timeline of key dates and an interview with the author it also offers an overview of the critical reception McEwan's work has provoked *The Turing Test* James H. Moor, 2012-12-06 In 1950 Alan Turing 1912 1954 published his famous article Computing Machinery and Intelligence in the journal Mind This article is arguably the most influential and widely read article in the philosophy of artificial intelligence Indeed most of the debate in the philosophy of artificial intelligence over the last fifty years concerns issues that were raised and discussed by Turing Turing's genius was not only in developing the theory of computability but also in understanding the impact both practical and philosophical that computing machinery would have Turing believed that computers if properly designed and educated could exhibit intelligent behavior even behavior that would be indistinguishable from human intelligent behavior His vision of the possibility of machine intelligence has been highly inspiring and extremely controversial In this classic article Turing presented his well known imitation game and predicted that about the year 2000 an average interrogator will not have more than 70 per cent chance of making the right identification after five minutes of questioning in the imitation game Based on the results of the Loebner 2000 contest and the accomplishments in the field of AI as impressive as they are Turing's prediction remains unfulfilled *Teenage Audiences and British Period Drama* Shelley Anne Galpin, 2024-07-25 This book provides an engaging insight into the responses of teenage audiences to British period drama presenting original data collected from young people across England Situated in relation to debates regarding the heritage film and young people's consumption of the media Teenage Audiences and British Period Drama challenges the often homogenous characterisation of teenagers by demonstrating the range of responses this genre inspires in young viewers Arguing for the period drama's underestimated relevance to younger audiences the book details the varied ways that young people use film and television drama to make sense of the world and their place in it and highlights the under researched significance of collective viewing in influencing viewer response Analysis demonstrates the key role that values play in influencing judgements amongst youth audiences the importance of perceived historical accuracy and the potential for screen texts to inspire a deeper relationship with the past **Industrial Design Engineering** John X. The Turing Test Stuart M. Shieber, 2004-06-18 Historical and contemporary papers on the philosophical issues raised by the Turing Test as a criterion for intelligence The Turing Test is part of the vocabulary of popular culture it has appeared in works ranging from the Broadway play Breaking the Code to the comic strip Robotman The writings collected by Stuart Shieber for this book examine the profound philosophical issues surrounding the Turing Test as a criterion for intelligence Alan Turing's idea originally expressed in a 1950 paper titled Computing Machinery and Intelligence and published in the journal Mind proposed an indistinguishability test that compared artifact and person Following Descartes's dictum that it is the ability to speak that distinguishes human from beast Turing proposed to test whether machine and person were indistinguishable in regard to verbal ability He was not as is often assumed answering the question Can machines think but proposing a more concrete way to ask it Turing's proposed thought experiment encapsulates the issues that the writings in The Turing Test define and discuss The first section of the book contains writings by philosophical precursors including Descartes who first proposed the idea of indistinguishability tests The second section contains all of Turing's writings on the Turing Test including not only the Mind paper but also less familiar ephemeral material The final section opens with responses to Turing's paper published in Mind soon after it first appeared The bulk of this section however consists of papers from a broad

spectrum of scholars in the field that directly address the issue of the Turing Test as a test for intelligence Contributors John R Searle Ned Block Daniel C Dennett and Noam Chomsky in a previously unpublished paper Each chapter is introduced by background material that can also be read as a self contained essay on the Turing Test The Plural Psyche Andrew Samuels,2003-09-02 Samuels proposes the case for pluralism in approaching key issues in depth psychology **Baby Hearts** Susan Goodwyn, Ph.D.,Linda Acredolo, Ph.D.,2007-12-18 Who says your baby can t talk about his or her feelings In fact babies actions often speak louder than words Understanding those actions and responding appropriately to them is the key to giving your child a head start to a healthy and happy future Now the authors of the bestselling Baby Minds and Baby Signs translate the latest research on the rich inner life of babies into practical fun activities that will foster your child s emotional skills during the most critical period between birth and age three This comprehensive guide will help you help your child express emotions effectively develop empathy form healthy friendships and cope with specific challenges Learn how to Talk with your child about emotions in order to help him recognize and control his own Use face to face interaction tone of voice song and touch to make your infant feel safe and secure Start a gratitude journal to help your child appreciate the good things in life Nurture self esteem with try try again activities and simple chores Create a What are they feeling deck of cards to help your child understand and practice emotions Use games and songs to help your child practice self control Overcome temper tantrums aggression shyness separation anxiety and other challenges Whether your child is as easy to raise as a sunflower as difficult as the prickly holly bush requires the patience of the delicate orchid or is as active as the exuberant dandelion Baby Hearts helps you provide the emotional support that may be the most important gift a parent can give

dehumanization and exploited labor are being played out in factories workplaces and battlefields In *The Robotic Imaginary* Jennifer Rhee traces the provocative and productive connections of contemporary robots in technology film art and literature Centered around the twinned processes of anthropomorphization and dehumanization she analyzes the coevolution of cultural and technological robots and artificial intelligence arguing that it is through the conceptualization of the human and more important the dehumanized that these multiple spheres affect and transform each other Drawing on the writings of Alan Turing Sara Ahmed and Arlie Russell Hochschild such films and novels as *Her* and *The Stepford Wives* technologies like *Kismet* the pioneering emotional robot and contemporary drone art this book explores anthropomorphic paradigms in robot design and imagery in ways that often challenge the very grounds on which those paradigms operate in robotics labs and industry From disembodied conversational AI and its entanglement with care labor embodied mobile robots as they intersect with domestic labor emotional robots impacting affective labor and armed military drones and artistic responses to drone warfare *The Robotic Imaginary* ultimately reveals how the human is made knowable through the design of and discourse on humanoid robots that are paradoxically dehumanized
